

QUARTERLY RETURN

OF

MARRIAGES, BIRTHS, AND DEATHS

REGISTERED IN THE DIVISIONS, COUNTIES, AND DISTRICTS OF

ENGLAND;

WITH CERTAIN DETAILED INFORMATION RELATING TO THE DEATHS IN EACH
REGISTRATION SUB-DISTRICT.

By Authority of the Registrar General.

Printed under the Superintendence of Her Majesty's Stationery Office,
AND SOLD BY EYRE AND SPOTTISWOODE, 9, EAST HARDING ST., FETTER LANE, E.C.

No. 173.] **Marriages**—October, November, December, 1891. [Price 9d.
Births and Deaths—January, February, March, 1892.

General Register Office, Somerset House,
28th April, 1892.

The POPULATION of the UNITED KINGDOM in the middle of 1892 is estimated, on the basis of the recent enumerations, at 38,109,329 persons; that of England and Wales at 29,403,346, of Scotland at 4,063,451, and of Ireland at 4,642,532.

In the United Kingdom 277,132 *births* and 235,606 *deaths* were registered in the three months ending 31st March 1892. The natural increase of population was, therefore, 41,526. The registered number of persons married in the quarter ending 31st December 1891 was 155,840.

The birth-rate in the United Kingdom in the first quarter of 1892 was 29·2 and the death-rate 24·8 per 1000. The marriage-rate in the fourth quarter of 1891 was 16·4 per 1000.

The facts, in detail, concerning Scotland and Ireland are recorded in the Quarterly Returns of the Registrars-General for those parts of the United Kingdom.

ENGLAND.

This Return comprises the BIRTHS and DEATHS registered in the 2119 registration sub-districts of England and Wales during the quarter ending 31st March 1892; and the MARRIAGES in 15,044 churches or chapels, in 10,784 registered places of worship unconnected with the Established Church, and in 632 Superintendent Registrars' Offices, in the three months ending 31st December 1891.

Marriages.

During the three months ending with December last, the marriages of 131,744 persons were registered in England and Wales, giving an annual rate of 18·0 per 1000 of the estimated population. Compared with the rates in the fourth quarters of recent years, the rate was slightly lower than that in 1890, but higher than in any other year since 1883, and 0·4 per 1000 higher than the mean in 1881–90. In registration counties the lowest rates were 13·2 in Middlesex and in Herefordshire, 14·2 in Hertfordshire, and 14·4 in Shropshire; while the highest were 20·8 in Norfolk, 20·9 in Suffolk, 21·0 in Warwickshire, and 21·7 in Cambridgeshire. In Registration London the rate was 19·8.

Births.

The births registered in the first quarter of 1892 numbered 219,851, being in the proportion of 30·0 annually per 1000 living. This is the lowest rate in the corresponding period of any year since civil registration began, and 9 per cent. below the mean rate in the ten immediately preceding first quarters. In registration counties the rates varied from 22·9 in Huntingdonshire, 24·1 in North Wales, and 24·6 in Sussex and in Westmorland, to 34·3 in South Wales, 34·9 in Staffordshire, 36·5 in Durham, and 36·8 in Monmouthshire.

In the thirty-three great towns (Tables V. and VI.), the birth-rate was 31·6 per 1000 living. The lowest rates were 20·8 in Huddersfield, 24·0 in Halifax, and 24·8 in Bradford; while the rates in the other towns ranged upwards to 36·5 in Swansea, 36·6 in Gateshead, and 39·1 in West Ham. In sixty-seven other large town districts (Table VII.) the birth-rate was 31·4 per 1000. In these 100 towns as a whole the rate was 31·5 per 1000, while in the remainder of the country it was 28·6.

Excess of Births over Deaths, and Emigration.

The *natural increase* of the population of England and Wales, or the excess of births over deaths, which had amounted to 80,952, 60,322, and 71,854 respectively, in the first quarters of 1889, 1890, and 1891, was only 37,369 last quarter. If a line be drawn along the southern boundaries of Lincolnshire, Rutlandshire, Leicestershire, Warwickshire, and Gloucestershire, the natural increase in the part of the country to the south of this line (consisting of the first five registration divisions), with an estimated population of a little over twelve and a half millions, was 8,083, while in the part to the north, with an estimated population of nearly seventeen millions, the *natural increase* was 29,286. In nine of the twenty-two registration counties to the south of the line the deaths exceeded the births, while in only four, viz., Middlesex, Northamptonshire, Essex, and Cornwall, did the birth-rate exceed the death-rate by so much as 5·0 per 1000.

It appears from returns issued by the Board of Trade that 54,046 emigrants (including 20,268 foreigners), embarked during the quarter from the various ports of the United Kingdom at which emigration officers are stationed. Distributing proportionately 949 whose nationality was not distinguished, the emigrants of native origin numbered 33,696, and of these 23,585 were English, 3630 Scotch, and 6081 Irish. The proportions of emigrants to a million of the estimated population in the several portions of the United Kingdom were 816 from England, 893 from Scotland, and 1310 from Ireland. Compared with the mean in the first quarters of the next preceding three years each of the proportions shows a decrease.

Prices and Pauperism.

During the first quarter of the year the average price of wheat was 33s. 8d. per quarter, the prices in the preceding two quarters having been 38s. 11d. and 36s. 8d. The mean wholesale prices of beef and mutton in the London market were 5½d. and 7½d. per lb. respectively; compared with the prices in the preceding quarter the price of beef showed a decline of ½d., and that of mutton an increase of 3d. The average price of the best seaborne coal in the London market, put in barge from the collier in the Thames, was 19s. per ton, against 19s. 4d. and 19s. 5d. in the first quarters of the preceding two years. The mean price of 2½l. per cent. Consols was 95l. 14s. 10d. The minimum annual rate per cent. of discount charged at the Bank of England, which had been reduced from 4l. to 3l. 10s. on 10th December 1891, was further reduced on 21st January to 3l. The average minimum rate per cent. charged during the quarter was 3·120l.

The average number of paupers (exclusive of lunatics in asylums, and of vagrants) relieved in England and Wales on the last day of each week in the quarter was 695,768, of whom 190,747 received in-door, and 505,021 out-door relief. The proportion of the population in receipt of pauper relief was 23·7 per 1000, against 25·2 and 24·1 in the first quarters of 1890 and 1891.

Meteorology.

Remarks upon the meteorology of the quarter, based on observations at the Royal Observatory, Greenwich, and at various other stations, furnished by Mr. James Glaisher, F.R.S., will be found, with accompanying Tables, on pages 65-73. The mean reading of the barometer was 29·717 inches, and was ·057 of an inch below the mean reading in the corresponding quarters of 51 years; the mean was below its average in January and February, but above it in March. The mean temperature of the air during the quarter was 37°·5, being 1°·3 below the average in the first quarters of 121 years; the mean was exactly equal to the average in February, slightly below in January, and considerably below in March. During the first three weeks of the quarter the weather was mostly dry and cold, with northerly winds and frequent snow; in the next three weeks the temperature was above the average; a cold period then set in, the temperature from February 16th to February 19th being nearly 12° below the average. The weather in March was dry and very cold, with the exception of about six days in the latter half of the month, very low temperatures having been registered in all parts of the country on the 9th. At 31 stations of observation the mean temperature during the quarter ranged from 35°·1 at Wolverhampton and 35°·2 at Halifax, to 42°·0 in Guernsey and 42°·5 at Truro.

The amount of rain or melted snow measured during the quarter at the Royal Observatory, Greenwich, was 3·16 ins., being 1·79 ins. below the average in the corresponding periods of 77 years. Compared with the respective monthly averages, there was a deficiency of 1·48 ins. in January, and of 0·46 of an inch in March, while the amount in February was 0·15 of an inch in excess. At 31 stations of observation the amounts measured in the quarter ranged from 1·56 ins. at Oxford, 2·16 ins. at Rugby, and 2·80 ins. at Whitchurch, to 7·18 ins. at Halifax, 7·77 ins. at Truro, and 8·74 ins. at Stonyhurst.

The amount of bright sunshine recorded during the quarter at the Royal Observatory was 140 hours, or 15 per cent. of the total number of hours the sun was above the horizon, the mean proportion in the first quarters of the ten years 1882-91 having been 18 per cent. The amount was considerably below the average in January and February, the number of hours in the former month being the lowest on record, but it showed a slight excess in March.

Deaths.

The deaths registered during the first quarter of 1892 numbered 182,482, being in the proportion of 24·9 deaths annually per 1000 persons living. This is higher than the rate in the corresponding period of any year since 1879, and 3·3 per 1000 in excess of the mean rate in the first quarters of the ten years 1882-91. In registration counties the rates ranged from 16·8 in Rutlandshire, 19·3 in the East Riding of Yorkshire, 20·9 in Leicestershire, and 21·0 in the West Riding of Yorkshire, to 28·7 in Huntingdonshire, 28·8 in Oxfordshire, 28·9 in Cambridgeshire, 30·8 in Dorsetshire, and 31·2 in Suffolk. Dividing the country, as before (page ii), into two parts, the aggregate death-rate in the Southern portion was 26·4 per 1000, against 21·1 in the first quarters of the ten years 1882-91; while that in the Northern portion was 23·7 per 1000, against 22·1 in the first quarters of the same ten years.

The 182,482 deaths included 91,288 of males, and 91,194 of females, the annual mortality of males being 25·7, and that of females 24·1, per 1000 estimated to be living of each sex. These rates were respectively 2·9 and 3·5 per 1000 in excess of the mean rates in the ten next preceding first quarters. Out of equal numbers living, the deaths of males were 107 to 100 of females, the mean proportion in the ten next preceding first quarters having been 110 to 100.

URBAN AND RURAL MORTALITY.—In the registration districts and sub-districts which are taken to represent approximately the urban portion of the country (*see* Table III.), and which contain a population estimated at about nineteen millions, the death-rate last quarter was 24·6 per 1000, while among the remaining and chiefly rural population of about ten and a half millions, it was 25·5 per 1000. These rates were respectively 2·2 and 5·2 per 1000 above the average rates in the first quarters of the ten years 1882–91. Out of equal numbers living, the deaths in the rural districts were to those in the urban districts in the proportion of 104 to 100, while in the first quarters of the preceding ten years the proportion was 110 in the urban districts to 100 in the rural districts. This is the only instance on record in which the general rural rate has exceeded the urban rate.

In the thirty-three great towns (Tables V. and VI.), with an aggregate population estimated at more than ten millions, the annual death-rate last quarter was 25·8 per 1000, the rates in the separate towns ranging from 18·9 in Bradford, 19·6 in Leicester, and 20·5 in Hull, to 28·6 in Norwich, 29·3 in Wolverhampton, and 30·8 in Liverpool. In Registration London the rate was 28·2.

In sixty-seven other large town districts, with an aggregate population of nearly four millions, the death-rate was 24·0 per 1000, or 1·8 per 1000 below the rate in the great towns. In the aggregate of these 100 towns the death-rate was 25·3, while in the remainder of England and Wales it was 24·5.

MORTALITY AT DIFFERENT AGES.—Of the 182,482 deaths registered last quarter, 37,252 were of infants under one year of age, 79,992 of persons aged between one and 60 years, and 65,238 of persons aged 60 years and upwards.

The mortality of infants under one year of age was in the proportion of 169 deaths to 1000 births registered, being 25 per 1000 above the mean proportion in the ten preceding first quarters. The lowest proportions in registration counties were 103 in Rutlandshire, 128 in Bedfordshire, and 131 in Hertfordshire; while the highest were 194 in Worcestershire, 195 in Monmouthshire, and 204 in Staffordshire. In the thirty-three great towns the mean proportion was 177, the proportions ranging from 128 in Croydon, 135 in Sunderland, 143 in Plymouth and in Birmingham, and 146 in West Ham, to 218 in Wolverhampton and in Burnley, 219 in Swansea, and 223 in Derby. In sixty-seven other large town districts the infant mortality averaged 173 per 1000 births, ranging from 89 in Walsley, 102 in Gloucester, and 111 in West Derby, to 258 in Grimsby, 259 in Walsall, and 278 in Macclesfield; while in the remainder of the country the proportion was 163 per 1000.

The mortality of persons aged between one and 60 years was in the proportion of 12·2 deaths annually per 1000 of the estimated number living at these ages, being 0·6 per 1000 above the average rate in the first quarters of 1882–91. In the thirty-three great towns the rate was 20·4 per 1000; the lowest rates being 14·2 in Croydon, 14·9 in Bradford, and 15·4 in Plymouth; while the rates reached 24·4 in Swansea, 24·7 in Wolverhampton, and 27·0 in Liverpool.

Among persons aged 60 years and upwards the mortality was at the rate of 120·6 annually per 1000 of the estimated population at these ages, being 32·9 per 1000 above the average rate in the first quarters of 1882–91. In the thirty-three great towns the rate was 123·9 per 1000; the lowest rates being 82·7 in Derby, 86·3 in Sunderland, and 87·3 in Hull; and the highest 141·0 in West Ham, 152·7 in Brighton, and 158·3 in Portsmouth.

Compared with the respective average rates in the ten next preceding first quarters, the mortality of infants under one year of age showed an excess of 17 per cent., that of persons aged between one and 60 years an excess of 5 per cent., and that of persons aged 60 years and upwards an excess of 38 per cent.

ZYMOTIC DISEASES.—The 182,482 deaths from all causes included—

5202	attributed to whooping-cough,
2769	„ measles,
1361	„ diarrhœa,
1306	„ diphtheria,
1078	„ scarlet fever,
890	„ fever,
76	„ small-pox.

Thus 12,682 deaths were ascribed to these chief zymotic diseases, corresponding to an annual rate of 1·73 per 1000 persons living, the average annual rate in the ten preceding first quarters having been 1·96. Whilst, however, the rate was only 0·54 in Cornwall, 0·55 in Berkshire, and 0·57 in Bedfordshire, it reached 2·39 in South Wales, 2·56 in Staffordshire, and 3·20 in Monmouthshire. In the thirty-three great towns the rate was 2·32, rising, however, to 3·22 in Liverpool, 3·65 in Wolverhampton, and 3·87 in Swansea. In sixty-seven other considerable town districts the rate was 1·78; while in the remaining, and mainly rural, part of England and Wales it was 1·32.

The deaths from *whooping-cough* numbered 5202 or 0·71 annually per 1000 living, the average rate in the ten preceding first quarters having been 0·56. No death from the disease was recorded in Herefordshire or Rutlandshire, but the rate reached 1·27 in Monmouthshire, 1·36 in Staffordshire, and 1·39 in Registration London. In the thirty-three great towns the rate was 1·05, rising, however, to 1·48 in Bolton, 1·54 in Blackburn, and 2·21 in Wolverhampton. In sixty-seven other considerable town districts the rate was 0·74, while in the remainder of the country it was 0·48. Among districts and sub-districts in which this disease seems to have been especially prevalent were Farnham, Mortlake, Chiswick, Chesham, Carlford, Wolstanton, Hanley, Longton, Willenball, Harwich, Colne, Kimberworth, Blaenavon, Caerleon, Newport (Monmouthshire), and Margam.

The 2769 deaths from *measles* corresponded to an annual rate of 0·38 per 1000, the average rate in the ten preceding first quarters having been 0·46. No death from the disease occurred in Berkshire, Buckinghamshire, Bedfordshire, or Cornwall, but the rate reached 0·71 in Durham, 0·72 in Huntingdonshire, and 0·78 in Registration London. In the thirty-three great towns the rate was 0·59; but while no death from the disease was registered in Croydon, Brighton, Oldham, Blackburn, or Hull, the rate was 1·01 in Wolverhampton, 1·15 in Sunderland, 1·17 in Swansea, and 1·68 in Liverpool. In sixty-seven other considerable town districts the rate was 0·30, while in the remainder of England and Wales it was 0·25. Among districts and sub-districts in which the mortality from measles was apparently excessive were St. Mary Extra (South Stoneham), Whitechurch, Duxford, Brixham, Burton-upon-Trent, Tardebigg, Worksop, Ripley, Rossendale, Pontypool, Eglwysilan, Ilanwonno, and Haverfordwest.

The 1361 deaths from *diarrhœa* corresponded to an annual rate of 0·18 per 1000, the average rate in the ten preceding first quarters having been 0·21. The highest rates in registration counties were 0·26 in Northamptonshire and in Nottinghamshire, 0·27 in Lancashire, 0·30 in Shropshire, and 0·32 in Staffordshire. In the thirty-three great towns the rate was 0·21, rising to 0·79 in Blackburn, and 0·85 in Preston; in sixty-seven other considerable town districts it was also 0·21, while in the remainder of England and Wales it was 0·16.

The deaths ascribed to *diphtheria* numbered 1306, being in the proportion of 0·18 annually per 1000 living, a rate slightly exceeding the average in the ten preceding first quarters. The rate did not exceed 0·05 in Wiltshire or Cornwall,

while it was 0·31 in Registration London and in Suffolk, and 0·32 in Essex and in Huntingdonshire. In the thirty-three great towns the rate was 0·20; but, while no death from the disease were registered in Wolverhampton or Blackburn, the rate reached 0·40 in Newcastle-on-Tyne. In sixty-seven other considerable town districts the rate was 0·16; while in the remainder of England and Wales it was 0·17. Among districts and sub-districts in which the mortality from diphtheria appears to have been in excess were Writtle, Prittlewell, Haverhill, Thetford, Llansilin, Tenbury, Formby, Heywood, and Houghton-le-Spring.

The 1078 deaths from *scarlet fever* corresponded to an annual rate of 0·15 per 1000, being exactly half the average rate in the ten preceding first quarters, and less than the rate in any other first quarter on record. No death from this disease was registered in Sussex, Hertfordshire, or Rutlandshire, while the rate reached 0·53 in South Wales and 0·89 in Monmouthshire. In the thirty-three great towns the rate was the same as in the whole country, 0·15; but while no death was recorded in Brighton, Portsmouth, Plymouth, Norwich, or Gateshead, the rate reached 0·71 in Cardiff and 0·74 in Swansea. In sixty-seven other considerable town districts the rate was 0·17, while in the remainder of the country it was 0·14. Among districts and sub-districts in which scarlet fever was especially fatal were North Meols, Culcheth, Shipley, Barmbrough, Tanfield, Tredegar, Mynyddslwyn, and Aberdare.

To *fever*, including typhus, enteric, and simple or ill-defined forms of continued fever, were ascribed 890 deaths, or 0·12 annually per 1000 living, the average rate in the ten preceding first quarters having been 0·21. In registration counties the rate did not reach 0·05 in Berkshire, Oxfordshire, Northamptonshire, Wiltshire, or Gloucestershire; while it was 0·17 in Norfolk, 0·18 in Staffordshire and in Rutlandshire, and 0·22 in Lancashire. In the thirty-three great towns the rate was 0·11, but while it was below 0·05 in Croydon, Brighton, Leicester, Huddersfield, and Hull, it reached 0·27 in Manchester and in Oldham, 0·33 in Blackburn, and 0·40 in Salford. In sixty-seven other considerable town districts the rate was 0·19, while in the remainder of England and Wales it was 0·11. Among sub-districts in which the mortality from fever was excessive were North Worcester, Owston, Ripley, Kimberworth, and Bedlington.

The deaths from *small-pox* were 76, of which 3 occurred in London, 3 in the Metropolitan Asylum Ship at Dartford, and 49 in Dewsbury, 7 in Toxteth Park, and 3 in Oldham registration districts.

The following Table shows the relative mortality from each of the above-mentioned zymotic diseases in England and Wales, in the thirty-three great towns, in sixty-seven other considerable urban districts, and in the remainder of the country:—

ANNUAL DEATH-RATE per 1,000 from ALL CAUSES, and from several ZYMOTIC DISEASES, during the First Quarter of 1892.

	All Causes.	Principal Zymotic Diseases. (Cols.3-9)	Small-pox.	Measles.	Scarlet Fever.	Diphtheria.	Whooping-cough.	Fever.	Diarrhoea.
Cols.	1.	2.	3.	4.	5.	6.	7.	8.	9.
England and Wales -	24·9	1·73	0·01	0·38	0·15	0·18	0·71	0·12	0·18
33 Great Towns -	25·8	2·32	0·01	0·59	0·15	0·20	1·05	0·11	0·21
67 other Town Districts	24·0	1·78	0·01	0·30	0·17	0·16	0·74	0·19	0·21
England and Wales, } less the 100 Towns - }	24·5	1·32	0·01	0·25	0·14	0·17	0·48	0·11	0·16

CERTIFICATION OF CAUSES OF DEATH.—Of the 182,482 deaths in England and Wales, the causes of 168,420, or 92·3 per cent., were duly certified by registered medical practitioners, and of 9122, or 5·0 per cent., by coroners after inquest; while the causes of the remaining 4940, or 2·7 per cent., were not certified, the proportion in the ten preceding first quarters having been 3·5 per cent. While however, only 1·0 per cent. of the deaths last quarter in London, Middlesex, and Wiltshire were uncertified, the per-centage rose to 4·8 in South Wales, 5·1 in Herefordshire, 5·4 in Rutlandshire, and 6·5 in North Wales. In the thirty-three great towns the proportion was 2·0 per cent., varying from 0·0 in Croydon, 0·4 in Plymouth and in Burnley, 0·8 in Birkenhead, and 0·9 in Portsmouth, to 4·8 in West Ham, 5·0 in Hull, and 5·9 in Sheffield.

VIOLENT DEATHS.—To different forms of violence 4760 deaths were referred, corresponding to an annual rate of 0·65 per 1000, which slightly exceeded the average rate in the ten preceding first quarters. In registration counties the rates ranged from 0·18 in Rutlandshire, 0·24 in Westmoreland, and 0·36 in Herefordshire, to 0·80 in London and in Durham, 0·81 in South Wales, 0·83 in Monmouthshire, and 0·88 in Northumberland. In the thirty-three great towns the rate was 0·79, varying from 0·23 in Norwich, 0·30 in Croydon, and 0·31 in Leicester, to 1·07 in Birkenhead, 1·18 in Gateshead, and 1·76 in Liverpool.

INQUESTS.—Inquests were held concerning 9122, or 5·0 per cent. of the total deaths, the mean proportion in the ten preceding first quarters having been 5·3 per cent. In the thirty-three great towns the proportion of inquest cases to total deaths was 6·3 per cent., ranging from 2·3 in Burnley, 2·6 in Preston, and 2·9 in Huddersfield, to 9·3 in Sunderland, 9·5 in Gateshead, and 9·8 in Birkenhead.

DEATHS IN PUBLIC INSTITUTIONS.—Of the total deaths registered in England and Wales, 20,600, or 11·3 per cent., occurred in workhouses, hospitals, and public lunatic asylums, the proportion being the same as the mean in the ten preceding first quarters. In the thirty-three great towns the proportion of deaths in such institutions was 17·3 per cent., the lowest proportions being 4·4 in Burnley, and 5·9 in Swansea and in Gateshead, and the highest 17·1 in Bristol, 20·2 in Manchester, and 22·4 in London.

EDINBURGH, GLASGOW, AND DUBLIN.—The death-rate in Edinburgh was 19·8 per 1000, in Glasgow 25·0, and in Dublin 38·4, against 28·2 in London.

COLONIAL AND FOREIGN CITIES.—A summary of the Weekly Returns with which the Registrar-General is favoured by various local authorities abroad, shows that the deaths last quarter in thirty Colonial and Foreign cities, with an aggregate population of about eighteen millions, were equal to an annual rate of 28·3 per 1000 living.

In the twenty-one European cities the mean death-rate was 26·9 per 1000 living, against 25·8 per 1000 in the thirty-three great English towns. In Paris the rate was 26·7, in Berlin 20·6, and in Vienna 29·0, the rate in London being 28·2. Among the thirty Colonial and Foreign cities the lowest death-rates were 20·6 in Berlin, 22·8 in Hamburg, and 23·0 in Dresden; while the highest were 42·9 in Venice, 44·2 in Madras, 49·6 in Alexandria, and 56·5 in Cairo. *Small-pox* caused 317 deaths in Bombay, 89 in Prague, 46 in Alexandria, and 37 in St. Petersburg. The mortality from *measles* was excessive in Bombay, Brussels, Christiania, St. Petersburg, Vienna, Prague, and Turin; from *scarlet fever* in Stockholm, St. Petersburg, Buda-Pesth, New York, Brooklyn, and Philadelphia; from *diphtheria* in Paris, Copenhagen, Stockholm, in most of the German and Austrian cities, and in New York, Brooklyn, and Philadelphia; from *whooping-cough* in Copenhagen and Christiania; from "*fever*" in the Indian and African cities, in Hamburg, and in Philadelphia; and from "*diarrhœal diseases*" in Paris, Brussels, the Indian, the African, and most of the German and Austrian cities.

PRELIMINARY TABLES.

TABLE I.—**Marriages, Births, and Deaths** registered in **England and Wales** in the Years **1882-92**, and in each Quarter of those Years.

YEAR	1882	1883	1884	1885	1886	1887	1888	1889	1890	1891	1892
Marriages	204,465	206,384	204,301	197,745	196,071	200,518	203,831	213,865	223,028	226,025	—
Births	880,014	890,722	906,760	894,270	903,760	886,331	879,868	885,944	869,937	913,836	—
Deaths	516,654	522,997	530,828	522,760	537,276	530,753	510,971	518,353	562,243	587,696	—

* Furnished by the Chief Cashier of the Bank of England.

† As published by the Comptroller of Corn Returns to the Board of Trade.

‡ These are the average prices at which the best seaborne Newcastle, Sunderland, and Hartlepool coals are put in barge from the collier in the Thames; the difference between these prices and those charged to the consumer represents the cost of distribution and merchant's profit. The figures are derived from returns with which the Registrar-General has been favoured by the Mineral Statistics Department, Home Office.

§ Sunderland and Hartlepool coal only.

^a The Registration or Union Counties consist of groups of Registration Districts, which are generally co-extensive with the Poor Law Union. A District which extends into two or more Geographical Counties is included entirely in that Registration County in which the principal town of the district, or the greater part of the population, is located. The boundaries of Registration or Union Counties therefore differ more or less from the boundaries of Geographical Counties.

^b The averages of Marriages and Births are given only for the Eleven Divisions and for Registration Counties.

^c See page 14, note b.

NOTE.—The Registrars alone must be considered responsible for the accuracy of the figures shown in their Returns, and for the opinions expressed in the foot notes.

REGISTRATION COUNTIES, and REGISTRATION DISTRICTS of ENGLAND; Births and under one year of Age, and of PERSONS aged 60 years and upwards from ALL CAUSES; CROUP, FEVER, DIARRHŒA, CHOLERA, and VIOLENCE, also INQUEST CASES and DEATHS in DIVISIONS, REGISTRATION COUNTIES, REGISTRATION DISTRICTS, and REGISTRATION DISTRICTS of ENGLAND.

II.—SOUTH EASTERN COUNTIES.—REGISTRATION DISTRICTS.

[illegible]

* The Registration Districts, 633 in number, are collections of contiguous Parishes or Places, combined for purposes connected with the Registration of Births, Deaths, and Marriages, and are nearly always identical with the Poor Law Unions of the same names; they are here arranged topographically under the Registration Counties.

are here arranged topographically under the Registration Counties. They are always identical with the Poor Law Unions of the same names; they

* These areas, which were partly revised by the Ordnance Survey Department, are the same as those published in the Census Report of 1881. They do not include space occupied by foreshore or tidal water of rivers and creeks. * See page 14, note b.

II.—SOUTH EASTERN COUNTIES.—REGISTRATION DISTRICTS—continued.

a. The Registration Sub-districts (2119 in number) are sub-divisions of the Registration Districts in which the Births and Deaths are registered by Registrars severally appointed for that purpose. The letter W denotes that the Sub-district contains within its limits a Workhouse belonging to the District or Union; H indicates Hospital or Infirmary; and L Lunatic Asylum.

b. For London, the numbers of Births and Deaths, as well as the details given under "Infants under 1 year of age" and the twelve subsequent headings in this Table, are derived from the Weekly Returns made by the Registrars, and relate to 13 weeks ending 2nd April 1892.

I.—LONDON.—REGISTRATION SUB-DISTRICTS—continued.

* On the 1st January 1892 the sub-districts of Worlington and Lakenheath were united for registration purposes and called Mildenhall.

† Owing to recent changes of boundary the separate averages for the sub-districts of Lowestoft, Belton, and Gorleston cannot be shown. The number bracketed against Lowestoft and Belton is the average for the three sub-districts named.

* On 1st January 1892 the Registration District of Leicester was extended under the provisions of the Leicester Extensions Act, 1891, cap. c., by the addition of parts of the following sub-districts:—Billesdon (402: 1), Wigston (403: 1), Enderby (403: 2), and Rothley (403: 3). The corrected populations of the several districts and sub-districts affected are given in the above Table, but the areas are shown as they existed prior to the change.

a 408: 3.—The 5 deaths from whooping-cough occurred in the parish of Anstey.

METEOROLOGY OF ENGLAND.

REMARKS ON THE WEATHER DURING THE QUARTER ENDING MARCH 31ST, 1892.

By JAMES GLAISHER, Esq., F.R.S., &c.

The weather in January was dry, and for the most part very cold, with frequent N.E. and N.W. winds, and snow, till the 20th; it was mild with strong S.W. wind at the end of the month. The temperature of the air was below its average on nearly every day till the 21st, with severe frost on several nights; from the 22nd, with the exception of two days, the mean temperature was above the average. The atmospheric pressure, with the exception of the 2nd, 3rd, and 4th, was low, particularly so on the 6th, 7th, 8th, and 9th, and 14th, 15th, and 16th days; from the 23rd the readings of the barometer were above their average. The fall of rain was less than the average; snow fell frequently between the 6th and the 20th.

The weather in February was dry, dull, and moderately warm till the 11th, then cold, being exceptionally severe from the 16th to the 20th; then warm for a few days, and cold at the end of the month. The temperature of the air till the 11th was a little above the average; a cold period set in on the 12th, and was particularly severe on the 16th, 17th, 18th, and 19th, when the departures of their mean temperatures below their averages were as large as $10^{\circ} \cdot 7$, $14^{\circ} \cdot 3$, $11^{\circ} \cdot 2$, and $11^{\circ} \cdot 3$ respectively. On the morning of the 17th the temperature was 16° at Blackheath, and very low temperature was general on this morning, and in many cases less than 16° , as at Hereford $15^{\circ} \cdot 2$, Salisbury 15° , Wolverhampton $13^{\circ} \cdot 4$, Cambridge, Barnet, and Halifax 13° , Royston $12^{\circ} \cdot 2$, Hull 12° , Nottingham $9^{\circ} \cdot 7$, Somerleyton $9^{\circ} \cdot 6$, Stonyhurst $8^{\circ} \cdot 1$, and Carlisle $2^{\circ} \cdot 2$, and there is no doubt that at many places in the north the temperature was below zero; whilst in the south the lowest in the month at Guernsey was $28^{\circ} \cdot 1$, at Ventnor $22^{\circ} \cdot 6$, and at Truro; Torquay, Osborne, and Barnstaple it was about 21° . At the Royal Observatory the lowest reading was $18^{\circ} \cdot 8$. The following were the instances back to the year 1841 of minima below 19° in February:—

1889 was $18^{\circ} \cdot 9$	1855 was $11^{\circ} \cdot 1$	1845 was $7^{\circ} \cdot 7$
1888 „ $18^{\circ} \cdot 4$	1847 „ $10^{\circ} \cdot 2$	1841 „ $12^{\circ} \cdot 4$
1865 „ $15^{\circ} \cdot 5$		

The atmospheric pressure was above its average from the 9th to the 14th and on the 26th and 27th, and below on all other days, and particularly so from the 15th to the 21st; the average deficiency of pressure for these seven days was $0 \cdot 6$ inch. The fall of rain was generally less than the average. Snow fell on every day from the 14th to the 20th; on the 19th it fell so heavily in Cornwall and Devonshire that the trains were stopped and the telegraph service was very much deranged; so deep were the drifts in some places that two engines coupled together had to be employed, and were frequently brought to a standstill. There were gales from the E. and N. from the 15th to the 20th, causing casualties and loss of life. At the end of the month vegetation was very backward.

The weather in March was dry throughout, with keen frost and bitter winds during the first half of the month, then milder weather from the 16th to the 19th, then a renewal of the cold weather on the 20th, which continued to the end of the month, excepting the 26th and 27th, which were moderately mild. The temperature of the air till the 15th was constantly below its average, on some days to the amount of 11° and 12° , and low temperatures were general in London and all parts of the country; on the morning of the 9th the temperature at the Royal Observatory was $22^{\circ} \cdot 3$, it was $19^{\circ} \cdot 9$ at Blackheath, at Rugby $12^{\circ} \cdot 0$, at Stonyhurst $12^{\circ} \cdot 6$, at Somerleyton 14° , at Barnet and Halifax 15° , at Salisbury 17° , at Carlisle $18^{\circ} \cdot 4$, at Wolverhampton $18^{\circ} \cdot 7$, at Hull 19° , at Whitechurch $19^{\circ} \cdot 4$, at Royston and Halifax (Public Library) $19^{\circ} \cdot 7$, at Nottingham $20^{\circ} \cdot 2$, at Bradford $21^{\circ} \cdot 2$, at Bath $21^{\circ} \cdot 5$, at Truro and Tottenham $22^{\circ} \cdot 0$, and at Camden Square $22^{\circ} \cdot 3$. The previous instances of low temperature at the Royal Observatory back to 1841 are:—

1890 was $13^{\circ} \cdot 1$	1883 was $20^{\circ} \cdot 6$	1850 was $20^{\circ} \cdot 0$
1889 „ $18^{\circ} \cdot 7$	1853 „ $20^{\circ} \cdot 8$	1847 „ $16^{\circ} \cdot 9$
1887 „ $22^{\circ} \cdot 1$	1852 „ $21^{\circ} \cdot 3$	1845 „ $13^{\circ} \cdot 1$
1886 „ $20^{\circ} \cdot 3$		

From the 16th to the 19th the temperature was mild, and the air in contrast to the preceding cold weather was very pleasant; on the 20th a moderately cold period set in, and the month ended with three very cold days with cold winds. The pressure of the atmosphere was above its average from the 2nd to the 6th, and from the 17th to the 25th, and from the 29th. On the 9th and 10th snowstorms were general all over the country. The fall of rain was small everywhere. The cold days during the first half of this month and at the close, with the keen N.E. winds, have completely kept back all vegetation.

About London the mean daily temperature of the air was generally below its average till January 21st, being particularly so on the 9th, 10th, 12th, 15th, and 16th days, when it was as much as $8^{\circ} \cdot 3$, $9^{\circ} \cdot 6$, $9^{\circ} \cdot 7$, $7^{\circ} \cdot 9$, and $7^{\circ} \cdot 4$ respectively below its average, the mean daily deficiency for the 21 days being $4^{\circ} \cdot 4$; from January 22nd to February 11th it was generally above, being particularly so on the 23rd, 24th, 29th, 30th, and 31st of January, and on the 7th of February, when it was as much as $7^{\circ} \cdot 3$, $8^{\circ} \cdot 2$, $9^{\circ} \cdot 7$, $8^{\circ} \cdot 9$, 8° , and $8^{\circ} \cdot 5$ respectively above its average, the

mean daily excess for the 21 days ending February 11th being $3^{\circ}5$; from February 12th to the 20th it was below, being particularly so on the 16th, 17th, 18th, and 19th, when it was as much as $10^{\circ}7$, $14^{\circ}3$, $11^{\circ}2$, and $11^{\circ}3$ respectively below its average, the mean daily deficiency for the 9 days being $6^{\circ}9$; from February 21st to the 25th it was above, the mean daily excess being $2^{\circ}1$; from February 26th to March 15th it was below, being particularly so from March 2nd to the 14th, the mean daily deficiency for these 13 days being $10^{\circ}6$, and the mean daily deficiency for the 19 days ending March 15th being $8^{\circ}5$; from March 16th to the 19th it was above, the mean daily excess being $3^{\circ}8$; and from March 20th to the 31st it was generally below, being as much as $8^{\circ}3$ and $8^{\circ}7$ below on the 28th and 29th days, respectively, the mean daily deficiency for the 12 days being $3^{\circ}1$.

The mean temperature of the air for January was $36^{\circ}5$, being $0^{\circ}2$ and $1^{\circ}8$ below the average of 121 and 51 years respectively; it was $2^{\circ}4$ higher than in 1891, and $6^{\circ}9$ and $0^{\circ}6$ lower than in 1890 and 1889 respectively.

The mean temperature of the air for February was $38^{\circ}8$, being of the same value as the average of 121 years, and $0^{\circ}6$ below the average of 51 years; it was $0^{\circ}3$, $1^{\circ}3$, and $1^{\circ}8$ higher than in 1891, 1890, and 1889 respectively.

NOTE.—In reading this table it will be borne in mind that the plus sign (+) signifies above the average, and the minus sign (−) signifies below the average.

Average duration of the different directions of the wind referred to eight points of the compass, and duration in days of each direction in each month in the quarter, were as follows:—

Direction of Wind.	JANUARY.			FEBRUARY.			MARCH.		
	1892.	Average.	Departure from Average.	1892.	Average.	Departure from Average.	1892.	Average.	Departure from Average.
N.W.	6	$1\frac{1}{2}$	+ $4\frac{1}{2}$	6	$2\frac{1}{2}$	+ $3\frac{1}{2}$	5	3	+ 2
N.	3	$3\frac{1}{2}$	— $\frac{1}{2}$	4	3	+ 1	4	4	0
N.E.	3	$3\frac{1}{2}$	— $\frac{1}{2}$	5	4	+ 1	12	4	+ 8
E.	1	$\frac{1}{2}$	+ $\frac{1}{2}$	1	2	— 1	3	3	0
S.E.	4	$3\frac{1}{2}$	+ $\frac{1}{2}$	3	$2\frac{1}{2}$	+ $\frac{1}{2}$	2	$2\frac{1}{2}$	— $\frac{1}{2}$
S.	3	$4\frac{1}{2}$	— $1\frac{1}{2}$	3	3	0	1	3	— 2
S.W.	6	$9\frac{1}{2}$	— $3\frac{1}{2}$	6	9	— 3	3	8	— 5
W.	5	$4\frac{1}{2}$	+ $\frac{1}{2}$	1	3	— 2	1	$3\frac{1}{2}$	— $2\frac{1}{2}$

The sign (+) denotes excesses over averages; the numbers affected by this sign in January are N.W., W., S.E., and E.; in February are N.W., N., and N.E.; and in March are N.E. and N.W.

The sign (−) denotes deficiencies below averages; the numbers affected by this sign in January are S.W. and S.; in February are S.W., W., and E.; and in March are S.W., W., and S.

The mean temperature of the air for March was $37^{\circ}\cdot 3$, being $3^{\circ}\cdot 8$ and $4^{\circ}\cdot 2$ below the average of 121 and 51 years respectively; it was $3^{\circ}\cdot 0$, $5^{\circ}\cdot 9$, and $3^{\circ}\cdot 3$ lower than in 1891, 1890, and 1889 respectively; and there were only 13 instances of as low or lower temperature back to the year 1771, viz. :—

In 1883 it was $36^{\circ}\cdot 1$	In 1808 it was $37^{\circ}\cdot 1$	In 1786 it was $34^{\circ}\cdot 2$
„ 1865 „ $36^{\circ}\cdot 6$	„ 1807 „ $37^{\circ}\cdot 0$	„ 1785 „ $33^{\circ}\cdot 9$
„ 1845 „ $35^{\circ}\cdot 2$	„ 1799 „ $37^{\circ}\cdot 2$	„ 1784 „ $36^{\circ}\cdot 2$
„ 1837 „ $35^{\circ}\cdot 8$	„ 1789 „ $34^{\circ}\cdot 4$	„ 1771 „ $34^{\circ}\cdot 7$
„ 1814 „ $35^{\circ}\cdot 1$		

The mean high day temperature of the air for January was $40^{\circ}\cdot 8$, being 2° below the average of 51 years; it was $2^{\circ}\cdot 1$ higher than in 1891, and $7^{\circ}\cdot 7$ and $0^{\circ}\cdot 7$ lower than 1890 and 1889 respectively.

The mean high day temperature of the air for February was $44^{\circ}\cdot 4$, being $0^{\circ}\cdot 9$ below the average of 51 years; it was $1^{\circ}\cdot 9$ lower than in 1891, and $1^{\circ}\cdot 4$ and $1^{\circ}\cdot 4$ higher than in 1890 and 1889 respectively.

The mean high day temperature of the air for March was $45^{\circ}\cdot 1$, being $4^{\circ}\cdot 6$ below the average of 51 years; it was $2^{\circ}\cdot 6$, $6^{\circ}\cdot 4$, and $3^{\circ}\cdot 6$ lower than in 1891, 1890, and 1889 respectively; and there were only six instances of as low or lower temperature back to 1841, viz. :—

1888 it was $44^{\circ}\cdot 4$	1869 it was $44^{\circ}\cdot 8$	1865 it was $44^{\circ}\cdot 0$
1883 „ $44^{\circ}\cdot 1$	1867 „ $44^{\circ}\cdot 5$	1845 „ $42^{\circ}\cdot 4$

The mean low night temperature of the air for January was $31^{\circ}\cdot 6$, being $2^{\circ}\cdot 1$ below the average of 51 years; it was $2^{\circ}\cdot 5$ higher than in 1891, and $6^{\circ}\cdot 6$ and $0^{\circ}\cdot 6$ lower than in 1890 and 1889 respectively.

The mean low night temperature of the air for February was $33^{\circ}\cdot 7$, being $0^{\circ}\cdot 5$ below the average of 51 years; it was $1^{\circ}\cdot 9$, $0^{\circ}\cdot 8$, and 2° higher than in 1891, 1890, and 1889 respectively.

The mean low night temperature of the air for March was $30^{\circ}\cdot 8$, being $4^{\circ}\cdot 2$ below the average of 51 years; it was $3^{\circ}\cdot 5$, 5° , and $2^{\circ}\cdot 6$, lower than in 1891, 1890, and 1889 respectively; and there were only two instances of as low or lower temperature back to the year 1841, viz. :—

1883 it was $29^{\circ}\cdot 3$	1845 it was $30^{\circ}\cdot 8$
---------------------------------	---------------------------------

The mean daily range for January was $9^{\circ}\cdot 2$, being $0^{\circ}\cdot 3$ smaller than the average; in February it was $10^{\circ}\cdot 7$, being $0^{\circ}\cdot 4$ smaller than the average; and in March it was $14^{\circ}\cdot 3$, being $0^{\circ}\cdot 4$ smaller than the average.

The mean temperature of the air for January was $4^{\circ}\cdot 6$ colder than in December; in February it was $2^{\circ}\cdot 3$ warmer than in January; and in March it was $1^{\circ}\cdot 5$ colder than in February.

(From the preceding 51 years' observations the decrease from December to January is $1^{\circ}\cdot 3$, from January to February the increase is $1^{\circ}\cdot 1$, and from February to March the increase is $2^{\circ}\cdot 1$.)

From December to January there is a decrease of temperature at stations south of 51° of $5^{\circ}\cdot 2$; between 51° and 52° of $4^{\circ}\cdot 2$; and at stations north of this parallel of $3^{\circ}\cdot 3$.

From January to February there is an increase at all stations; at stations south of 53° of about $2^{\circ}\cdot 4$; and at stations north of this parallel of $1^{\circ}\cdot 6$.

From February to March there was a decrease at all stations; at those south of 51° of $3^{\circ}\cdot 4$; between 51° and 52° of $2^{\circ}\cdot 4$; between 52° and 53° of $1^{\circ}\cdot 6$; and at stations north of this parallel of $1^{\circ}\cdot 0$.

The mean reading of the barometer, at the height of 159 ft. above the sea level, for the month of January was $29^{\circ}\cdot 687$ ins., being $0^{\circ}\cdot 078$ in. below the average of 51 years; it was $0^{\circ}\cdot 274$ in., $0^{\circ}\cdot 073$ in., and $0^{\circ}\cdot 305$ in. lower than in 1891, 1890, and 1889 respectively.

The mean reading of the barometer for February was $29^{\circ}\cdot 621$ ins., being $0^{\circ}\cdot 187$ in. below the average of 51 years; it was $0^{\circ}\cdot 661$ in., $0^{\circ}\cdot 395$ in., and $0^{\circ}\cdot 097$ in. lower than in 1891, 1890, and 1889 respectively; and there were only eight instances of as low or lower reading back to the year 1841, viz. :—

In 1885 it was $29^{\circ}\cdot 543$ ins.	In 1855 it was $29^{\circ}\cdot 593$ ins.	In 1844 it was $29^{\circ}\cdot 498$ ins.
„ 1879 „ $29^{\circ}\cdot 363$ „	„ 1853 „ $29^{\circ}\cdot 525$ „	„ 1843 „ $29^{\circ}\cdot 473$ „
„ 1866 „ $29^{\circ}\cdot 529$ „	„ 1848 „ $29^{\circ}\cdot 517$ „	

The mean reading of the barometer for March was $29^{\circ}\cdot 842$ ins., being $0^{\circ}\cdot 095$ in. above the average of 51 years; it was $0^{\circ}\cdot 200$ in., $0^{\circ}\cdot 177$ in., and $0^{\circ}\cdot 038$ in. higher than in 1891, 1890, and 1889 respectively.

From December to January there was a decrease of atmospheric pressure at all stations; at those south of 52° of $0^{\circ}\cdot 10$ in.; between 52° and 53° of $0^{\circ}\cdot 08$ in.; and at stations north of this parallel of $0^{\circ}\cdot 04$ in.

From January to February there was a decrease of $0^{\circ}\cdot 11$ in. at stations south of 51° ; between 51° and 53° of about $0^{\circ}\cdot 06$ in.; and at stations north of this parallel of $0^{\circ}\cdot 04$ in.

From February to March there was an increase at all stations; at those south of 52° of $0^{\circ}\cdot 21$ in.; between 52° and 53° of $0^{\circ}\cdot 24$ in.; and at stations north of this parallel of $0^{\circ}\cdot 28$ in.

About London the atmospheric pressure was generally below its average till January 22nd, the mean daily deficiency being 0.21 in.; from January 23rd to the 31st it was above, the mean daily excess being 0.23 in. From February 1st to the 8th it was below, being particularly so on the 2nd and 3rd, when it was as much as 0.67 in. and 0.65 in. respectively below its average, the mean daily deficiency for the eight days being 0.33 in.; from February 9th to the 14th it was above, the mean daily excess being 0.38 in.; from February 15th to March 1st it was generally below, being particularly so on the 18th and 19th of February, when it was as much as 0.80 in. and 0.72 in. respectively below, while on several other days it was as much as $\frac{1}{2}$ an inch below, the mean daily deficiency for the 16 days ending March 1st being 0.35 in.; from March 2nd to the 6th it was above, the mean daily excess being 0.14 in.; from March 7th to the 16th it was below, being particularly so on the 10th and 13th, when it was as much as 0.81 in. and 0.73 in. respectively below, and on several other days it was as much as half an inch below, the mean daily deficiency for the 10 days being 0.48 in.; and from March 17th to the 31st it was generally above, the mean daily excess being 0.23 in.

Thunderstorms occurred in January on the 9th at Torquay.

In February on the 2nd and 4th at Liverpool; and on the 20th at Torquay.

Thunder was heard but lightning was not seen in February on the 19th at Truro; and on the 21st at Torquay.

In March on the 10th at Liverpool.

Lightning was seen but thunder was not heard in January on the 6th at Halifax and Stonyhurst; and on the 9th at Torquay.

In February on the 2nd at Oxford; on the 18th and 19th at Truro; on the 23rd and 25th at Torquay; and on the 26th at Liverpool.

In March on the 9th at Liverpool; and on the 15th and 17th at Halifax.

Solar halos were seen in January on the 28th and 29th at Torquay.

In February on the 2nd at Oxford; on the 5th at Torquay; on the 9th at Oxford; on the 17th at Torquay and Halifax; on the 18th at Torquay; on the 19th at Halifax; on the 20th at Torquay and Liverpool; on the 21st at Torquay; on the 23rd at Liverpool; and on the 28th at Torquay.

In March on the 8th at Torquay and Halifax; on the 12th at Guernsey and Torquay; on the 13th and 20th at Torquay; on the 21st at Torquay, Liverpool, and Halifax; on the 23rd at Liverpool; and on the 27th and 31st at Torquay.

Lunar halos were seen in January on the 7th at Hereford and Halifax; on the 8th at Cambridge; on the 9th at Torquay; on the 10th at Liverpool and Stonyhurst; on the 11th at Liverpool, Halifax, and Stonyhurst; and on the 15th at Hereford.

In February on the 5th at Salisbury; on the 7th at Torquay, Osborne, and Oxford; on the 8th and 9th at Halifax; on the 12th at Hereford; and on the 14th and 15th at Liverpool.

In March on the 7th at Torquay, Salisbury, Bath, Hereford, Cambridge, Halifax, and Leeds; on the 9th at Bath, Hereford, and Halifax; on the 10th at Halifax; on the 12th, 13th, and 14th at Torquay; and on the 31st at Halifax.

Snow fell in January on the 3rd at Wolverhampton and Liverpool; on the 4th at Truro, Torquay, and Llandudno; on the 5th at Truro, Bath, Blackheath, Royal Observatory, Hereford, Halifax, and Hull; on the 6th at Bath, Blackheath, Royal Observatory, Royston, Cambridge, Rugby, Somerleyton, Liverpool, and Halifax; on the 7th, 8th, 9th, and 10th it was a general fall throughout the country; on the 11th at Guernsey, Blackheath, Royal Observatory, Oxford, Royston, Cambridge, and Rugby; on the 13th at Bath, Royal Observatory, Blackheath, Halifax, and Carlisle; on the 14th at Torquay, Rugby, Somerleyton, and in the northern counties; on the 15th at Somerleyton; on the 16th at Salisbury, Hereford, and Wolverhampton; on the 17th at Llandudno, Liverpool, Halifax, Bradford, Leeds, and Stonyhurst; on the 19th at Liverpool, Halifax, Stonyhurst, and Carlisle; and on the 20th at Blackheath, Royal Observatory, Royston, Rugby, and Halifax.

In February on the 1st at Torquay, Bath, and Halifax; on the 2nd at Torquay, Salisbury, Bath, Whitechurch, Blackheath, Royal Observatory, Oxford, Royston, Hereford, Rugby, and in the northern counties; on the 3rd at Whitechurch, Blackheath, Royal Observatory, Oxford, Royston, Nottingham, and Liverpool; on the 4th at Hull; on the 5th at Carlisle; on the 14th at Blackheath, Royal Observatory, Royston, Cambridge, Rugby, and Nottingham; on the 15th at Salisbury and in the midland and northern counties; on the 16th, 17th, 18th, and 19th it was a general fall throughout the country; on the 20th at Torquay, Whitechurch, Blackheath, Royal Observatory, Barnet, Oxford, Royston, Cambridge, Rugby, Nottingham, Halifax, Hull, Bradford, and Carlisle; on the 21st at Halifax, Bradford, and Leeds; and on the 29th at Royston, Cambridge, and Carlisle.

In March on the 1st at Bath, Blackheath, Royal Observatory, Royston, Rugby, and in the northern counties; on the 2nd, 3rd, and 4th it was a general fall throughout the country; on the 5th at Royston, Cambridge, Rugby, Somerleyton, Halifax, and Hull; on the 6th at Torquay, Blackheath, Royal Observatory, Royston, and Somerleyton; on the 7th at Torquay, Halifax, and Hull; on the 8th at Wolverhampton, Llandudno, Halifax, Stonyhurst, and Carlisle; on the 9th, 10th, 11th, and 12th it was a general fall throughout the country; on the 13th at Royston, Hereford, Cambridge, Rugby, Wolverhampton, Llandudno, Liverpool, and Hull; on the 14th at Torquay, Salisbury, Bath, Royston, and in the northern counties; on the 15th at Liverpool, Halifax, Leeds, Stonyhurst, and Carlisle; on the 26th at Carlisle; on the 27th at Hereford,

Rugby, Somerleyton, Wolverhampton, Llandudno, Liverpool, Halifax, Bradford, and Stonyhurst; on the 28th it was a general fall throughout the country; and on the 29th at Blackheath and Royal Observatory.

Hail fell in January on the 1st at Liverpool; on the 3rd at Liverpool and Stonyhurst; on the 4th at Truro; on the 5th at Hereford; on the 6th at Torquay, Osborne, Salisbury, Blackheath, Royal Observatory, Oxford, Rugby, and Liverpool; on the 7th at Truro, Torquay, Liverpool, and Hull; on the 8th at Torquay and Liverpool; on the 9th at Truro and Hull; on the 14th at Truro, Llandudno, and Hull; on the 27th at Truro; and on the 31st at Halifax.

In February on the 1st at Guernsey, Truro, Bath, Whitechurch, Halifax, Hull, and Carlisle; on the 2nd at Bath, Whitechurch, Liverpool, and Halifax; on the 3rd at Osborne and Liverpool; on the 4th at Liverpool; on the 5th at Llandudno, Liverpool, and Carlisle; on the 7th at Truro; on the 8th at Halifax; on the 14th at Whitechurch; on the 15th at Torquay, Osborne, and Hull; on the 16th at Hull; on the 19th at Truro, Torquay, and Hull; on the 20th at Torquay and Hull; on the 21st at Truro; on the 22nd and 25th at Torquay; on the 28th at Halifax, Hull, and Stonyhurst; and on the 29th at Whitechurch, Blackheath, Royal Observatory, Royston, Liverpool, Halifax, Hull, and Leeds.

In March on the 1st at Osborne, Blackheath, Royal Observatory, Royston, Hull, and Stonyhurst; on the 2nd at Hull; on the 8th at Stonyhurst; on the 9th at Truro, Torquay, Osborne, Llandudno, and Liverpool; on the 10th at Truro, Torquay, Osborne, Liverpool, and Hull; on the 11th and 12th at Hull; on the 14th at Truro and Torquay; on the 15th at Torquay; on the 27th at Royston; and on the 28th at Truro.

Fog prevailed in January on the 8th at Cambridge; on the 9th at Royston; on the 10th at Bath and Royston; on the 12th at Cambridge and Rugby; on the 13th, 14th, and 15th at Rugby; on the 16th at Halifax and Hull; on the 17th at Bath; on the 18th at Truro, Torquay, Osborne, Bath, Hereford, and Halifax; on the 19th at Truro, Torquay, Bath, and Hereford; on the 20th at Truro, Bath, Hereford, and Hull; on the 21st at Torquay, Blackheath, Royal Observatory, and Hull; on the 22nd at Torquay, Rugby, and Halifax; on the 23rd at Guernsey, Torquay, Somerleyton, Halifax, and Hull; on the 24th at Guernsey; on the 25th at Somerleyton; on the 26th at Truro, Torquay, and Oxford; on the 30th at Guernsey; and on the 31st at Bath.

In February on the 4th at Torquay; on the 6th at Osborne; on the 7th at Guernsey; on the 12th at Somerleyton; on the 13th at Bath and Hereford; on the 21st at Halifax; on the 22nd at Bath, Cambridge, Wolverhampton, and Halifax; on the 23rd at Bath, Somerleyton, and Halifax; on the 24th at Bath, Royston, Hereford, Cambridge, Wolverhampton, Halifax, and Hull; on the 25th at Torquay, Bath, Whitechurch, Royston, Hereford, Cambridge, Somerleyton, Halifax, and Hull; on the 26th at Torquay, Whitechurch, Royston, Cambridge, Somerleyton, Wolverhampton, Halifax, and Hull; on the 27th at Bath, Wolverhampton, and Halifax; on the 28th at Halifax; and on the 29th at Bath.

In March on the 14th at Cambridge and Rugby; on the 16th at Torquay and Bath; on the 19th at Whitechurch; on the 21st at Blackheath, Royal Observatory, Cambridge, and Wolverhampton; on the 23rd at Osborne; on the 24th at Bath, Royston, Cambridge, Rugby, and Carlisle; on the 25th at Torquay, Bath, Royston, Hereford, and Cambridge; on the 26th at Torquay, Bath, Whitechurch, Blackheath, Royal Observatory, Royston, Hereford, Rugby, and Somerleyton; and on the 27th at Royston and Somerleyton.

MONTHLY METEOROLOGICAL TABLE FOR THE QUARTER ENDING MARCH 31ST, 1892.

The Observations have been reduced to Mean values by Glaisher's Barometrical and Diurnal Range Tables, and the Hygrometrical results have been deduced from the seventh edition of his Hygrometrical Tables.

NAMES OF STATIONS AND OBSERVERS.	Height of Station above Sea Level.	Months.	Pressure of Air in Month.		Temperature of Air in Month.				Mean Temperature.	Vapour.		Mean Reading of Thermometer.	Wind. NAME OF STATION, and
OBSERVERS.

CAMDEN SQUARE (London),
G. J. SYMONS, Esq., F.R.S.,
F. R. Met. Soc.
TOTTENHAM,
T. J. WATSON, Esq., C.E.,
F. R. Met. Soc.
BARNET (Gas Works),
T. H. MARTIN, Esq., C.E.
OXFORD (The Observatory),
E. J. STONE, Esq., M.A., F.R.S.
ROYSTON (Hertfordshire),
H. WORTHAM, Esq., F.R.A.S.,
F. R. Met. Soc.
HEREFORD (St. Michael's Priory),
V. REV. CANON J. A. HOWLETT,
M.A.
CAMBRIDGE (Trinity College),
J. W. L. GLAISHER, Esq., Sc. D.,
F. R. S.
RUGBY (Warwickshire),
The Rectory,
Rev. W. LUCKWELL.
LOWESTOFT (Suffolk),
S. H. MILLER, Esq., F.R.A.S.,
F. R. Met. Soc.
SOMERLEYTON (Suffolk), The
Rectory,
Rev. C. J. STEWARD, F. R. Met. Soc.
WOLVERHAMPTON (Staffordshire),
Wroteley,
E. SIMPSON, Esq.
NOTTINGHAM (Notts),
ARTHUR BROWN, Esq., C.E., and
PHILIP DOBBYER, Esq., M.D.
LILANDFORD (Cambridgeshire),
JAMES NICOL, Esq., M.D.

NAMES OF STATIONS AND OBSERVERS.	Height of Station above Sea Level.	Month.	Pressure of Atmosphere in Month.		Temperature of Air in Month.			Mean Tem- perature.	Vapour.		Mean Tem- perature.	Wind.		Mean Amount of Ozone.	Mean Amount of Cloud.	Number of Days it fell.	Rain.											
			Mean.	Range.	Highest.	Lowest.	Range.		Of all Highest.	Of all Lowest.		Daily Range.	Air.					Elastic Force.	Mean.	In a cubic foot of Air.	Mean Weight of a cubic foot of Air.	Mean Degree of Humid- ity, (Ratio = 100).	Minimum on Rays of Sun.	Maximum on Grams.	Estimated Strength.	Relative Proportion of

The highest temperatures of the air were at Carlisle, 65° 8'; and at Halifax and Leeds, 63° 0'.

The lowest temperatures of the air were at Carlisle, 2° 2'; at Stonhurst, 8° 1'; and at Rugby, 5° 0'.

The greatest ranges of temperature were at Carlisle, 63° 6'; at Rugby, 53° 0'; and at Stonhurst, 52° 2'.

The least ranges of temperature were at Guernsey, 29° 1'; at Torquay, 32° 5'; and at Osborne, 37° 2'.

The greatest number of days of rain were at Nottingham, 58; and at Hull and Stonhurst, 57.

The least number of days of rain were at Oxford, 23; at Osborne, 26; and at Halifax (Public Library), 33.

The greatest falls of rain were at Stonhurst, 8.74 inches; at Truro, 7.77 inches; and at Halifax, 7.18 inches.

The least falls of rain were at Oxford, 1.56 inches; at Rugby, 2.16 inches; and at Whitechurch, 2.80 inches.

QUARTERLY METEOROLOGICAL TABLE for different PARALLELS of LATITUDE.

PARALLELS OF LATITUDE, &c.		Mean Pressure of dry Air reduced to the level of the Sea.										WIND.										RAIN.																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																													
		Mean of all Highest. Mean of all Lowest. Mean Monthly Range of Temperature. Mean Daily Range of Temperature. Mean Temperature of the Air. Mean Temperature of the Dew Point. Mean Elastic Force of Vapour. Mean Weight of Vapour in a cubic foot of Air. Mean additional Weight required for saturation. Mean degree of Humidity. Mean Weight of a cubic foot of Air. Mean Reading of Maximum in Days of Sun. Mean Reading of Minimum on Grass. Mean Estimated Strength.										Relative Proportion of				Mean Amount of Cloud.		Mean Number of Days it fell.		Mean Amount collected.

INDEX OF REGISTRATION DISTRICTS.

The following Index furnishes a reference to the *Number** of each REGISTRATION DISTRICT. In forming the alphabetical arrangement, the principle adopted has been to place compound names in the order in which they are pronounced.

Aberayron, 604.	Blean, 58.	Chorlton, 464.	Evesham, 381.	Hinckley, 404.
Abergavenny, 582.	Bliffeld, 228.	Christchurch, 93.	Exeter, 272.	Hitchin, 133.
Aberystwith, 605.	Blything, 216.	Church Stretton, 346.		Holbeach, 416.
Abingdon, 115.	Bodmin, 294.	Cirencester, 381.		Holbeck, 490.
Aleicester, 397.	Bolton, 461.	Clebury Mortimer, 347.	Falmouth, 298.	Holborn, 13.
Alnwick, 563.	Bootle, 576.	Clitheroe, 473.	Fareham, 90.	Hollingbourn, 51.
Alresford, 105.	Bosmere, 211.	Clun, 345.	Faringdon, 114.	Holsworthy, 238.
Alton, 568.	Boston, 417.	Clutton, 316.	Farnham, 33.	Holyhead, 631.
Alton, 106.	Bourn, 414.	Cockermouth, 574.	Faversham, 59.	Holywell, 617.
Altrincham, 445.	Brackley, 156.	Colchester, 196.	Festiniog, 625.	Honiton, 270.
Alverstoke, 89.	Bradfield, 118.	Congleton, 448.	Flegg, 220.	Hoo, 45.
Amersham, 140.	Bradford-on-Avon, 249.	Conway, 629.	Foleshill, 391.	Horncastle, 421.
Amesbury, 233.	Bradford (Yorks), 497.	Cookham, 121.	Forden (Montgomery), 615.	Horsham, 79.
Amphill, 173.	Braintree, 199.	Corwen, 622.	Fordingbridge, 95.	Houghton-le-Spring, 531.
Andover, 110.	Bramley, 500.	Cosford, 204.	Forehoe, 226.	Howden, 518.
Anglesey, 630.	Brampton, 570.	Coventry, 392.	Freebridge Lynn, 236.	Hoxne, 210.
Ashborne, 438.	Brecknock, 608.	Cranbrook, 52.	Frome, 312.	Huddersfield, 495.
Ashby-de-la-Zouch, 406.	Brentford, 126.	Crediton, 282.	Fulham, 2.	Hull, 521.
Ashton-under-Lyne, 463.	Bridge, 56.	Crickhowell, 609.	Fyde, 477.	Hungerford, 113.
Aston, 387.	Bridgend, 589.	Cricklade, 242.		Hunslet, 498.
Ateham (Shrewsbury), 351.	Bridgnorth, 343.	Croydon, 88.		Huntingdon, 168.
Atherstone, 389.	Bridgwater, 307.	Cuckfield, 75.		
Auckland, 545.	Bridlington, 525.		Gainsborough, 426.	Ipswich, 213.
Axbridge, 315.	Bridport, 268.	Darlington, 542.	Garstang, 478.	Isle of Wight, 91.
Axminster, 269.	Brighton, 77.	Dartford, 42.	Glanford Brigg, 425.	Islington, 9.
Aylesbury, 143.	Bristol, 320.	Daventry, 161.	Glendale, 586.	
Aysgarth, 539.	Brixworth, 162.	Depwade, 230.	Gloucester, 327.	Keighley, 492.
	Bromley, 41.	Derby, 436.	Godstone, 37.	Kendal, 579.
	Bromsgrove, 384.	Devizes, 247.	Goole, 513.	Kensington, 15.
	Bromyard, 341.	Dewsbury, 502.	Gower, 593.	Kettering, 164.
	Buckingham, 146.	Docking, 235.	Grantham, 419.	Keynsham, 318.
	Builth, 607.	Dolgelly, 624.	Gravesend, 43.	Kidderminster, 376.
	Burnley, 472.	Doncaster, 511.	Great Ouseburn, 488.	Kingsbridge, 273.
	Burton-upon-Trent, 367.	Dorchester, 265.	Guildford, 32.	Kingsclere, 111.

QUARTERLY RETURN

MARRIAGES, BIRTHS, AND DEATHS

REGISTERED IN THE DIVISIONS, COUNTIES, AND DISTRICTS OF

ENGLAND;

WITH CERTAIN DETAILED INFORMATION RELATING TO THE DEATHS IN EACH
REGISTRATION SUB-DISTRICT.

By Authority of the Registrar General.

Printed under the Superintendence of Her Majesty's Stationery Office,
AND SOLD BY EYRE AND SPOTTISWOODE, 9, EAST HARDING ST., FETTER LANE, E.C.

No. 174.] **Marriages**—January, February, March, 1892. [Price 9d.
Births and Deaths—April, May, June, 1892.

General Register Office, Somerset House,
28th July, 1892.

The POPULATION of the UNITED KINGDOM in the middle of 1892 is estimated, on the basis of the recent enumerations, at 38,109,329 persons; that of England and Wales at 29,403,346, of Scotland at 4,063,451, and of Ireland at 4,642,532.

In the United Kingdom 293,726 *births* and 173,755 *deaths* were registered in the three months ending 30th June 1892. The natural increase of population was, therefore, 119,971. The registered number of persons married in the quarter ending 31st March 1892 was 114,500.

The birth-rate in the United Kingdom in the second quarter of 1892 was 30·9 and the death-rate 18·3 per 1000. The marriage-rate in the first quarter of 1892 was 12·1 per 1000.

The facts, in detail, concerning Scotland and Ireland are recorded in the Quarterly Returns of the Registrars-General for those parts of the United Kingdom.

ENGLAND.

This Return comprises the BIRTHS and DEATHS registered in the 2116 registration sub-districts of England and Wales during the quarter ending 30th June 1892; and the MARRIAGES in 15,059 churches or chapels, in 10,836 registered places of worship unconnected with the Established Church, and in 633 Superintendent Registrars' Offices, in the three months ending 31st March 1892.

Marriages.

During the three months ending with March last, the marriages of 85,576 persons were registered in England and Wales, giving an annual rate of 11·7 per 1000 of the estimated population. This rate is 2·0 per 1000 below the rate in the first quarter of 1891, and 0·4 per 1000 below the mean rate in the preceding ten first quarters. The lowest rates in registration counties were 4·7 in Rutlandshire, 7·7 in Hertfordshire, and 7·8 in Bedfordshire, while the highest were 13·9 in South Wales, 14·1 in Durham, and 14·3 in Northumberland. In London the rate was 12·3.

Births.

The births registered in the second quarter of 1892 numbered 232,385, being in the proportion of 31·7 annually per 1000 living. This rate is not only 1·3 per 1000 below the mean rate in the preceding ten second quarters, but lower than the rate in the corresponding period of any year on record, with the single exception of 1890. In registration counties the rates varied from 23·9 in Rutlandshire, 25·2 in Sussex, and 26·2 in Surrey, to 36·6 in Staffordshire, 36·7 in South Wales, and 37·3 in Monmouthshire.

In the thirty-three great towns the birth-rate was 32·9 per 1000. The lowest rates were 22·2 in Huddersfield, 26·8 in Brighton, and 28·1 in Croydon; and the highest 37·5 in Gateshead, 37·9 in West Ham, and 39·0 in Sunderland. In sixty-seven other large town districts (Table VII.) the birth-rate was 32·9 per 1000, while in the remainder of the country it was 30·6.

Excess of Births over Deaths, and Emigration.

The *natural increase* of the population of England and Wales, or the excess of births over deaths, which had amounted to 103,207, 91,435, and 67,270 in the second quarters of 1889, 1890, and 1891, was 100,394 last quarter.

It appears from returns issued by the Board of Trade that 122,740 emigrants (including 48,518 foreigners), embarked during the quarter from the various ports of the United Kingdom at which emigration officers are stationed. Distributing proportionally 618 whose nationality was not distinguished, the emigrants of native origin numbered 74,123, and of these 37,306 were English, 7,702 Scotch, and 29,115 Irish. The proportions of emigrants to a million of the estimated population in the several portions of the United Kingdom were 1269 from England, 1895 from Scotland, and 6271 from Ireland. Compared with the mean in the second quarters of the next preceding three years, each of the proportions shows a decline.

Prices and Pauperism.

During the second quarter of the year the average price of wheat was 30s. 11d. per quarter, the prices in the preceding two quarters having been 36s. 8d. and 33s. 8d. The mean wholesale prices of beef and mutton in the London market were 5½d. and 7¾d. per lb. respectively; compared with the prices in the preceding quarter the price of beef showed a decline of ⅓d., and that of mutton of ⅔d. The average price of the best seaborne coal in the London market, put in barge from the collier in the Thames, was 17s. 2d. in the month of June, but, owing to the disorganization of the market in April and May, no estimate of the average price throughout the quarter has been made. The mean price of 2¼l. per cent. Consols was 96l. 16s. 8d., against 95l. 10s. 5d. in the second quarter of 1891. The minimum annual rate per cent. of discount charged at the Bank of England, which had been reduced from 3l. 10s. to 3l. on 21st January, was further reduced to 2l. 10s. on 7th April, and to 2l. on 28th April. The average minimum rate per cent. charged during the quarter was 2·180l.

The average number of paupers (exclusive of lunatics in asylums, and of vagrants) relieved in England and Wales on the last day of each week in the quarter was 668,299, of whom 174,015 received in-door, and 494,284 out-door relief. The proportion of the population in receipt of pauper relief was 22·7 per 1000, against 23·6 and 22·8 in the second quarters of 1890 and 1891.

Meteorology.

Remarks upon the meteorology of the quarter, based on observations at the Royal Observatory, Greenwich, and at various other stations, furnished by Mr. James

Glaisher, F.R.S., will be found, with accompanying Tables, on pages 65-72. The mean reading of the barometer was 29·828 inches, being ·047 of an inch above the mean reading in the corresponding quarters of 51 years; the mean was above the average in each month of the quarter. The mean temperature of the air during the quarter was 53°·4, being 1°·1 above the average in the corresponding quarters of 121 years. The mean was 0°·8 above the average in April, 2°·7 above in May, and 0°·2 below in June. The weather during the quarter was marked by several extreme changes of temperature. The day temperatures in the first eleven days of April were high; a cold period then set in, and on five successive days the temperature was from 9°·3 to 11°·3 below its average; with the exception of four days towards the end of April, the weather remained cold till the end of the first week in May; from 8th May till 11th June it was warm, the excess above the average being as great as 14°·7 on 28th and 16°·0 on 31st May. Another cold period suddenly set in on 12th June, and with the exception of three days the temperature remained below its average till the end of the quarter. At 27 stations of observation the mean temperature during the quarter ranged from 47°·0 at Halifax and 48°·9 at Wolverhampton and Stoneyhurst, to 53°·1 at Camden Square, 53°·4 at the Royal Observatory, and 54°·7 at Carlisle.

The amount of rain measured during the quarter at the Royal Observatory was 5·35 inches, being 0·43 inches below the average in the corresponding periods of 77 years. The fall in April was 0·31 of an inch below, that in May 0·41 of an inch below, while that in June was 0·29 of an inch above, the average. At 27 stations of observation the amounts measured ranged from 2·67 inches at Osborne, 2·74 inches at Salisbury, and 2·80 inches at Whitchurch, to 8·83 inches at Halifax, 10·40 inches at Hull, and 12·43 ins. at Stoneyhurst.

The amount of bright sunshine recorded during the quarter at the Royal Observatory was 588 hours, or 42 per cent. of the total number of hours the sun was above the horizon, the mean proportion in the second quarters of the ten years 1882-91 having been 34 per cent. The sunshine was slightly below the average in May, but showed an excess of 25 per cent. in June, and of no less than 55 per cent. in April, the amount in the last-mentioned month having been higher than in any previous April on record, and 16 hours in excess of the average for May.

Deaths.

The deaths registered during the second quarter of 1892 numbered 131,991, being in the proportion of 18·0 deaths annually per 1000 persons living, and 1·2 per 1000 below the mean rate in the ten preceding second quarters. With three exceptions (in 1888, 1889, and 1890), this rate was lower than the rate in any previous second quarter since civil registration began. In registration counties the rates ranged from 13·9 in Surrey, 14·1 in Middlesex, and 14·2 in Sussex, to 20·3 in South Wales, and 20·7 in Lancashire and in Monmouthshire.

URBAN AND RURAL MORTALITY.—In the registration districts and sub-districts which are taken to represent approximately the urban portion of the country (Table III.), and which contain a population estimated at about nineteen millions, the death-rate last quarter was 18·5 per 1000; while in the remaining and chiefly rural population of about ten and a half millions, it was 17·2 per 1000. These rates were respectively 1·4 and 0·7 below the average rates in the ten preceding second quarters. Out of equal numbers living, the deaths in the urban districts were to those in the rural districts in the proportion of 108 to 100, the ratio in the ten preceding second quarters having been 111 to 100.

In the thirty-three great towns, with an aggregate population estimated at more than ten millions, the annual death-rate last quarter was 19·5 per 1000, the rates in the separate towns ranging from 13·1 in Croydon, 14·0 in Brighton, and 14·6 in Portsmouth, to 22·7 in Oldham, 23·7 in Liverpool, and 24·6 in Manchester. In London the rate was 18·9.

In sixty-seven other large town districts, with an aggregate population of nearly four millions, the death-rate was 17·7 per 1000, or 1·8 per 1000 below the rate in the great towns; in the remainder of England and Wales it was 17·1.

MORTALITY AT DIFFERENT AGES.—Of the 131,991 deaths registered last quarter, 30,100 were of infants under one year of age, 65,693 of persons aged between one and 60 years, and 36,198 of persons aged 60 years and upwards.

The mortality of infants under one year of age was in the proportion of 130 deaths to 1000 births registered, being 3 per 1000 above the mean proportion in the ten preceding second quarters. The lowest proportions in registration counties were 87 in Hertfordshire, 91 in Sussex, and 98 in Oxfordshire and in Westmorland; while the highest were 149 in Lancashire, 150 in Staffordshire, and 154 in Leicestershire. In the thirty-three great towns the mean proportion was 138, the proportions ranging from 89 in Brighton, 103 in Croydon, and 110 in Cardiff, to 182 in Leicester, 185 in Huddersfield, and 191 in Burnley. In sixty-seven other large town districts the infant mortality averaged 137 per 1000 births, ranging from 75 in Southport, 87 in Darlington, and 88 in Gloucester and in Worcester, to 204 in Ystradyfodwg, 225 in Merthyr Tydfil, and 277 in Ashton-under-Lyne; in the remainder of the country the proportion was 121 per 1000.

The mortality of persons aged between one and 60 years was in the proportion of 10·0 deaths annually per 1000 of the estimated number living at these ages, being 0·7 per 1000 below the average rate in the ten preceding second quarters. In the thirty-three great towns the rate was 11·8 per 1000; the lowest rates being 7·5 in Croydon, 7·9 in Norwich, and 8·1 in Brighton, and the highest, 14·7 in Oldham, and 15·5 in Liverpool and in Manchester.

Among persons aged 60 years and upwards the mortality was at the rate of 66·9 annually per 1000 of the estimated population at these ages, being 5·1 per 1000 below the mean rate in the ten preceding second quarters. In the thirty-three great towns the rate was 71·3 per 1000, ranging from 48·1 in Portsmouth, 51·6 in Croydon, and 55·3 in Brighton, to 89·6 in Birmingham, 92·8 in Manchester, and 96·5 in Oldham.

Compared with the respective rates in the ten next preceding second quarters, the mortality of infants showed an excess of 2·4 per cent., while that of persons between one and 60 years of age was 6·5 per cent., and that of persons over 60 years of age 7·1 per cent., below the average.

ZYMOTIC DISEASES.—The 131,991 deaths from all causes included—

4183	attributed to measles,	
3552	„	whooping-cough,
1670	„	diarrhœa,
1315	„	diphtheria,
1223	„	scarlet fever,
787	„	fever,
99	„	small-pox.

Thus 12,829 deaths were ascribed to these zymotic causes, corresponding to an annual rate of 1·75 per 1000 living, the average annual rate in the ten preceding second quarters having been 1·87.

The 4183 deaths ascribed to *measles* corresponded to an annual rate of 0·57 per 1000, the average in the ten preceding second quarters having been 0·52. The rate did not exceed 0·10 in Sussex, Buckinghamshire, Huntingdonshire, Cambridgeshire, Suffolk, Norfolk, Wiltshire, Dorsetshire, Cornwall, Herefordshire, Shropshire, Rutlandshire, or the East Riding, while in Durham it was 0·90, in Warwickshire 1·06, and in the North Riding 1·07. In the 33 great towns the rate was 1·01, but while it was under 0·10 in Plymouth, Cardiff, Swansea, Norwich, Derby, Bolton, Blackburn, Preston, Bradford, Leeds, and Newcastle-upon-Tyne, it was

1·31 in Birkenhead and in Liverpool, 1·40 in Leicester, 1·51 in London, 1·54 in Birmingham, and 2·15 in Halifax. In sixty-seven other considerable town districts the rate was 0·50, while in the rest of England and Wales, after deduction of these 100 towns, the rate was only 0·29. Among districts and sub-districts in which the mortality from measles appears to have been excessive were Bexley, Whitechurch (Hants), Chiswick, Ensham, Witney, Grays, East Stonehouse, Loughborough, Horsley, Ripley, Middlesbrough, Ormesby, Consett, Maryport, and Merthyr Tydfil.

The 3552 deaths ascribed to *whooping-cough* corresponded to an annual mortality of 0·48 per 1000, the average rate in the ten preceding second quarters having been 0·50. In the registration counties the rate varied from 0·00 in Rutlandshire, 0·06 in Devonshire, and 0·11 in Sussex, in Norfolk, and in Hereford, to 0·73 in Essex and in the East Riding, and 1·02 in Staffordshire. In the 33 great towns the rate was 0·66, rising, however, to 1·24 in Bolton, 1·25 in Wolverhampton and in Preston, 1·40 in Salford, and 1·84 in Sunderland. In sixty-seven other considerable town districts the rate was 0·55, while in the rest of England and Wales it was only 0·35. Among districts and sub-districts in which whooping-cough appears to have been especially prevalent were Barking Town, Swanage, Burslem, Shelton, Willenhall, Oldbury, West Bromwich South-west, and Hazelgrove.

The deaths ascribed to *diarrhœa* were 1670, or 0·23 annually per 1000 living, the average rate in the ten preceding second quarters having been 0·25. The only registration counties in which the rate exceeded 0·30 were Hertfordshire 0·32, Worcestershire 0·36, and Staffordshire 0·37. In the thirty-three great towns the rate was 0·29, the highest rates being 0·51 in Plymouth and in Salford, 0·59 in Preston, and 0·68 in Burnley. In sixty-seven other large town districts the rate was 0·27, while in the remainder of England and Wales, after subtracting these 100 towns, the rate was 0·18.

To *diphtheria* 1315 deaths were ascribed, corresponding to an annual mortality of 0·18 per 1000, the average rate in the ten preceding second quarters having been 0·13. No death from this disease was registered in Rutlandshire, and only one each in Northamptonshire and in Westmorland, while the highest county rates were 0·26 in Bedfordshire and in Essex, 0·28 in Suffolk, and 0·32 in Huntingdonshire. In the thirty-three great towns the rate was 0·25, but while no death from this disease was registered either in Huddersfield or in Gateshead, and only one each in Brighton, Plymouth, Blackburn, Burnley, Halifax, and Hull, the deaths in London were 437, and the rate 0·41 per 1000. In sixty-seven other considerable town districts the rate was 0·12, while in the remainder of the country it was 0·15. Among districts and sub-districts, diphtheria appears to have been excessive in Isfield, Prittlewell, Bradwell, Haverhill, South Hamlet, Easington, and Houghton-le-Spring.

The 1223 deaths from *scarlet fever* corresponded to an annual rate of 0·17 per 1000, the average rate for the ten preceding second quarters having been 0·24. No death from this disease was recorded either in Rutlandshire or in Westmorland, and only one each in Buckinghamshire, Oxfordshire, Huntingdonshire, and Suffolk, while in Somersetshire the rate was 0·25 per 1000, in South Wales 0·49, and in Monmouthshire 0·61. In the thirty-three great towns the rate was 0·22; but while no death was ascribed to this disease in Wolverhampton or in Norwich, and only one each in Brighton and in Burnley, the rate was 0·38 per 1000 in Manchester, 0·41 in Gateshead, 0·42 in Oldham, 0·59 in Preston, and 0·85 in Cardiff. In sixty-seven other large town districts the rate was 0·17, while in the remainder of England and Wales it was 0·13. Among sub-districts in which the mortality from scarlet fever appears to have been excessive were Warrington, Gomersal, Mynyddislwyn, and Aberdare.

The 787 deaths from "*fever*," including typhus, enteric fever, and simple or ill-defined forms of continued fever, corresponded to an annual rate of 0·11 per 1000 living, the average rate for the ten preceding second quarters having been 0·18. No death was registered under this heading in Oxfordshire or in Rutlandshire, and only one each in Hertfordshire, Dorsetshire, Herefordshire, and

Westmorland, while the only county in which the general average of the ten preceding quarters, 0·18, was exceeded was Norfolk, where the rate was 0·25. In the thirty-three great towns the rate was 0·11, being no higher than in the country at large; but while no death under this heading was registered in Derby, and only one each in Croydon, Bolton, Huddersfield, Halifax, Bradford, and Gateshead, the rate in Norwich was 0·31, in Preston 0·33, and in Wolverhampton 0·34 per 1000. In sixty-seven other large town districts the rate was 0·14, and higher than in the thirty-three great towns, while in the remainder of England and Wales it was 0·10. The mortality from fever appears to have been excessive in Richmond (Surrey), Framlingham, King's Lynn, Walton-le-Dale, Hamsterley, and Middleton sub-districts.

The deaths from *small-pox* numbered 99. Of these, 24 occurred either in London or in the hospital ship for the reception of Londoners, and 7 others in the neighbouring counties of Surrey and Kent; while of the remainder 46 occurred in the West Riding, including 29 in the district of Dewsbury.

The following Table shows the relative mortality from each of the above-mentioned zymotic diseases in England and Wales, in the thirty-three great towns, in sixty-seven other considerable town districts, and in the remainder of the country:—

ANNUAL DEATH-RATE per 1,000 from ALL CAUSES, and from several ZYMOTIC DISEASES, during the Second Quarter of 1892.

	All Causes.	Principal Zymotic Diseases. (Cols.3-9)	Small-pox.	Measles.	Scarlet Fever.	Diphtheria.	Whooping-cough.	Fever.	Diarrhoea.

WATERING PLACES AND SUMMER RESORTS.—As usual in the return for the second quarter the deaths from all causes, and from each of the more important zymotic diseases, in several of our chief watering-places, or in the districts which most nearly correspond to them, are shown in Table VIII. For purposes of comparison, the populations according to the recent census enumeration are also given.

CERTIFICATION OF CAUSES OF DEATH.—Of the 131,991 deaths in England and Wales, the causes of 120,945, or 91·7 per cent., were duly certified by registered medical practitioners, and of 7587, or 5·7 per cent., by coroners after inquest; while the causes of the remaining 3459, or 2·6 per cent., were not certified, the proportion in the ten preceding second quarters having been 3·3 per cent. While however the proportion was less than 1·0 per cent. in London, Surrey, Middlesex, and Wiltshire, it rose to 4·4 in Kent, 4·9 in Huntingdonshire, 5·5 in Westmorland, and 5·6 in North Wales. In the thirty-three great towns the proportion was 1·9 per cent., varying from 0·0 in Croydon and in Burnley, 0·5 in Portsmouth, and 0·6 in Birkenhead, to 4·7 in Birmingham, and 5·3 in Preston and in Halifax.

VIOLENT DEATHS.—To different forms of violence 4520 deaths were referred, corresponding to an annual rate of 0·62 per 1000, which is equal to the mean rate in the ten preceding second quarters. In registration counties the rates ranged

from 0·18 in Rutlandshire, 0·21 in Herefordshire, and 0·22 in Bedfordshire, to 0·80 in Berkshire, 0·83 in South Wales, and 0·93 in Monmouthshire. In the thirty-three great towns the rate was 0·74, varying from 0·31 in Norwich, 0·34 in Croydon, and 0·40 in Burnley and in Preston, to 0·96 in Wolverhampton and in Salford, 1·27 in Cardiff, and 1·37 in Liverpool.

INQUESTS.—Inquests were held concerning 7587, or 5·7 per cent., of the total deaths, the mean proportion in the ten preceding second quarters having been 5·4 per cent. In the thirty-three great towns the proportion of inquest cases to total deaths was 6·9 per cent., ranging from 2·3 in Preston, 2·8 in Burnley, and 2·9 in Huddersfield, to 8·6 in Croydon, 9·3 in Cardiff, and 10·0 in Birkenhead.

DEATHS IN PUBLIC INSTITUTIONS.—Of the total deaths registered in England and Wales, 16,241, or 12·3 per cent., occurred in workhouses, hospitals, and public lunatic asylums, the proportion in the ten preceding second quarters having been 11·2 per cent. In the thirty-three great towns the proportion of deaths in such institutions was 19·1 per cent., the lowest proportions being 5·0 in Gateshead, 6·4 in Swansea, and 7·8 in Burnley, and the highest 18·9 in Birmingham, 19·7 in Brighton, and 26·9 in London.

EDINBURGH, GLASGOW, AND DUBLIN.—The death-rate in Edinburgh was 17·8, in Glasgow 24·4, and in Dublin 31·3, against 18·9 in London.

COLONIAL AND FOREIGN CITIES.—A summary of the Weekly Returns with which the Registrar-General is favoured by various local authorities abroad, shows that the deaths last quarter in thirty Colonial and Foreign cities, with an aggregate population of about eighteen and a half millions, were equal to an annual rate of 24·8 per 1000 living.

In the twenty-one European cities the mean death-rate was 23·4 per 1000 living, against 19·5 per 1000 in the thirty-three great English towns. In Paris the rate was 22·4, in Berlin 19·6, and in Vienna 25·9, the rate in London being 18·9. Among the thirty Colonial and Foreign cities the lowest death-rates were 17·1 in Christiania, 19·1 in Rome, and 19·6 in Berlin; while the highest were 38·1 in Alexandria, 43·8 in Cairo, and 42·1 in Madras. *Small-pox* caused 212 deaths in Bombay, 111 in Prague, 63 in Alexandria, 29 in Cairo, 26 in New York, and 21 in St. Petersburg. The mortality from *measles* was proportionally highest in Bombay, Copenhagen, St. Petersburg, and Hamburg; from *scarlet fever* in Stockholm, Buda-Pesth, New York, Brooklyn, and Philadelphia; and from *whooping-cough* in Amsterdam, Copenhagen, Christiania, and Turin. The mortality from *diphtheria* was excessive in Paris, Copenhagen, and Stockholm, in the German and Austrian cities, and in the American cities, with the exception of New Orleans; from "*fever*" in the Indian and African cities, and in St. Petersburg, Rome, and New Orleans; and from *diarrheal diseases* in Paris, Stockholm, St. Petersburg, Berlin, and in the Indian, African, and most of the German and Austrian cities.

* Furnished by the Chief Cashier of the Bank of England.

† As published by the Comptroller of Corn Returns to the Board of Trade.

‡ These are the average prices at which the best seaborne Newcastle, Sunderland, and Hartlepool coals are put in barge from the collier in the Thames; the difference between these prices and those charged to the consumer represents the cost of distribution and merchant's profit. The figures are derived from returns with which the Registrar-General has been favoured by the Mineral Statistics Department, Home Office.

§ Sunderland and Hartlepool coal only.

¶ For Sunderland and Hartlepool coal during the month of June only.

TABLE V.—33 Great Towns. —Population; Births, Deaths, and Meteorology in the 13 Weeks ending 2nd July 1892.

^a The Registration or Union Counties consist of groups of Registration Districts, which are generally co-extensive with the Poor Law Unions. A District which extends into two or more Geographical Counties is included entirely in that Registration County in which the more or less of the boundaries of Geographical Counties.

^b The averages of Marriages and Births are given only for the Eleven Divisions and for Registration Counties.

^c See page 14, note b.

^d NOTE.—The Registrars alone must be considered responsible for the accuracy of the figures shown in their Returns, and for the opinions expressed in the foot notes.

REGISTRATION COUNTIES, and REGISTRATION DISTRICTS of ENGLAND; Births and Deaths under one year of Age, and of PERSONS aged 60 years and upwards from ALL CAUSES; TYPHOUS FEVER, CHOLERA, and VIOLENCE, also INQUEST CASES and DEATHS in REGISTRATION COUNTIES, REGISTRATION DISTRICTS, and REGISTRATION DISTRICTS of ENGLAND.

Registration Counties.	Enumerated Population, 1891 (unrevised).	Mar- riages	Births	Deaths	The DEATHS in the Quarter are stated by the Registrars to include															
					Deaths of Infants under 1 Year of Age.	Persons aged 60 Years & upwards.	Deaths from										Inquest Cases. Deaths in Public Insti- tutions.			
							Small-pox.	Measles.	Scarlet Fever.	Diphtheria.	Whooping-cough.	Fever.	Diarrhoea.	Cholera.	Violence.

^a The Registration Sub-districts (2116 in number) are sub-divisions of the Registration Districts in which the Births and Deaths are registered by Registrars severally appointed for that purpose. The letter W denotes that the Sub-district contains within its limits a Workhouse belonging to the District or Union; w indicates Workhouse Establishment receiving inmates from other Districts than the one in which it stands; H indicates Hospital or Infirmary; and L Lunatic Asylum.

^b For London, the numbers of Births and Deaths, as well as the details given under "Infants under 1 year of age" and the twelve subsequent headings in this Table, are derived from the Weekly Returns made by the Registrars, and relate to 13 weeks ending 2nd July 1892.

* On the 1st January 1892 the sub-districts of Worlington and Lakenheath were united for registration purposes and called Mildenhall.
 † Owing to recent changes of boundary the separate averages for the sub-districts of Lowestoft, Belton, and Gorleston cannot be shown.
 The number bracketed against Lowestoft and Belton is the average for the three sub-districts named.
 * 207 : 1.—Of the 4 deaths from diphtheria, 3 occurred in the parish of Lakenheath.

* On 1st January 1892 the Registration District of Leicester was extended under the provisions of the Leicester Extensions Act, 1891, cap. c., by the addition of parts of the following sub-districts:—Billesdon (402: 1), Wigston (403: 1), Enderby (406: 2), and Rothley (403: 3). The corrected populations of the several districts and sub-districts affected are given in the above Table, but the areas are shown as they existed prior to the change.

* 407: 1.—Of the 17 deaths from measles, 15 occurred in Loughborough Urban Sanitary District.

METEOROLOGY OF ENGLAND.

REMARKS ON THE WEATHER DURING THE QUARTER ENDING JUNE 30TH, 1892.

By JAMES GLAISHER, Esq., F.R.S., &c.

The weather in April was dry, generally warm by day, and cold at night. The temperature of the air was above its average till the 11th, particularly so on the 4th, 5th, 6th, and 7th; on the 4th and 5th the high day temperature exceeded 70° at some stations, a very high value for April. A sudden change to cold set in on the 12th, and continued to the 20th, the mean temperature was as much as $9^{\circ}\cdot 3$, $10^{\circ}\cdot 1$, $10^{\circ}\cdot 1$, $11^{\circ}\cdot 3$, and $11^{\circ}\cdot 0$ below on the 13th, 14th, 15th, 16th, and 17th, respectively; and snow fell on some of these days at several stations; it was above the average from the 21st to the 24th, and then below to the end of the month. The atmospheric pressure was above its average till the 5th, and from the 18th to the 24th; and below it on all other days. The fall of rain was small. The N. and E. winds were prevalent. At extreme southern stations, this month was distinguished by being fine and sunny, and at extreme northern stations by an absence of sun and with much frost.

The weather in May was somewhat changeable, being very cold at the beginning, then moderately warm and hot at the end; it was dry till towards the end, when some rain fell. The temperature of the air was below its average till the 7th, particularly so on the 5th and 6th, when it was $9^{\circ}\cdot 7$ and $9^{\circ}\cdot 3$, respectively, below. From the 8th to the end of the month the temperature was above the average, and particularly so from the 25th, when the departures were $11^{\circ}\cdot 4$, $7^{\circ}\cdot 2$, $10^{\circ}\cdot 4$, $14^{\circ}\cdot 7$, $3^{\circ}\cdot 9$, $7^{\circ}\cdot 9$, and $16^{\circ}\cdot 0$ from the average. On the 31st the high day temperature exceeded 80° at all stations between Whitechurch and Rugby; on this day there was a severe thunderstorm, which did damage in many places. The atmospheric pressure was generally above its average from the 5th to the 23rd, and on the 29th and 30th, and below on other days. The fall of rain was below the average at southern stations, but was generally above at midland and northern stations.

The weather in June was variable, but on the whole was pleasant. The temperature of the air was above its average till the 11th; on the 10th, it was as much as $10^{\circ}\cdot 4$ in excess; on the 12th, a sudden cold set in; and on the 14th, the mean daily temperature was as much as $10^{\circ}\cdot 4$ below the average. On the 10th, at Blackheath, the temperature was $85^{\circ}\cdot 7$, and on the morning of the 15th, it was 38° , being $47^{\circ}\cdot 7$ of lower temperature, this great change was larger in some places; the temperature continued below the average till the end of the month, with the exception of the three days the 26th, 27th, and 28th. The atmospheric pressure was below till the 3rd, and generally from the 16th. The fall of rain was generally above the average. On June 1st, and again on June 28th thunderstorms were general over England, with heavy falls of rain at some places; at some stations the fall of rain on the 28th exceeded 2 inches. In consequence of the dry spring, the hay harvest is very light.

About London the mean daily temperature of the air was above its average till April 11th, being particularly so on the 4th, 5th, and 6th, when it was as much as $8^{\circ}\cdot 2$, $10^{\circ}\cdot 9$, and $8^{\circ}\cdot 3$, respectively, above its average; the mean daily excess for the 11 days being $4^{\circ}\cdot 8$; from April 12th to the 20th it was below, being particularly so from the 13th to the 17th; the mean daily deficiency for the nine days ending April 20th being $8^{\circ}\cdot 6$; from April 21st to the 24th, it was above, the mean daily excess being $6^{\circ}\cdot 0$; from April 25th to May 7th, it was below, being on several days as much as 9° and $9^{\circ}\cdot 3$ below, the mean daily deficiency for the 13 days being $6^{\circ}\cdot 7$; from May 8th to June 11th it was generally above, being particularly so on the 25th, 27th, 28th, and 31st of May, and on the 10th of June, when it was as much as $11^{\circ}\cdot 4$, $10^{\circ}\cdot 4$, $14^{\circ}\cdot 7$, $16^{\circ}\cdot 0$, and $10^{\circ}\cdot 4$ respectively above its average; the mean daily excess for the 35 days ending June 11th, being $4^{\circ}\cdot 2$; from June 12th to the 25th, it was generally below, being as much as $9^{\circ}\cdot 5$, $10^{\circ}\cdot 4$, $9^{\circ}\cdot 4$, and $10^{\circ}\cdot 3$ respectively, below on the 13th, 14th, 18th, and 23rd days, the mean daily deficiency for the 14 days being $5^{\circ}\cdot 5$; from June 26th to the 28th it was above, the mean daily excess being $5^{\circ}\cdot 5$; and on the two last days it was below, the mean daily deficiency being $3^{\circ}\cdot 7$.

The mean temperature of the air for April was $46^{\circ}\cdot 9$, being $0^{\circ}\cdot 8$ and $0^{\circ}\cdot 1$ above the average of 121 and 51 years respectively; it was $2^{\circ}\cdot 7$, $1^{\circ}\cdot 3$, and $1^{\circ}\cdot 2$ higher than in 1891, 1890, and 1889 respectively.

The mean temperature of the air for May was $55^{\circ}\cdot 2$, being $2^{\circ}\cdot 7$ and $2^{\circ}\cdot 6$ above the average of 121 and 51 years respectively; it was $4^{\circ}\cdot 9$ and $0^{\circ}\cdot 4$ higher than in 1891 and 1890 respectively; and $1^{\circ}\cdot 3$ lower than in 1889.

The mean temperature of the air for June was $58^{\circ}\cdot 1$, being $0^{\circ}\cdot 2$ and $0^{\circ}\cdot 9$ below the average of 121 and 51 years respectively; it was $2^{\circ}\cdot 3$ lower than in 1891; of the same value as in 1890; and $3^{\circ}\cdot 3$ lower than in 1889.

The mean high day temperature of the air for April was $59^{\circ}\cdot 0$, being $1^{\circ}\cdot 8$ above the average of 51 years; it was $5^{\circ}\cdot 4$, $4^{\circ}\cdot 0$, and $4^{\circ}\cdot 3$ higher than in 1891, 1890, and 1889 respectively; and there were only eight instances of as high or higher temperature back to the year 1841, viz. :—

In 1874 it was $61^{\circ}\cdot 5$
 „ 1872 „ $59^{\circ}\cdot 3$
 „ 1870 „ $62^{\circ}\cdot 0$

In 1869 it was $61^{\circ}\cdot 6$
 „ 1865 „ $66^{\circ}\cdot 3$
 „ 1863 „ $61^{\circ}\cdot 2$

In 1854 it was $61^{\circ}\cdot 9$
 „ 1844 „ $63^{\circ}\cdot 6$

The mean high day temperature of the air for May was $67^{\circ}\cdot 0$, being $2^{\circ}\cdot 8$ above the average of 51 years; it was $5^{\circ}\cdot 6$ and $0^{\circ}\cdot 7$ higher than in 1891 and 1890 respectively, and $0^{\circ}\cdot 2$ lower than in 1889.

The mean high day temperature of the air for June was $70^{\circ}\cdot 5$, being $0^{\circ}\cdot 4$ below the average of 51 years; it was $1^{\circ}\cdot 7$ lower than in 1891, $1^{\circ}\cdot 3$ higher than in 1890, and $2^{\circ}\cdot 4$ lower than in 1889.

The mean low night temperature of the air for April was $36^{\circ}\cdot 0$, being $2^{\circ}\cdot 9$ below the average of 51 years; it was $0^{\circ}\cdot 2$, $1^{\circ}\cdot 8$, and $2^{\circ}\cdot 9$ lower than in 1891, 1890, and 1889 respectively; and there were only four instances of as low or lower temperature back to the year 1841, viz. :—

1887 it was $35^{\circ}\cdot 3$
1861 „ $36^{\circ}\cdot 0$

1860 it was $35^{\circ}\cdot 6$
1852 „ $34^{\circ}\cdot 2$

The mean low night temperature of the air for May was $43^{\circ}\cdot 9$, being $0^{\circ}\cdot 1$ above the average of 51 years; it was $2^{\circ}\cdot 2$ higher than in 1891, and $0^{\circ}\cdot 5$ and $4^{\circ}\cdot 0$ lower than in 1890 and 1889 respectively.

NOTE.—In reading this table it will be borne in mind that the plus sign (+) signifies above the average, and the minus sign (−) signifies below the average.

Average duration of the different directions of the wind referred to eight points of the compass, and duration in days of each direction in each month in the quarter, were as follows :—

Direction of Wind.	APRIL.			MAY.			JUNE.		
	1892.	Average.	Departure from Average.	1892.	Average.	Departure from Average.	1892.	Average.	Departure from Average.
	d.	d.	d.	d.	d.	d.	d.	d.	d.
N.W.	5	4 $\frac{1}{2}$	+ $\frac{1}{2}$	2	1 $\frac{1}{2}$	+ $\frac{1}{2}$	4	2 $\frac{1}{2}$	+ $\frac{1}{2}$
N.	3	3	0	3	4 $\frac{1}{2}$	- $\frac{1}{2}$	2	3 $\frac{1}{2}$	- $\frac{1}{2}$
N.E.	12	3 $\frac{1}{2}$	+ 8 $\frac{1}{2}$	6	7 $\frac{1}{2}$	- $\frac{1}{2}$	5	3 $\frac{1}{2}$	+ $\frac{1}{2}$
E.	2	2 $\frac{1}{2}$	- $\frac{1}{2}$	1	2 $\frac{1}{2}$	- $\frac{1}{2}$	1	2 $\frac{1}{2}$	- $\frac{1}{2}$
S.E.	1	3 $\frac{1}{2}$	- $\frac{1}{2}$	5	1 $\frac{1}{2}$	+ 3 $\frac{1}{2}$	1	1 $\frac{1}{2}$	- $\frac{1}{2}$
S.	1	2 $\frac{1}{2}$	- $\frac{1}{2}$	2	2 $\frac{1}{2}$	- $\frac{1}{2}$	3	2 $\frac{1}{2}$	- $\frac{1}{2}$
S.W.	4	6 $\frac{1}{2}$	- 2 $\frac{1}{2}$	10	8 $\frac{1}{2}$	+ 1 $\frac{1}{2}$	11	10	+ 1
W.	2	4	- 2	2	2 $\frac{1}{2}$	- $\frac{1}{2}$	3	4	- 1

The sign (+) denotes excesses over averages; the largest numbers affected by this sign in April are N.E. and N.W.; in May are S.E. and S.W.; and in June are N.W., N.E., and S.W.

The sign (−) denotes deficiencies below averages; the largest numbers affected by this sign in April are S.E., S.W. and W.; in May are N., N.E., and E.; and in June are N., E., and W.

The mean low night temperature of the air for June was $47^{\circ}9$, being $2^{\circ}0$ below the average of 51 years; it was $3^{\circ}4$, $1^{\circ}7$, and $3^{\circ}8$ lower than in 1891, 1890, and 1889 respectively; and there were only four instances of as low or lower temperature back to the year 1841, viz. :—

1886 it was $47^{\circ}9$

1871 „ $47^{\circ}9$

1869 it was $46^{\circ}0$

1855 „ $45^{\circ}7$

The mean daily range for April was 23° , being $4^{\circ}7$ larger than the average; in May it was $23^{\circ}1$, being $2^{\circ}7$ larger than the average; and in June it was $22^{\circ}6$, being $1^{\circ}6$ larger than the average.

The mean temperature of the air for April was $9^{\circ}6$ warmer than in March; in May it was $8^{\circ}3$ warmer than in April; and in June it was $2^{\circ}9$ warmer than in May.

(From the preceding 51 years' observations the increase from March to April is $5^{\circ}3$, from April to May the increase is $5^{\circ}8$, and from May to June the increase is $6^{\circ}4$.)

From March to April there is an increase at stations south of 51° of $7^{\circ}5$; between 51° and 52° of $9^{\circ}1$; between 52° and 53° of $7^{\circ}9$; and at stations north of this parallel of $6^{\circ}4$.

From April to May there is an increase at stations south of 51° of $5^{\circ}8$; between 51° and 52° of $7^{\circ}6$; between 52° and 53° of $8^{\circ}0$; and at stations north of this parallel of $7^{\circ}5$.

From May to June there is an increase at all stations of about $3^{\circ}2$.

The mean reading of the barometer, at the height of 159 ft. above the sea level, for the month of April was $29^{\circ}828$ ins., being $0^{\circ}086$ in. above the average of 51 years; it was $0^{\circ}035$ in., $0^{\circ}184$ in., and $0^{\circ}269$ in. higher than in 1891, 1890, and 1889 respectively.

The mean reading of the barometer for May was $29^{\circ}821$ ins., being $0^{\circ}039$ in. above the average of 51 years; it was $0^{\circ}214$ in., $0^{\circ}155$ in., and $0^{\circ}159$ in. higher than in 1891, 1890, and 1889 respectively.

The mean reading of the barometer for June was $29^{\circ}828$ ins., being $0^{\circ}017$ in. above the average of 51 years; it was $0^{\circ}013$ in. lower than in 1891, $0^{\circ}004$ in. higher than in 1890, and $0^{\circ}026$ in. lower than in 1889.

From March to April there was a decrease of atmospheric pressure at all stations; at those south of 52° of $0^{\circ}01$ in.; and at stations north of this parallel of $0^{\circ}02$ in.

From April to May the atmospheric pressure was about the same as in April at stations south of 51° ; there was a decrease of about $0^{\circ}02$ in. at stations between 51° and 53° ; and at stations north of this parallel a decrease of $0^{\circ}05$ in.

From May to June there was an increase of $0^{\circ}02$ in. at those south of 52° ; between 52° and 53° it was nearly the same as in May; and at stations north of this parallel an increase of $0^{\circ}01$ in.

About London the atmospheric pressure was above its average till April 5th, the mean daily excess being $0^{\circ}23$ in.; from April 6th to the 17th it was generally below, the mean daily deficiency being $0^{\circ}12$ in. From April 18th to the 24th it was above, the mean daily excess being $0^{\circ}32$ in.; from April 25th to May 4th it was generally below, the mean daily deficiency being $0^{\circ}11$ in.; from May 5th to the 23rd it was generally above, the mean daily excess being $0^{\circ}13$ in.; from May 24th to the 28th it was below, the mean daily deficiency being $0^{\circ}14$ in.; from May 29th to June 15 it was generally above, the mean daily excess for these 18 days being $0^{\circ}05$ in.; and from June 16th to the 30th it was generally below, the mean daily deficiency being $0^{\circ}04$ in.

Thunderstorms occurred in April on the 6th at Liverpool; on the 14th at Guernsey; and on the 25th at Hull and Leeds.

In May on the 19th at Hull; on the 20th at Leeds; on the 25th at Guernsey, Osborne, Salisbury, Oxford, Rugby, Hull, and Leeds; on the 26th at Guernsey, Osborne, Whitechurch, Blackheath, Royal Observatory, Royston, Cambridge, and Lowestoft; on the 27th at Torquay, Bath, Blackheath, Royal Observatory, Hereford, and Wolverhampton; on the 28th at Hereford, Halifax, Hull, and Leeds; and on the 31st at Torquay, Salisbury, Whitechurch, Royston, Lowestoft, Llandudno, Liverpool, and Halifax.

In June on the 1st at Halifax and Hull; on the 5th at Blackheath, Royal Observatory, Somerleyton, and Hull; on the 10th at Royston, Cambridge, and Liverpool; on the 17th at Halifax; on the 18th at Hull; on the 19th at Carlisle; on the 20th and 23rd at Cambridge; on the 28th at Guernsey, Osborne, Whitechurch, Blackheath, Royal Observatory, Oxford, Royston, Cambridge, Rugby, Lowestoft, and Somerleyton; and on the 29th at Barnet, Royston, and Cambridge.

Thunder was heard but lightning was not seen in April on the 4th at Halifax; on the 5th at Leeds; on the 6th at Halifax; on the 8th at Liverpool; on the 18th at Bath, Wolverhampton, and Hull; on the 25th at Cambridge and Halifax; and on the 26th at Carlisle.

In May on the 25th at Torquay, Bath, Whitechurch, Royston, Hereford, Cambridge, Wolverhampton, Liverpool, and Halifax; on the 26th at Bath; on the 27th at Lowestoft; on the 28th and 29th at Rugby; and on the 31st at Cambridge, Rugby, and Halifax.

In June on the 1st at Oxford; on the 3rd and 4th at Halifax; on the 5th at Cambridge and Rugby; on the 10th at Royston and Rugby; on the 11th at Carlisle; on the 17th at Liverpool, Hull, Stonyhurst, and Carlisle; on the 18th at Somerleyton; on the 19th at Blackheath, Royal Observatory, Royston, Cambridge, Somerleyton, Hull, and Carlisle; on the 20th at Royston and Hull; on the 23rd at Royston, Stonyhurst, and Carlisle; on the 28th at Torquay and Bath; and on the 29th at Osborne.

Lightning was seen but thunder was not heard in April on the 5th at Leeds; and on the 17th at Stonyhurst.

In May on the 25th at Torquay, Bath, Blackheath, Royal Observatory, Oxford, and Royston; on the 30th at Whitechurch and Oxford; and on the 31st at Cambridge and Carlisle.

In June on the 10th at Stonyhurst and Carlisle; on the 17th at Liverpool, Stonyhurst, and Carlisle; on the 24th at Halifax; on the 28th at Whitechurch and Halifax; and on the 29th at Oxford.

Solar halos were seen in April on the 1st at Liverpool and Halifax; on the 2nd at Oxford and Liverpool; on the 3rd at Torquay, Bath, Oxford, Liverpool, and Halifax; on the 4th at Torquay, Oxford, and Halifax; on the 5th and 6th at Halifax; on the 8th at Liverpool and Halifax; on the 11th at Osborne; on the 14th at Halifax; on the 15th at Torquay and Oxford; on the 16th at Oxford; on the 19th at Torquay, Liverpool, and Halifax; on the 20th at Torquay; on the 21st at Liverpool; on the 24th at Torquay, Osborne, Bath, Oxford, and Liverpool; on the 25th at Torquay; on the 26th at Liverpool; on the 27th at Guernsey and Torquay; on the 28th at Torquay; on the 29th at Oxford; and on the 30th at Torquay, Oxford, Liverpool, and Halifax.

In May on the 1st at Torquay; on the 2nd at Hereford; on the 6th at Oxford; on the 12th at Torquay, Liverpool, and Halifax; on the 13th at Torquay and Oxford; on the 14th, 16th, and 19th at Torquay; on the 21st and 23rd at Oxford; on the 25th at Torquay and Oxford; on the 27th at Liverpool; on the 28th at Torquay and Oxford; on the 29th at Oxford and Liverpool; on the 30th at Torquay and Halifax; and on the 31st at Torquay, Liverpool, and Halifax.

In June on the 1st at Torquay; on the 3rd and 4th at Oxford; on the 9th at Halifax; on the 15th at Liverpool, Halifax, and Stonyhurst; on the 17th at Oxford; on the 22nd at Torquay, Liverpool, Halifax, and Stonyhurst; on the 24th at Torquay and Liverpool; and on the 25th at Liverpool.

Lunar halos were seen in April on the 1st at Oxford and Hereford; on the 2nd at Salisbury and Oxford; on the 3rd at Torquay, Oxford, Hereford, Cambridge, Halifax, and Leeds; on the 4th at Salisbury, Bath, Oxford, Cambridge, Llandudno, Liverpool, and Carlisle; on the 5th at Osborne and Oxford; on the 6th at Hereford; on the 7th at Bath; and on the 30th at Cambridge and Lowestoft.

In May on the 1st at Oxford; on the 4th, 9th, and 10th at Hereford; on the 12th at Torquay; on the 13th and 14th at Oxford; on the 30th at Halifax; and on the 31st at Lowestoft.

In June no lunar halos were reported to have been seen.

Snow fell in April on the 4th at Leeds; on the 12th at Nottingham, Halifax, Hull, and Stonyhurst; from the 13th to the 18th it was a general fall throughout the country; on the 19th at Cambridge; on the 25th at Royston; on the 27th at Nottingham and Halifax; on the 28th at Royston, Cambridge, Lowestoft, and Bradford; and on the 29th at Salisbury, Halifax, and Leeds.

In May on the 3rd at Rugby; and on the 16th at Halifax.

Hail fell in April on the 12th at Carlisle; on the 13th at Torquay and Carlisle; on the 14th at Llandudno; on the 15th at Truro and Carlisle; on the 16th at Truro and Torquay; on the 17th at Guernsey, Truro, and Hull; on the 18th at Torquay and Lowestoft; on the 25th at Bath, Halifax, Hull, Bradford, and Leeds; on the 26th at Whitechurch and Stonyhurst; on the 27th at Blackheath, Royal Observatory, Oxford, Rugby, Liverpool, and Halifax; on the 28th at Blackheath, Royal Observatory, Lowestoft, and Stonyhurst; and on the 29th at Lowestoft.

In May on the 6th at Lowestoft; on the 17th at Cambridge; on the 18th at Carlisle; on the 19th at Hull; on the 20th at Leeds; on the 25th at Oxford; and on the 31st at Liverpool.

In June on the 1st at Halifax and Hull; on the 3rd at Halifax; on the 12th at Carlisle; on the 17th at Oxford, Liverpool, and Stonyhurst; on the 18th at Hull; on the 19th at Royston, Llandudno, and Carlisle; on the 20th at Blackheath and Royal Observatory; and on the 28th and 29th at Royston.

Fog prevailed in April on the 1st at Oxford; on the 4th at Torquay; on the 5th at Guernsey and Torquay; on the 11th at Royston and Cambridge; on the 13th at Truro; on the 15th at Rugby; on the 18th at Hull; on the 19th at Royston and Cambridge; on the 21st at Guernsey and Bath; on the 22nd and 23rd at Guernsey; and on the 29th at Bath.

In May on the 9th at Blackheath and Royal Observatory; and on the 18th, 26th, 27th, 28th, and 29th at Torquay.

In June on the 6th at Guernsey; on the 7th at Guernsey, Torquay, and Royston; on the 8th and 9th at Guernsey and Torquay; on the 10th at Royston; on the 20th at Guernsey; on the 21st at Guernsey and Torquay; on the 25th at Torquay; on the 27th at Guernsey; and on the 28th at Guernsey and Torquay.

The Observations have been reduced to Mean values by Glaisher's Barometrical and Diurnal Range Tables, and the Hygrometrical results have been deduced from the seventh edition of his Hygrometrical Tables.

The highest temperatures of the air were at Cambridge, 87° 0'; at Blackheath, 86° 8'; and at Royston, 86° 0'.

The lowest temperatures of the air were at Salisbury, 19° 0'; at Stonyhurst, 20° 8'; and at Barnet, 21° 0'.

The greatest ranges of temperature were at Salisbury, 64° 0'; at Rugby, 63° 4'; and at Barnet, 65° 0'.

The least ranges of temperature were at Guernsey and Truro, 46° 0'; and at Llandudno, 46° 8'.

The greatest number of days of rain were at Hull, 33; at Bradford, 52; and at Llandudno, Halifax, and Stonyhurst, 48.

The least number of days of rain were at Salisbury and Barnet, 27; and at Barnstaple and Oxford, 29.

The greatest falls of rain were at Stonyhurst, 12.43 inches; at Hull, 10.40 inches; and at Halifax, 8.83 inches.

The least falls of rain were at Salisbury, 2.67 inches; at Barnstaple, 2.74 inches; and at Whitechurch, 2.80 inches.

QUARTERLY METEOROLOGICAL TABLE for different PARALLELS of LATITUDE.

PARALLELS OF LATITUDE, &c.	Mean Pressure of dry Air reduced to the level of the Sea.	Mean of all Highest Readings of the Thermometer.	Mean of all Lowest Readings of the Thermometer.	Mean Range of Temperature in the Quarter.	Mean of all Highest.	Mean of all Lowest.	Mean Monthly Range of Temperature.	Mean Daily Range of Temperature.	Mean Temperature of the Air.	Mean Temperature of the Dew Point.	Mean Elastic Force of Vapour.	Mean Weight of Vapour in a cubic foot of Air.	Mean additional Weight required for saturation.	Mean degree of Humidity.	Mean Weight of a cubic foot of Air.	Mean Reading of Maximum in Rays of Sun.	Mean Reading of Minimum on Grass.	Mean Estimated Strength.	WIND.				Mean Amount of Ozone.	Mean Amount of Cloud.	Mean Number of Days it fell.	RA.

QUARTERLY RETURN

OF

MARRIAGES, BIRTHS, AND DEATHS

REGISTERED IN THE DIVISIONS, COUNTIES, AND DISTRICTS OF

ENGLAND;

WITH CERTAIN DETAILED INFORMATION RELATING TO THE DEATHS IN EACH
REGISTRATION SUB-DISTRICT.

By Authority of the Registrar General.

Printed under the Superintendence of Her Majesty's Stationery Office,
AND SOLD BY EYRE AND SPOTTISWOODE, 9, EAST HARDING ST., FETTER LANE, E.C.

No. 175.]

Marriages—April, May, June, 1892.

Births and Deaths—July, August, September, 1892.

[Price 9d.]

General Register Office, Somerset House,
28th October, 1892.

The POPULATION of the UNITED KINGDOM in the middle of 1892 is estimated, on the basis of the recent enumerations, at 38,109,329 persons; that of England and Wales at 29,403,346, of Scotland at 4,063,451, and of Ireland at 4,642,532.

In the United Kingdom 283,995 *births* and 148,519 *deaths* were registered in the three months ending 30th September 1892. The natural increase of population was, therefore, 135,476. The registered number of persons married in the quarter ending 30th June 1892 was 143,378.

The birth-rate in the United Kingdom in the third quarter of 1892 was 29·6 and the death-rate 15·5 per 1000. The marriage-rate in the second quarter of 1892 was 15·1 per 1000.

The facts, in detail, concerning Scotland and Ireland are recorded in the Quarterly Returns of the Registrars-General for those parts of the United Kingdom.

ENGLAND AND WALES.

This Return comprises the BIRTHS and DEATHS registered in the 2112 registration sub-districts of England and Wales during the quarter ending 30th September 1892; and the MARRIAGES in 15,073 churches or chapels, in 10,897 registered places of worship unconnected with the Established Church, and in 633 Superintendent Registrars' Offices, in the three months ending 30th June 1892.

Marriages.

During the second quarter of 1892, the marriages of 119,728 persons were registered in England and Wales, giving an annual rate of 16·3 per 1000 of the estimated population. This rate is 1·0 per 1000 higher than the mean rate in the ten next preceding second quarters, and, with the single exception of the year 1890, exceeds the rate in the second quarter of any year since 1876. In registration counties the lowest rates were 11·8 in Middlesex, 12·0 in Cambridgeshire and in Norfolk, and 12·1 in Durham; while the highest were 18·6 in Leicestershire, 19·0 in Nottinghamshire, and 21·0 in Lincolnshire. In London the rate was 18·3.

Births.

The births registered in the third quarter of 1892 numbered 228,254, being in the proportion of 30·8 annually per 1000 living. This rate exceeds the rate in each of the four next preceding third quarters, but is 0·9 per 1000 below the mean rate in the third quarters of the ten years 1882-91. In registration counties the rates varied from 23·9 in Sussex, 24·3 in Westmorland, and 24·7 in Rutlandshire, to 34·6 in Monmouthshire, 34·9 in Derbyshire, 35·5 in Staffordshire, and 35·7 in Durham.

In the thirty-three great towns the birth-rate was 32·1 per 1000. The lowest rates were 24·1 in Brighton, 25·6 in Halifax, and 25·7 in Huddersfield; and the highest 35·9 in West Ham, 36·8 in Burnley, 36·9 in Hull, and 37·0 in Sheffield. In sixty-seven other large town districts the birth-rate was 32·1 per 1000, while in the remainder of the country it was 29·7.

Excess of Births over Deaths, and Emigration.

The *natural increase* of the population of England and Wales, or the excess of births over deaths, which had amounted to 97,979, 98,254, and 107,620 in the third quarters of 1889, 1890, and 1891, was 112,521 last quarter.

It appears from returns issued by the Board of Trade that 93,145 emigrants (including 27,815 foreigners), embarked during the quarter from the various ports of the United Kingdom at which emigration officers are stationed. Distributing proportionally 811 whose nationality was not distinguished, the emigrants of native origin numbered 65,213, and of these 45,033 were English, 8,053 Scotch, and 12,127 Irish. The proportions of emigrants to a million of the estimated population in the several portions of the United Kingdom were 1532 from England, 1982 from Scotland, and 2612 from Ireland. Compared with the means in the third quarters of the next preceding three years, the proportions from England and Ireland show a decline, and that from Scotland an increase.

Prices and Pauperism.

During the third quarter of the year the average price of wheat was 29s. 3d. per quarter, the prices in the preceding two quarters having been 33s. 8d. and 30s. 11d. The mean wholesale prices of beef and mutton in the London market were 6d. and 6½d. per lb. respectively; compared with the prices in the preceding quarter the price of beef showed an increase of ¼d., and that of mutton a decrease of ¾d. The average price of the best seaborne coal in the London market, put in barge from the collier in the Thames, was 17s. 7d. per ton, against 18s. 8d. in the third quarter of each of the years 1890 and 1891. The mean price of 2½l. per cent. Consols was 96l. 18s. 10d., against 95l. 10s. 11d. in the third quarter of 1891. The minimum annual rate per cent. of discount charged at the Bank of England, which had been reduced from 2l. 10s. to 2l. on 28th April, remained at 2l. throughout the quarter.

The average number of paupers (exclusive of lunatics in asylums, and of vagrants) relieved in England and Wales on the last day of each week in the quarter was 640,202, of whom 169,149 received in-door, and 471,053 out-door relief. The proportion of the population in receipt of Poor-law relief was 21·8 per 1000, against 22·9 and 22·0 in the third quarters of 1890 and 1891.

Meteorology.

Remarks on the meteorology of the quarter, based on observations at the Royal Observatory, Greenwich, and at various other stations, furnished by Mr. James Glaisher, F.R.S., will be found, with accompanying Tables, on pages 65-72. The mean reading of the barometer was 29·803 inches, being ·011 of an inch above the

mean reading in the third quarters of 51 years; the mean was above the average in July and September, but below it in August. The mean temperature of the air during the quarter was $59^{\circ}2$, being $0^{\circ}5$ below the average in the third quarters of 121 years. The mean temperature was $2^{\circ}0$ below the average in July, $0^{\circ}8$ above in August, and $0^{\circ}2$ below in September. The weather in July was cold, particularly during the third week of the month. The temperature remained generally below the average till the 13th August, and, with the exception of about a fortnight in September, from the 26th August till the end of the quarter. At 29 stations of observation the mean temperature during the quarter ranged from $53^{\circ}7$ at Halifax, $54^{\circ}0$ at Wolverhampton, and $54^{\circ}9$ at Stoneyhurst, to $59^{\circ}3$ at Camden Square, $59^{\circ}6$ at Truro, and $59^{\circ}8$ in Guernsey.

The amount of rain measured during the quarter at the Royal Observatory, Greenwich, was 6.58 inches, being 0.74 of an inch below the average in the third quarters of 77 years. Compared with the respective monthly averages, the amount was 1.04 inches below the average in July, 0.65 of an inch above in August, and 0.35 of an inch below in September. At 29 stations of observation the amounts measured in the quarter ranged from 5.45 inches in Guernsey, 5.86 inches at Hull, and 6.01 inches at Leeds to 13.11 inches at Bath, 14.45 inches at Stoneyhurst, and 14.82 inches at Carlisle.

The amount of bright sunshine recorded during the quarter at the Royal Observatory was 447 hours, or 33.8 per cent. of the total number of hours the sun was above the horizon, the mean proportion in the third quarters of the ten years 1882-91 having been 33.7 per cent. The amount of sunshine was below the average in July, but showed a slight excess in each of the other months of the quarter.

Deaths.

The deaths registered during the third quarter of 1892 numbered 115,733, being in the proportion of 15.6 deaths annually per 1000 persons living. This rate is not only 1.6 per 1000 below the mean rate in the ten next preceding third quarters, but, with the single exception of the third quarter of 1888, it is the lowest rate in any quarter on record. In registration counties the rates ranged from 9.6 in Rutlandshire, 11.6 in Dorsetshire, 12.2 in Cumberland, and 12.3 in Surrey, to 16.9 in Warwickshire and in the East Riding of Yorkshire, 17.2 in Durham, and 18.3 in Lancashire.

URBAN AND RURAL MORTALITY.—In the registration districts and sub-districts which are taken to represent approximately the urban portion of the country, and which contain a population estimated at about nineteen millions, the death-rate last quarter was 16.6 per 1000; while, in the remaining and chiefly rural population of about ten and a half millions, it was 13.9 per 1000. These rates were respectively 2.0 and 0.9 below the average rates in the ten preceding third quarters. Out of equal numbers living, the deaths in the urban districts were to those in the rural districts in the proportion of 119 to 100, the ratio in the ten preceding third quarters having been 126 to 100.

In the thirty-three great towns, with an aggregate population estimated at a little more than ten millions, the annual death-rate last quarter was 17.9 per 1000, the rates in the several towns ranging from 12.6 in Croydon, 14.8 in Huddersfield, 15.0 in Brighton, 15.3 in Nottingham, and 15.4 in Portsmouth, to 21.3 in Bolton, 22.3 in Liverpool, 23.2 in Salford, and 24.3 in Preston. In London the rate was 17.1.

In sixty-seven other large town districts, with an aggregate population of nearly four millions, the death-rate was 16.2 per 1000, or 1.7 per 1000 below the rate in the great towns; in the remainder of England and Wales, after excluding these 100 towns, the rate was 14.0.

MORTALITY AT DIFFERENT AGES.—Of the 115,733 deaths registered last quarter, 34,309 were of infants under one year of age, 53,764 of persons aged between one and 60 years, and 27,660 of persons aged 60 years and upwards.

The mortality of infants under one year of age was in the proportion of 150 deaths to 1000 births registered, being 9 per 1000 below the mean proportion in the ten preceding third quarters. The lowest proportions in registration counties were 51 in Rutlandshire, 75 in Dorsetshire, and 91 in Shropshire and in Westmorland; while the highest were 175 in East Riding, 179 in Warwickshire, and 183 in Leicestershire. In the thirty-three great towns the mean proportion was 186 per 1000, ranging from 95 in Huddersfield, 127 in Halifax, 141 in Swansea, and 148 in Croydon, to 227 in Bolton, 251 in Leicester, and 311 in Preston. In sixty-seven other large town districts the infant mortality averaged 170 per 1000 births, the lowest proportions being 78 in Carlisle, 90 in Scarborough, 103 in Accrington, 104 in Rotherham, and 105 in Hornsey, and the highest 255 in Colchester, 263 in Aberdare, and 281 in Merthyr Tydfil. In the remainder of the country the infant mortality was 120 per 1000 births registered.

The mortality of persons aged between one and 60 years was at the rate of 8·1 deaths annually per 1000 of the estimated population at these ages, being 0·9 per 1000 below the mean rate in the ten preceding third quarters. In the thirty-three great towns the rate was 9·6 per 1000; the lowest rates being 5·7 in Croydon, 5·8 in Norwich, and 6·6 in Leicester, and the highest, 11·8 in Manchester, 13·1 in Liverpool, and 13·5 in Salford.

Among persons aged 60 years and upwards the mortality was at the annual rate of 50·7 per 1000 of the estimated population at these ages, being 5·0 below the mean rate in the ten preceding third quarters. In the thirty-three great towns the rate was 54·9 per 1000, ranging from 44·4 in Plymouth, 47·3 in Norwich, and 47·4 in Portsmouth, to 70·2 in Burnley, 71·6 in Derby, and 82·9 in Blackburn.

Compared with the respective rates in the ten next preceding third quarters, the mortality of infants was 5·6 per cent., that of persons between one and 60 years of age 10·0 per cent., and that of persons over 60 years of age 9·0 per cent., below the average.

ZYMOTIC DISEASES.—The 115,733 deaths from all causes included—

9095	attributed to diarrhœa,
2565	„ measles,
2017	„ whooping-cough,
1375	„ scarlet fever,
1320	„ diphtheria,
1151	„ fever,
86	„ small-pox.

Thus 17,609 deaths were ascribed to these zymotic causes, corresponding to an annual rate of 2·38 per 1000 living, the average of the rates in the ten preceding third quarters having been 2·88.

The deaths ascribed to *diarrhœa* numbered 9095, and corresponded to an annual rate of 1·22 per 1000, the average for the ten preceding third quarters having been 1·59. The low mortality was due to the favourable character of the season, for though the temperature was slightly above the average in August, it was somewhat below it in September, and very considerably so in July, which is the month in which summer diarrhœa usually rises most rapidly towards its maximum. The counties in which the rates were highest were Middlesex 1·70, Essex 1·72, East Riding 1·95, Warwickshire 1·97, and Leicestershire 2·09. In the thirty-three great towns the rate was 1·98, rising, however, to 3·50 in Sheffield, 3·66 in Leicester, 3·72 in Bolton, and 4·49 in Preston. In sixty-seven other large town districts the rate was 1·48, while in the remainder of England and Wales it was

0.69. Among districts and sub-districts in which diarrhoea appears to have been specially prevalent were Colchester, Walsall, Great Grimsby, Stockport Second, St. Helen's, Wigan, Culcheth, and Walmgate.

The 2565 deaths from *measles* corresponded to an annual rate of 0.35 per 1000, a rate slightly in excess of the average in the ten preceding third quarters, which had been 0.31. No death from this disease was registered in either of the small counties of Huntingdonshire and Rutlandshire, and the rate was below 0.05 per 1000 in Suffolk, Dorsetshire, Cornwall, and Shropshire, while the highest rates were 0.70 in Essex, 0.71 in Middlesex, and 0.84 in Durham, in which county 220 deaths from this disease were registered in the quarter. In the 33 great towns the rate was 0.49, but while no death from this cause was recorded in Portsmouth, Swansea, Norwich, Derby, Bolton, or Burnley, the rate was 1.21 in Sunderland, 1.31 in West Ham, 1.38 in Salford, and 2.06 in Oldham. In sixty-seven other large town districts the rate was 0.35, while in the remainder of England and Wales it was 0.25. Among districts and sub-districts in which the mortality from measles was excessive were Hendon, Edmonton, Chesham, Chelmsford, Dudley, Earl Shilton, Northwich, Tickhill, and Lower and Upper Merthyr Tydfil.

The deaths ascribed to *whooping-cough* were 2017, or 0.27 annually per 1000 living, the average in the ten preceding third quarters having been 0.33. The highest county rates were 0.48 in Derbyshire, 0.56 in Nottinghamshire, and 0.68 in the East Riding. In the 33 great towns the rate was 0.30, rising, however, to 0.73 in Nottingham, 0.75 in Burnley, 0.83 in Birkenhead, and 1.43 in Preston. In sixty-seven other large town districts the rate was 0.34, while in the remainder of the country it was 0.24. Among districts and sub-districts in which the mortality from whooping-cough was excessive were Lydd, Burslem, Ripley (Belper), Keighley, Goole, and Walmgate.

To *scarlet fever* 1375 deaths were ascribed, corresponding to an annual mortality of 0.19 per 1000, against an average of 0.27 in the ten preceding third quarters. No death from this disease was registered either in Huntingdonshire or Rutlandshire, and the rate did not exceed 0.05 in Surrey, Sussex, Bucks, Suffolk, Norfolk, Dorsetshire, Herefordshire, Worcestershire, North Riding, or Cumberland, while the highest rates were 0.26 in Lancashire, 0.27 in North Wales, 0.36 in South Wales, and 0.78 in Monmouthshire. In the thirty-three great towns the rate was 0.28; but while no death from this disease was recorded in Croydon, Wolverhampton, or Norwich, and only one each in Brighton, Derby, Burnley, Halifax, and Sunderland, the rate was 0.50 in Salford, 0.61 in Plymouth, 0.74 in Swansea, and 0.85 in Preston. In sixty-seven other large town districts the rate was 0.18, while in the remainder of the country it was 0.12. Among districts and sub-districts in which the mortality from scarlet fever was excessive were Biggleswade, Fulbourn, Hindley, Warrington, Skipton, Newport (Monmouthshire), and Ruabon.

To *diphtheria* were ascribed 1320 deaths, or 0.18 annually per 1000 living, while the average rate in the ten preceding third quarters had been only 0.14. The rate did not exceed 0.05 in Huntingdonshire, Somersetshire, Herefordshire, Staffordshire, Leicestershire, or Monmouthshire, while the highest rates were 0.24 in Surrey, 0.25 in Middlesex and in Oxfordshire, 0.32 in Sussex, and 0.41 in Essex. In the thirty-three great towns the rate was 0.28; but while no death was recorded from this cause in Burnley or Blackburn, the rate was 0.42 in Croydon, 0.46 in London, and 0.50 in West Ham. In sixty-seven other large town districts the rate was 0.13, while in the remainder of England and Wales it was 0.12. Among districts and sub-districts in which diphtheria was specially fatal were Rochester, Midhurst, Oxford, Grays, South Hamlet (Gloucester), Albrington, Billingham, and Honley.

The 1151 deaths from "*fever*," including typhus, enteric fever, and simple or ill-defined forms of continued fever, corresponded to an annual rate of 0.16 per 1000 living, while the average rate for the ten preceding third quarters had been 0.22.

The rate did not exceed 0·05 in Huntingdonshire, Suffolk, Dorsetshire, Gloucestershire, Rutlandshire, Cumberland, or Westmorland, while the highest rates were 0·23 in Lancashire, 0·24 in Cheshire and in South Wales, 0·25 in Hampshire, and 0·27 in Durham. In the thirty-three great towns the rate was 0·17, and scarcely above the average for the whole country; but while no death from these diseases was recorded in Croydon, the rate was 0·46 in Salford and in Blackburn, and 0·60 in Sunderland. In sixty-seven other large town districts the rate was 0·21, while in the remainder of the country it was 0·13. Among districts and sub-districts in which the mortality from fever appears to have been excessive were King's Lynn, Swindon, Penryn, Runcorn, Easington, Caerleon, and Llannon.

The deaths from *small-pox* were 86, having been 76 and 99 respectively in the quarters ending with March and June last. Of these 86 deaths, 54 occurred in Yorkshire, 13 of these being in Dewsbury and 23 in Halifax; 9 occurred in Lancashire, including 6 in Warrington; and 6 occurred in London or in the hospital ship that is used for London cases.

The following Table shows the relative mortality from each of the above-mentioned zymotic diseases in England and Wales, in the thirty-three great towns, in sixty-seven other considerable town districts, and in the remainder of the country:—

ANNUAL DEATH-RATE per 1,000 from ALL CAUSES, and from several ZYMOTIC DISEASES, during the Third Quarter of 1892.

	All Causes.	Principal Zymotic Diseases. (Cols.3-9)	Small-pox.	Measles.	Scarlet Fever.	Diphtheria.	Whooping-cough.	Fever.	Diarrhoea.

CERTIFICATION OF CAUSES OF DEATH.—Of the 115,733 deaths in England and Wales, the causes of 105,731, or 91·3 per cent., were duly certified by registered medical practitioners, and of 7037, or 6·1 per cent., by coroners after inquest; while the causes of the remaining 2965, or 2·6 per cent., were not certified, the mean proportion in the ten preceding third quarters having been 3·1 per cent. While however the proportion was less than 1·0 per cent. in Surrey, Middlesex, Wiltshire, and Monmouthshire, it reached 4·6 in Warwickshire, 4·7 in North Wales, 5·0 in Herefordshire, and 6·3 in Westmorland. In the thirty-three great towns the proportion was 1·9 per cent., varying from 0·0 in Croydon, 0·2 in Birkenhead, and 0·5 in Swansea, to 4·1 in Leicester, 4·2 in Huddersfield, 4·4 in Liverpool, and 5·3 in Birmingham.

VIOLENT DEATHS.—To different forms of violence 4454 deaths were referred, corresponding to an annual rate of 0·60 per 1000, the average rate in the ten preceding third quarters having been 0·61. In registration counties the rates ranged from 0·32 in Huntingdonshire, 0·35 in Sussex, and 0·36 in Rutlandshire, to 0·72 in Lancashire, 0·81 in Monmouthshire, and 0·82 in South Wales. In the thirty-three great towns the rate was 0·66 per 1000, varying from 0·17 in Huddersfield, 0·24 in Brighton, and 0·26 in Croydon, to 0·82 in Sunderland, 0·88 in Bristol, 0·92 in Newcastle-on-Tyne, and 1·29 in Liverpool.

INQUESTS.—Inquests were held concerning 7037, or 6·1 per cent., of the total deaths, the mean proportion in the ten preceding third quarters having been 5·7 per cent. In the thirty-three great towns the proportion of inquest cases to total deaths was 6·5 per cent., the lowest per-centages being 2·1 in Preston, 2·8 in Huddersfield, and 3·0 in Brighton, and the highest 8·9 in Gateshead and in Newcastle-on-Tyne, and 9·5 in Derby.

DEATHS IN PUBLIC INSTITUTIONS.—Of the total deaths registered in England and Wales, 13,746, or 11·9 per cent., occurred in workhouses, hospitals, and public lunatic asylums, the proportion in the ten preceding third quarters having been 10·4 per cent. In the thirty-three great towns the proportion of deaths in such institutions was 18·4 per cent., ranging from 4·9 in Gateshead, 5·3 in Preston, and 6·7 in Huddersfield, to 18·4 in Manchester, 19·2 in Bristol, and 26·5 in London.

EDINBURGH, GLASGOW, AND DUBLIN.—The death-rate in Edinburgh was 16·1, in Glasgow 18·5, and in Dublin 23·1, against 17·1 in London.

COLONIAL AND FOREIGN CITIES.—A summary of the Weekly Returns with which the Registrar-General is favoured by various local authorities abroad, shows that the deaths last quarter in twenty-nine Colonial and Foreign cities, with an aggregate population of about seventeen and a half millions, were equal to an annual rate of 27·1 per 1000 living.

In the twenty European cities the mean death-rate was 25·1 per 1000, against 17·9 per 1000 in the thirty-three great English towns. In Paris the rate was 20·9, in Berlin 21·2, and in Vienna 21·9. Among the twenty-nine Colonial and Foreign cities the lowest death-rates were 16·6 in Copenhagen, 16·9 in Amsterdam, 17·1 in Rome, and 17·2 in Turin; while the highest were 50·0 in Cairo, 57·0 in Madras, and 91·3 in Hamburg. *Small-pox* caused 77 deaths in Prague, 26 in New York, 21 in Bombay, and 17 in Cairo. The mortality from *measles* was proportionally highest in Madras and in Hamburg, that from *scarlet fever* in Rotterdam and in Stockholm, and that from *whooping-cough* in Hamburg, but none of these diseases reached an annual rate of 0·5 per 1000 in any other of the twenty-nine cities. *Diphtheria* was excessive in Stockholm, Vienna, Buda-Pesth, and Philadelphia; and *fever* in the Indian cities, in Cairo, and in New Orleans. The annual rate from *diarrhoeal diseases* (including cholera) rose to 6·4 in Berlin, in Dresden, and in Brooklyn, 6·5 in Christiania, 8·1 in Munich, 8·5 in Breslau, 11·9 in Alexandria, 14·6 in Madras, 16·8 in Cairo, and 67·0 in Hamburg.

* Furnished by the Chief Cashier of the Bank of England.

† As published by the Comptroller of Corn Returns to the Board of Trade.

‡ These are the average prices at which the best seaborne Newcastle, Sunderland, and Hartlepool coals are put in barge from the collier in the Thames; the difference between these prices and those charged to the consumer represents the cost of distribution and merchant's profit. The figures are derived from returns with which the Registrar-General has been favoured by the Mineral Statistics Department, Home Office.

§ Sunderland and Hartlepool coal only.

¶ For Sunderland and Hartlepool coal during the month of June only.

* The Registration or Union Counties consist of groups of Registration Districts, which are generally co-extensive with the Poor Law Unions. A District which extends into two or more Geographical Counties is included entirely in that Registration County in which the principal town of the district, or the greater part of the population, is located. The boundaries of Registration or Union Counties therefore differ more or less from the boundaries of Geographical Counties.

b The averages of Marriages and Births are given only for the Eleven Divisions and for Registration Counties.

c See page 14, note b.

d See Foot note f page 23.

NOTE.—The Registrars alone must be considered responsible for the accuracy of the figures shown in their Returns, and for the opinions expressed in the foot notes.

REGISTRATION COUNTIES, and REGISTRATION DISTRICTS of ENGLAND; Births and under one year of Age, and of PERSONS aged 60 years and upwards from ALL CAUSES; COUGH, FEVER, DIARRHŒA, CHOLERA, and VIOLENCE, also INQUEST CASES and DEATHS in DIVISIONS, REGISTRATION COUNTIES, REGISTRATION DISTRICTS, and REGISTRATION of ENGLAND.

^a The Registration Districts, 633 in number, are collections of contiguous Parishes or Places, combined for purposes connected with the Registration of Births, Deaths, and Marriages, and are nearly always identical with the Poor Law Unions of the same names; they are here arranged topographically under the Registration Counties.

^b These areas, which were partly revised by the Ordnance Survey Department, are the same as those published in the Census Report of 1881. They do not include space occupied by foreshore or tidal water of rivers and creeks. ^c See page 14, note b.

II.—SOUTH EASTERN COUNTIES.—REGISTRATION DISTRICTS—continued.

Registration Districts.		Area in Statute Acres.	Enumerated Population, 1891 (unrevised).	Marriages ending 30 June 1892.	Births ending 30 Sept. 1892.	Deaths ending 30 Sept. 1892.	The DEATHS in the Quarter are stated by the Registrars to include											Deaths in Public Lunatic Asylum.
							Deaths of Year of Age.	Deaths from									Inquest Cases.	
								Persons aged 60 Years & upwards.	Small-pox.	Measles.	Scarlet Fever.	Diphtheria.	Whooping-cough.	Fever.	Diarrhoea.	Cholera.		
No.				Registered in Quarter ending 30 June 1892.	Registered in Quarter ending 30 Sept. 1892.	Average in Quarters ending 30 Sept. 1891, the 5 Years 1889-91.	Infants under 1 Year of Age.

^a The Registration Sub-districts (9112 in number) are sub-divisions of the Registration Districts in which the Births and Deaths are registered by Registrars severally appointed for that purpose. The letter W denotes that the Sub-district contains within its limits a Workhouse belonging to the District or Union; w indicates Workhouse Establishment receiving inmates from other Districts than the one in which it stands; H indicates Hospital or Infirmary; and L Lunatic Asylum.

^b For London, the numbers of Births and Deaths, as well as the details given under "Infants under 1 year of age" and the twelve subsequent headings in this Table, are derived from the Weekly Returns made by the Registrars, and relate to 13 weeks ending 1st October 1892.

* On 1st January 1892 the Registration District of Leicester was extended under the provisions of the Leicester Extensions Act, 1891, cap. c., by the addition of parts of the following sub-districts:—Billesdon (402: 1), Wigston (403: 1), Enderby (403: 2), and Rothley (403: 3). The correct populations of the several districts and sub-districts are given in the above Table, but the areas are shown as they existed prior to the change. The figures in the column for averages also refer to the several sub-districts as they existed prior to the change.

a 104: 2.—The 7 deaths from measles occurred in Hinckley Urban Sanitary District.

b 404: 3.—The 9 deaths from measles occurred in the parish of Earl Shilton.

VII.—NORTH MIDLAND COUNTIES.—REGISTRATION SUB-DISTRICTS—continued.

Registration Sub-districts.		Area in Statute Acres.	Enumerated Population, 1891 (unrevised).	Births		Deaths		The DEATHS in the Quarter are stated by the Registrars to include

METEOROLOGY OF ENGLAND.

REMARKS ON THE WEATHER DURING THE QUARTER ENDING SEPTEMBER 30TH, 1892.

By JAMES GLAISHER, ESQ., F.R.S., &c.

The weather in July was cold, showery during the first part of the month, and dry at the end. The temperature of the air was below the average on every day, excepting the 3rd, 4th, 7th, and 31st, and particularly so from the 14th to the 21st. The atmospheric pressure was generally below the average till the 20th, and above from the 21st. The fall of rain at most stations was less than the average. The S.W. wind was prevalent in the first part of the month, and the N.E. after the 20th. There was very little thunder during the month. The hay crop was generally light.

The weather in August was variable, but was very different at different parts of the country. In the south it was a moderately warm month, with frequent rain; in the north the first fortnight was generally bright, and the last week was cold, wet, and unsettled over the whole country. The temperature of the air about London was generally above the average from the 14th to the 25th, and generally below on all other days. The atmospheric pressure was above the average till the 12th day, and below, with the exception of the 16th, 20th, and 21st, from the 13th day, and particularly so at the end of the month. The fall of rain was above the average at nearly all stations. The wind was mostly from S.W.

The weather in September was dull and wet during the first week, then dry, with occasional bright sun till the 19th, and generally wet and dull from the 20th. The temperature of the air was below its average till the 9th, from the 14th to the 18th, and from the 28th, and above from the 10th to the 13th, and from the 19th to the 27th. The atmospheric pressure was, with the exception of a very few days, below the average all the month. The fall of rain was somewhat above the average. The prevalent wind was from the S.W. The month was not favourable for harvest work.

About London the mean daily temperature of the air was generally below its average from July 1st to August 13th, being particularly so on the 14th, 17th, 18th, and 19th of July, when it was as much as $8^{\circ}5$, $9^{\circ}9$, $8^{\circ}2$, and $9^{\circ}7$ respectively below; the mean daily deficiency for the 44 days, ending August 13th, being $2^{\circ}5$; from August 14th to the 25th it was generally above, the mean daily excess being $1^{\circ}7$; from August 26th to September 9th it was generally below, the mean daily deficiency being $3^{\circ}3$; from September 10th to the 13th it was above, the mean daily excess being $3^{\circ}7$; from September 14th to the 18th it was generally below, the mean daily deficiency being $2^{\circ}3$; from September 19th to the 27th it was above, the mean daily excess being $2^{\circ}8$; and from September 28th to the 30th it was below its average, the mean daily deficiency for the 3 days ending September 30th being $3^{\circ}7$.

The mean temperature of the air for July was $59^{\circ}6$, being $2^{\circ}0$ and $2^{\circ}5$ below the average of 121 and 51 years respectively; it was $0^{\circ}7$ lower than in 1891, $0^{\circ}1$ higher than in 1890, and $1^{\circ}4$ lower than in 1889.

The mean temperature of the air for August was $61^{\circ}7$, being $0^{\circ}8$ and $0^{\circ}4$ above the average of 121 and 51 years respectively; it was $3^{\circ}1$, $2^{\circ}4$, and $1^{\circ}7$ higher than in 1891, 1890, and 1889 respectively.

The mean temperature of the air for September was $56^{\circ}3$, being $0^{\circ}2$ and $0^{\circ}8$ below the average of 121 and 51 years respectively; it was $2^{\circ}8$ and $3^{\circ}2$ lower than in 1891 and 1890 respectively, and $0^{\circ}5$ higher than in 1889.

The mean high day temperature of the air for July was $70^{\circ}9$, being $3^{\circ}1$ below the average of 51 years; it was $0^{\circ}8$ lower than in 1891, $0^{\circ}5$ higher than in 1890, and $0^{\circ}6$ lower than in 1889; and there were only nine instances of as low or lower temperature back to the year 1841, viz. :—

In 1890 it was $70^{\circ}4$	In 1879 it was $67^{\circ}2$	In 1860 it was $69^{\circ}2$
„ 1888 „ $67^{\circ}2$	„ 1875 „ $68^{\circ}9$	„ 1853 „ $70^{\circ}5$
„ 1883 „ $70^{\circ}6$	„ 1862 „ $70^{\circ}8$	„ 1841 „ $67^{\circ}1$

The mean high day temperature of the air for August was $73^{\circ}6$, being $0^{\circ}8$ above the average of 51 years; it was $4^{\circ}3$, $2^{\circ}9$, and $2^{\circ}3$ higher than in 1891, 1890, and 1889 respectively.

The mean high day temperature of the air for September was $66^{\circ}7$, being $0^{\circ}7$ below the average of 51 years; it was $3^{\circ}1$ and $4^{\circ}5$ lower than in 1891 and 1890 respectively, and $1^{\circ}3$ higher than in 1889.

The mean low night temperature of the air for July was $51^{\circ}2$, being $1^{\circ}9$ below the average of 51 years; it was $0^{\circ}4$, $0^{\circ}4$, and $2^{\circ}1$ lower than in 1891, 1890, and 1889 respectively; and there were only seven instances of as low or lower temperature back to the year 1841, viz. :—

1867 it was $50^{\circ}8$	1862 it was $50^{\circ}8$	1851 it was $51^{\circ}0$
1864 „ $51^{\circ}2$	1860 „ $50^{\circ}1$	1848 „ $51^{\circ}2$
1863 „ $49^{\circ}4$		

The mean low night temperature of the air for August was $52^{\circ}6$, being $0^{\circ}4$ below the average of 51 years; it was $1^{\circ}1$, $1^{\circ}4$, and $1^{\circ}0$ higher than in 1891, 1890, and 1889 respectively.

The mean low night temperature of the air for September was $47^{\circ}9$, being $1^{\circ}2$ below the average of 51 years; it was $2^{\circ}3$, $2^{\circ}5$, and $0^{\circ}2$ lower than in 1891, 1890, and 1889 respectively.

The mean daily range for July was $19^{\circ}7$, being $1^{\circ}3$ smaller than the average; in August it was $21^{\circ}0$, being $1^{\circ}2$ larger than the average; and in September it was $18^{\circ}8$, being $0^{\circ}5$ larger than the average.

The mean temperature of the air for July was $1^{\circ}5$ warmer than in June; in August it was $2^{\circ}1$ warmer than in July; and in September it was $5^{\circ}4$ colder than in August.

(From the preceding 51 years' observations the increase from June to July is $3^{\circ}1$; from July to August the decrease is $0^{\circ}8$; and from August to September the decrease is $4^{\circ}2$.)

From June to July there is an increase of $3^{\circ}2$ at stations south of 51° ; between 51° and 52° an increase of $1^{\circ}8$; between 52° and 53° of $1^{\circ}4$; and at stations north of this parallel of $1^{\circ}7$.

NOTE.—In reading this table it will be borne in mind that the plus sign (+) signifies above the average, and the minus sign (−) signifies below the average.

Average duration of the different directions of the wind referred to eight points of the compass, and duration in days of each direction in each month in the quarter, were as follows:—

Direction of Wind.	JULY.			AUGUST.			SEPTEMBER.		
	1892.	Average.	Departure from Average.	1892.	Average.	Departure from Average.	1892.	Average.	Departure from Average.
	d.	d.	d.	d.	d.	d.	d.	d.	d.
N.W.	2	3	-1	4	3	+1	3	4	-1
N.	4	3	+1	1	3	-2	3	4	-1
N.E.	10	4	+6	1	3	-2	1	2	-1
E.	2	3½	-1½	1	1½	-½	0	2	-2
S.E.	3	2	+1	2	1½	+½	1	3	-2
S.	1	1½	-½	4	3	+1	1	8	-5
S.W.	6	10	-4	15	12	+3	17	3	+14
W.	3	4	-1	3	4	-1	2	2	0

The sign (+) denotes excesses over averages; the numbers affected by this sign in July are N.E., N., and S.E.; in August are S.W., S., N.W., and S.E.; and in September is S.W.

The sign (−) denotes deficiencies below averages; the largest numbers affected by this sign in July are S.W., E., N.W., and W.; in August are N., N.E., and W.; and in September are S., N., N.W., and N.E.

From July to August there is an increase of $1^{\circ}6$ at stations south of 51° ; between 51° and 52° of $1^{\circ}9$; between 52° and 53° of $2^{\circ}9$; and at stations north of this parallel of $1^{\circ}8$.

From August to September there is a decrease of $4^{\circ}1$ at stations south of 51° ; between 51° and 52° a decrease of $5^{\circ}2$; and at stations north of this parallel of $4^{\circ}5$.

The mean reading of the barometer, at the height of 159 ft. above the sea level, for the month of July was $29^{\circ}842$ ins., being $0^{\circ}050$ in. above the average of 51 years; it was $0^{\circ}083$ in., $0^{\circ}107$ in., and $0^{\circ}083$ in. higher than in 1891, 1890, and 1889 respectively, and there were only 12 instances of as high or higher reading back to the year 1841, viz. :—

1887 it was $29^{\circ}866$ ins.	1869 it was $29^{\circ}928$ ins.	1859 it was $29^{\circ}937$ ins.
1885 " $29^{\circ}906$ "	1868 " $29^{\circ}891$ "	1857 " $29^{\circ}847$ "
1878 " $29^{\circ}863$ "	1864 " $29^{\circ}856$ "	1852 " $29^{\circ}857$ "
1876 " $29^{\circ}902$ "	1863 " $29^{\circ}961$ "	1847 " $29^{\circ}924$ "

The mean reading of the barometer for August was $29^{\circ}757$ ins., being $0^{\circ}023$ in. below the average of 51 years; it was $0^{\circ}111$ in., $0^{\circ}042$ in., and $0^{\circ}047$ in. higher than in 1891, 1890, and 1889 respectively.

The mean reading of the barometer for September was $29^{\circ}811$ ins., being $0^{\circ}005$ in. above the average of 51 years; it was $0^{\circ}023$ in., $0^{\circ}168$ in., and $0^{\circ}054$ in. lower than in 1891, 1890, and 1889 respectively.

From June to July there was a decrease of atmospheric pressure of $0^{\circ}01$ in. at stations south of 51° ; an increase of $0^{\circ}01$ in. between 51° and 52° ; and at stations north of this parallel an increase of about $0^{\circ}03$ in.

From July to August there was a decrease of atmospheric pressure at all stations; at those south of 52° of $0^{\circ}08$ in.; between 52° and 53° of $0^{\circ}11$ in.; and at stations north of this parallel of $0^{\circ}15$ in.

From August to September there was an increase at all stations; at those south of 51° of $0^{\circ}08$ in.; between 51° and 53° of about $0^{\circ}05$ in.; and at stations north of this parallel of $0^{\circ}03$ in.

About London the atmospheric pressure was generally below its average till July 20th, the mean daily deficiency for these 20 days being $0^{\circ}10$ in.; from July 21st to August 12th it was generally above, the mean daily excess being $0^{\circ}16$ in.; and from August 13th to September 30th it was generally below, the mean daily deficiency for the 49 days ending September 30th being $0^{\circ}10$.

Thunderstorms occurred in July on the 3rd at Liverpool, Halifax, Leeds, and Stonyhurst; on the 5th at Hull; on the 11th at Guernsey, Truro, and Torquay; on the 13th at Truro; on the 28th at Guernsey; and on the 30th at Osborne.

In August on the 18th at Guernsey, Osborne, Salisbury, Bath, Blackheath, Royal Observatory, Oxford, Royston, and Somerleyton; on the 23rd at Salisbury, Bath, Oxford, Lowestoft, Somerleyton, Wolverhampton, Liverpool, and Halifax; on the 24th at Halifax and Stonyhurst; on the 29th at Hull; and on the 30th at Stonyhurst.

In September on the 2nd at Liverpool, Halifax, and Stonyhurst; on the 3rd at Wolverhampton and Halifax; on the 19th at Guernsey; on the 20th at Torquay, Salisbury, Whitechurch, Oxford, Royston, Rugby, and Somerleyton; on the 21st at Torquay, Salisbury, Blackheath, Royal Observatory, and Oxford; on the 28th at Carlisle; and on the 29th at Halifax.

Thunder was heard but lightning was not seen in July on the 3rd at Hull; on the 4th at Lowestoft and Carlisle; on the 5th at Halifax; on the 16th at Royston; on the 29th at Osborne and Royston; and on the 30th at Salisbury.

In August on the 16th at Royston; on the 17th at Blackheath and Royal Observatory; on the 18th at Torquay and Whitechurch; on the 22nd at Royston; on the 23rd at Guernsey, Torquay, Osborne, and Hereford; on the 24th at Hull and Leeds; on the 27th at Whitechurch; on the 28th at Osborne; and on the 31st at Carlisle.

In September on the 3rd at Carlisle; on the 12th at Stonyhurst; on the 20th at Osborne, Blackheath, and Royal Observatory; on the 21st at Osborne; on the 26th at Halifax; and on the 30th at Halifax and Leeds.

Lightning was seen but thunder was not heard in July on the 7th and 8th at Halifax; on the 15th at Rugby and Halifax; and on the 28th at Torquay.

In August on the 13th at Royston, Liverpool, Halifax, Hull, Leeds, and Stonyhurst; on the 18th and 22nd at Torquay; on the 23rd at Torquay, Royston, and Halifax; on the 24th at Blackheath, Royal Observatory, and Liverpool; on the 26th at Halifax; on the 29th at Lowestoft and Stonyhurst; and on the 30th at Lowestoft.

In September on the 2nd and 3rd at Liverpool; on the 7th at Halifax; on the 15th at Guernsey and Torquay; on the 20th at Bath; on the 28th at Torquay, Salisbury, Blackheath, Royal Observatory, Oxford, Cambridge, Halifax, and Hull; and on the 29th at Torquay and Salisbury.

Solar halos were seen in July on the 1st at Torquay and Halifax; on the 2nd at Torquay, Oxford, and Halifax; on the 4th at Liverpool, Halifax, and Stonyhurst; on the 5th at Halifax; on the 10th at Liverpool; on the 15th at Torquay; on the 18th at Stonyhurst; on the 19th at Oxford; and on the 26th, 27th, and 28th at Torquay.

In August on the 7th at Torquay and Stonyhurst; on the 10th at Torquay, Liverpool, Halifax, and Stonyhurst; on the 11th at Torquay and Oxford; on the 17th at Halifax; on the 19th at Torquay; on the 22nd at Torquay, Oxford, Liverpool, and Halifax; on the 23rd at Liverpool and Stonyhurst; and on the 26th at Torquay, Liverpool, Halifax, and Stonyhurst.

In September on the 1st and 7th at Torquay; on the 12th at Oxford and Halifax; on the 13th at Oxford; on the 18th and 25th at Torquay; and on the 30th at Torquay and Oxford.

Lunar halos were seen in July on the 1st at Torquay; and on the 4th at Halifax.

In August on the 28th at Hereford.

In September on the 5th at Halifax; and on the 7th at Hull.

Hail fell in July on the 3rd at Halifax and Leeds.

In September on the 2nd at Stonyhurst and Carlisle; on the 3rd at Lowestoft, Liverpool, Halifax, and Carlisle; on the 21st at Blackheath and Royal Observatory; on the 28th at Hereford; on the 29th at Halifax; and on the 30th at Halifax and Stonyhurst.

Fog prevailed in July on the 11th at Bath; on the 12th at Torquay; on the 16th at Torquay and Bath; on the 21st at Bath; and on the 23rd at Royston and Lowestoft.

In August on the 2nd at Halifax and Leeds; on the 8th at Stonyhurst; on the 9th and 12th at Bath; on the 16th and 18th at Torquay; on the 19th at Blackheath and Royal Observatory; on the 22nd at Torquay, Blackheath, and Royal Observatory; on the 23rd at Torquay; on the 24th at Bath; on the 27th at Torquay; and on the 29th at Halifax.

In September on the 6th at Whitchurch; on the 7th at Bath; on the 8th at Torquay; on the 9th at Bath; on the 12th at Guernsey and Torquay; on the 18th at Oxford; on the 20th at Torquay, Bath, and Cambridge; on the 21st at Bath; on the 22nd at Torquay, Bath, and Cambridge; on the 23rd at Bath, Blackheath, Royal Observatory, and Rugby; and on the 26th at Blackheath, Royal Observatory, Cambridge, and Rugby.

The Observations have been reduced to Mean values by Glisher's Barometrical and Diurnal Range Tables, and the Hygrometrical results have been deduced from the seventh edition of his Hygrometrical Tables.

The highest temperatures of the air were at Cambridge, 81° 9; at the Royal Observatory, 81° 3; and at Whitechurch, 84° 0.

The lowest temperatures of the air were at Barnet, 25° 8; at Salisbury, 27° 0; and at Truro, 30° 0.

The greatest ranges of temperature were at Barnet, 55° 7; at Salisbury, 55° 0; and at Whitechurch, 53° 0.

The least ranges of temperature were at Llandudno, 39° 0; at Liverpool, 36° 6; and at Guernsey, 38° 4.

The greatest number of days of rain were at Llandudno and Liverpool, 53; and at Carlisle, 52.

The least number of days of rain were at Barnet, 29; at Royston, 32; and at Cambridge, 33.

The greatest falls of rain were at Carlisle, 14.82 inches; at Stonyhurst, 14.45 inches; and at Bath, 13.11 inches.

The least falls of rain were at Guernsey, 5.45 inches; at Hull, 5.86 inches; and at Leeds, 6.01 inches.

QUARTERLY METEOROLOGICAL TABLE for different PARALLELS of LATITUDE.

PARALLELS OF LATITUDE, &c.	Mean Pressure of dry Air reduced to the level of the Sea.	Mean of all Highest Read- ings of the Thermometer in the Quarter.	Mean of all Lowest. Range of Temperature.	Mean Monthly Range of Temperature.	Mean Daily Range of Temperature.	Mean Temperature of the Air.	Mean Temperature of the Dew Point.	Mean Elastic Force of Vapour.	Mean Weight of Vapour in a cubic foot of Air.	Mean additional Weight required for saturation.	Mean degree of Humidity.	Mean Weight of a cubic foot of Air.	Mean Reading of Max- imum in Rays of Sun.	Mean Reading of Min- imum on Grass.	Mean Estimated Strength.	WIND.				Mean Amount of Ozone	Mean Amount of Cloud.	Number of Days on which it fell.

QUARTERLY RETURN

OF

MARRIAGES, BIRTHS, AND DEATHS

REGISTERED IN THE DIVISIONS, COUNTIES, AND DISTRICTS OF

ENGLAND;

WITH CERTAIN DETAILED INFORMATION RELATING TO THE DEATHS IN EACH

REGISTRATION SUB-DISTRICT.

By Authority of the Registrar General.

Printed under the Superintendence of Her Majesty's Stationery Office,
AND SOLD BY EYRE AND SPOTTISWOODE, 9, EAST HARDING ST., FETTER LANE, E.C.

No. 176.] **Marriages**—*July, August, September, 1892.*
Births and Deaths—*October, November, December, 1892.* [Price 9d.]

*General Register Office, Somerset House,
28th January, 1893.*

The POPULATION of the UNITED KINGDOM in the middle of 1892 is estimated, on the basis of the recent enumerations, at 38,109,329 persons; that of England and Wales at 29,403,346, of Scotland at 4,063,451, and of Ireland at 4,642,532.

In the United Kingdom 271,554 *births* and 166,791 *deaths* were registered in the three months ending 31st December 1892. The natural increase of population was, therefore, 104,763. The registered number of persons married in the quarter ending 30th September 1892 was 139,336.

The birth-rate in the United Kingdom in the fourth quarter of 1892 was 28·3 and the death-rate 17·4 per 1000. The marriage-rate in the third quarter of 1892 was 14·5 per 1000.

The facts, in detail, concerning Scotland and Ireland are recorded in the Quarterly Returns of the Registrars-General for those parts of the United Kingdom,

ENGLAND AND WALES.

This Return comprises the BIRTHS and DEATHS registered in the 2111 registration sub-districts of England and Wales during the quarter ending 31st December 1892; and the MARRIAGES in 15,093 churches or chapels, in 10,952 registered places of worship unconnected with the Established Church, and in 633 Superintendent Registrars' Offices, in the three months ending 30th September 1892.

Marriages.

During the third quarter of 1892, the marriages of 116,470 persons were registered in England and Wales, giving an annual rate of 15·7 per 1000 of the estimated population. This rate is slightly below the rates in the third quarters of two next preceding years, but exceeds the mean rate in the corresponding periods of the ten years 1882-91 by 0·7 per 1000. In registration counties the lowest rates were 10·8 in Suffolk and in Rutlandshire, 10·9 in Westmorland, and 11·5 in the North Riding of Yorkshire; while the highest were 16·4 in Northamptonshire and in South Wales, 16·5 in Warwickshire, 16·6 in the West Riding of Yorkshire, 17·6 in Lancashire, and 19·5 in London.

Births.

The births registered in the fourth quarter of 1892 numbered 216,780, being in the proportion of 29·3 annually per 1000 living. Not only was this rate 1·9 per 1000 below the mean rate in the fourth quarters of the ten next preceding years, but, with one exception, namely in the fourth quarter of 1890, the birth-rate had not been so low in the corresponding period of any year since 1838. In registration counties the rates ranged from 23·0 in Sussex, 23·6 in Dorsetshire, and 23·8 in Westmorland, to 33·3 in South Wales, 34·1 in Monmouthshire, 34·6 in Staffordshire, and 35·0 in Durham.

In the thirty-three great towns the birth-rate was 31·0 per 1000. The lowest rates were 23·3 in Huddersfield, 24·5 in Brighton, 25·0 in Croydon, and 25·9 in Halifax; while the highest were 35·0 in Hull, 35·1 in West Ham, 35·2 in Gateshead, 35·4 in Sheffield, and 38·5 in Sunderland. In sixty-seven other large town districts the birth-rate was 30·5, while in the remainder of the country it was 27·9.

Excess of Births over Deaths, and Emigration.

The *natural increase* of the population of England and Wales, or the excess of births over deaths, which had amounted to 85,453, 57,678, and 79,558 in the fourth quarters of 1889, 1890, and 1891, was 87,896 last quarter.

It appears from returns issued by the Board of Trade that 51,584 emigrants embarked during the quarter from the various ports of the United Kingdom at which emigration officers are stationed. Distributing proportionally 1625 whose nationality was not distinguished, the emigrants of native origin numbered 40,673, and of these 30,401 were English, 4,524 Scotch, and 5,748 Irish, while those of foreign origin numbered 10,911. The proportions of emigrants to a million of the estimated population in the several portions of the United Kingdom were 1034 from England, 1113 from Scotland, and 1238 from Ireland. Compared with the averages in the fourth quarters of the next preceding three years, the proportions of emigrants from England and from Ireland showed a decrease, while that from Scotland showed an increase.

Prices and Pauperism.

During the fourth quarter of the year the average price of wheat was 27s. 5d. per quarter, the prices in the two preceding quarters having been 30s. 11d. and 29s. 3d. The mean wholesale prices of beef and mutton in the London market were 5½d. and 6½d. per lb. respectively; compared with the prices in the preceding quarter the price of beef showed a decrease of ½d., and that of mutton a decrease of ¼d. per lb. The average price of the best seaborne coal in the London market, put in barge from the collier in the Thames, was 16s. 7d. per ton, against 19s. 3d. and 18s. 1d. in the fourth quarters of the years 1890 and 1891. The mean price of 2½l. per cent. Consols was 97l. 3s. 7d., against 95l. os. 8d. in the fourth quarter of 1891. The minimum annual rate per cent. of discount charged at the Bank of England, which had been reduced from 2l. 10s. to 2l. on 28th April, was raised to 3l. on 20th October. The average minimum rate charged during the quarter was 2l. 15s. 10d. per cent.

[The returns of paupers relieved in England and Wales during the months of November and December had not been received at the time of going to press; the usual statement as to pauperism is therefore necessarily omitted.]

Meteorology.

Remarks on the meteorology of the quarter, based on observations at the Royal Observatory, Greenwich, and at various other stations, furnished by Mr. James Glaisher, F.R.S., will be found, with accompanying Tables, on pages 65-72. The mean reading of the barometer at Greenwich was 29·747 inches, being ·001 of an

inch below the mean reading in the fourth quarters of 51 years; the mean was below the average in October, but above it in November and December. The mean temperature of the air during the quarter was $42^{\circ}\cdot3$, being $1^{\circ}\cdot3$ below the average in the fourth quarters of 121 years. The mean was $4^{\circ}\cdot1$ below the average in October, $2^{\circ}\cdot5$ above it in November, and $2^{\circ}\cdot3$ below in December. The weather was very cold till towards the end of October, after which it was generally mild and damp, with very little sunshine, until the end of November; in the first two weeks of December, particularly in the second week, the weather was cold; in the third week the temperature was above the average, but on the 22nd a severe frost set in, which continued until the end of the year. At 32 stations of observation the mean temperature during the quarter ranged from $39^{\circ}\cdot3$ at Halifax, $39^{\circ}\cdot4$ at Wolverhampton, and $40^{\circ}\cdot2$ at Stonyhurst, to $45^{\circ}\cdot8$ at Barnstaple, $46^{\circ}\cdot3$ at Truro, and $48^{\circ}\cdot0$ in Guernsey.

The amount of rain measured during the quarter at the Royal Observatory, Greenwich, was $7\cdot23$ inches, being $0\cdot15$ of an inch above the average in the fourth quarters of 77 years; the amount was $1\cdot12$ inches above the average in October, while it was $0\cdot14$ of an inch below in November, and $0\cdot83$ of an inch below in December. At 32 stations of observation the amounts of rain measured during the quarter ranged from $5\cdot26$ inches at Hereford, $5\cdot30$ inches at Nottingham, and $6\cdot02$ inches at Whitchurch, to $12\cdot48$ inches at Eastbourne, $13\cdot06$ inches at Stonyhurst, and $14\cdot41$ inches in Guernsey.

The amount of bright sunshine recorded during the quarter at the Royal Observatory was $102\cdot6$ hours, or $12\cdot3$ per cent. of the total number of hours the sun was above the horizon, the mean proportion in the fourth quarters of the ten years 1882-91 having been $16\cdot1$ per cent. The amount of sunshine was below the average in each month of the quarter.

Deaths.

The deaths registered during the fourth quarter of 1892 numbered 128,884, being in the proportion of $17\cdot4$ deaths annually per 1000 persons living. This is lower than the rate in any other fourth quarter on record, and $1\cdot8$ per 1000 below the mean rate in the corresponding periods of the ten years 1882-91. In registration counties the rates ranged from $9\cdot2$ in Rutlandshire, $13\cdot0$ in Cambridgeshire, $13\cdot5$ in Huntingdonshire, and $13\cdot7$ in Surrey, to $18\cdot6$ in Staffordshire, $18\cdot7$ in Durham $19\cdot9$ in the East Riding of Yorkshire, and $20\cdot6$ in Lancashire.

The 128,884 deaths included 65,664 of males and 63,220 of females, the rate of mortality among males being $18\cdot3$, and that among females $16\cdot6$ per 1000 estimated to be living of each sex. The rate among males was $1\cdot9$, and that among females $1\cdot7$, below the respective mean rates in the ten preceding fourth quarters. Out of equal numbers living, the deaths of males were 110 to 100 deaths of females.

URBAN AND RURAL MORTALITY.—In the registration districts and sub-districts which are taken to represent approximately the urban portion of the country, and which contain a population estimated at about nineteen millions, the death-rate last quarter was $18\cdot3$ per 1000; while, in the remaining and chiefly rural population of about ten and a half millions, it was $15\cdot8$ per 1000. These rates were respectively $2\cdot2$ and $1\cdot2$ below the average rates in the ten preceding fourth quarters. Out of equal numbers living, the deaths in the urban districts were to those in the rural districts in the proportion of 116 to 100, the ratio in the ten preceding fourth quarters having been 121 to 100.

In the thirty-three great towns, with an aggregate population estimated at a little more than ten millions, the annual death-rate last quarter was $19\cdot4$ per 1000, the rates in the several towns ranging from $15\cdot0$ in Derby, $15\cdot2$ in Croydon, and $15\cdot9$ in Portsmouth, to $24\cdot1$ in Manchester, $24\cdot4$ in Bolton, and $27\cdot8$ in Salford. In London the rate was $18\cdot5$.

In sixty-seven other large town districts, with an aggregate population of nearly four millions, the death-rate was 17·5 per 1000, or 1·9 per 1000 below the rate in the great towns; in the remainder of England and Wales, after excluding these 100 towns, the rate was 16·1.

MORTALITY AT DIFFERENT AGES.—Of the 128,884 deaths registered last quarter, 30,942 were of infants under one year of age, 62,441 of persons aged between one and 60 years, and 35,501 of persons aged 60 years and upwards.

The mortality of infants under one year of age was in the proportion of 143 deaths to 1000 births registered, being 3 per 1000 below the mean proportion in the ten preceding fourth quarters. The proportion was less than 100 to 1000 births in Hertfordshire, Huntingdonshire, Cambridgeshire, Wiltshire, Herefordshire, and Rutlandshire, but reached 170 in Staffordshire and in Lancashire, and 175 in Nottinghamshire. In the thirty-three great towns the mean proportion was 154 per 1000, ranging from 110 in Croydon, 121 in Plymouth, and 125 in Portsmouth, to 185 in Nottingham and in Oldham, 190 in Preston, 192 in Swansea, and 203 in Salford. In sixty-seven other large town districts the infant mortality averaged 160 per 1000 births, the lowest proportions being 82 in Dover, 88 in Hornsey, 92 in Coventry, and 98 in Oxford, while the highest were 206 in Aberdare, 208 in Worcester and in Merthyr Tydfil, 223 in Yarmouth, and 237 in Middlesbrough. In the remainder of the country, after excluding these 100 towns, the infant mortality was 130 per 1000 births registered.

The mortality of persons aged between one and 60 years was at the rate of 9·4 deaths annually per 1000 of the estimated population at these ages, being 1·1 per 1000 below the mean rate in the ten preceding fourth quarters. In the thirty-three great towns the rate was 11·3 per 1000; the lowest rates being 7·8 in Derby, 8·1 in Norwich, and 8·7 in Halifax, and the highest 15·1 in Manchester, 16·0 in Bolton, and 18·6 in Salford.

Among persons aged 60 years and upwards the mortality was at the annual rate of 64·9 per 1000 of the estimated population at these ages, being 7·2 below the mean rate in the ten preceding fourth quarters. In the thirty-three great towns the rate was 74·0 per 1000, ranging from 52·7 in Croydon, 54·4 in Cardiff, and 59·1 in Leicester, to 87·4 in Manchester, 88·7 in Bolton, and 110·7 in Blackburn.

Compared with the respective rates in the ten next preceding fourth quarters, the mortality of infants under one year of age was 2 per cent., that of persons between one and 60 years of age 10 per cent., and that of persons aged 60 years and upwards 10 per cent., below the average.

ZYMOTIC DISEASES.—The 128,884 deaths from all causes included—

3650	attributed to measles,
2165	„ diarrhœa,
1868	„ whooping-cough,
1848	„ scarlet fever,
1842	„ diphtheria,
1374	„ fever,
165	„ small-pox.

Thus 12,912 deaths were ascribed to these zymotic causes, corresponding to an annual rate of 1·74 per 1000 living, the average of the rates in the ten preceding fourth quarters having been 2·13.

The deaths ascribed to *measles* numbered 3650, and corresponded to an annual rate of 0·49 per 1000, which had also been the average rate in the ten preceding fourth quarters. The rate did not reach 0·10 per 1000 in Huntingdonshire, Cambridgeshire, Cornwall, Somersetshire, Herefordshire, the North Riding of Yorkshire, or Monmouthshire, while in Westmorland it was 1·20, in the East Riding of Yorkshire 1·45, and in Buckinghamshire 2·06. In the 33 great towns

the rate was 0·64; but while there were no deaths from this disease in Swansea or Halifax, and only one each in Wolverhampton, Norwich, Burnley, and Blackburn, the rate was 1·29 in Cardiff, 1·35 in West Ham, 1·38 in Bolton, 1·62 in Croydon, 1·70 in Oldham, 2·76 in Hull, 3·48 in Brighton, and 4·51 in Salford. In sixty-seven other large town districts the rate was 0·50, while in the remainder of England and Wales it was 0·39. Among districts and sub-districts in which the mortality from measles was excessive were Carshalton, Reading, High Wycombe, Aylesbury, Stratford, Poole, Evesham, Hinckley, Lincoln Home, Rastrick, Brighouse, and Llanelly.

The deaths ascribed to *diarrhœa* numbered 2165, corresponding to an annual rate of 0·29 per 1000 living, while the average of the rates in the ten preceding fourth quarters had been 0·42. In the thirty-three great towns the rate was 0·36, varying from 0·05 in Croydon, 0·06 in Huddersfield, and 0·08 in Newcastle-upon-Tyne, to 0·72 in Gateshead, 0·73 in Blackburn, and 1·32 in Preston. In sixty-seven other large town districts the rate was 0·31, while in the remainder of England and Wales it was 0·26.

The deaths ascribed to *whooping-cough* numbered 1868, and corresponded to an annual rate of 0·25 per 1000 living, the average of the rates in the ten preceding fourth quarters having been 0·34. The highest rates in registration counties were 0·59 in Warwickshire and 0·63 in Nottinghamshire. In the thirty-three great towns the rate was 0·28, rising, however, to 0·86 in Birmingham and 0·96 in Salford. In sixty-seven other large town districts the rate was 0·34, while in the remainder of England and Wales it was 0·21. Among districts and sub-districts in which whooping-cough appears to have been specially prevalent were Yarmouth Northern, Frome, Leek, Ashover, Prestbury, Todmorden, Doncaster, and Walmgate.

The deaths ascribed to *scarlet fever* were 1848, and corresponded to an annual rate of 0·25 per 1000 living, while the average of the rates in the ten preceding fourth quarters had been 0·37. The rate was 0·46 in North Wales, 0·47 in South Wales, and 0·93 in Monmouthshire, these rates exceeding those in any other registration county. In the thirty-three great towns the rate was 0·33; but while it did not exceed 0·10 in Wolverhampton, Derby, Birkenhead, or Halifax, it was 1·07 in Preston and 1·31 in Plymouth. In sixty-seven other large town districts the rate was 0·26, while in the remainder of England and Wales it was 0·19. Among districts and sub-districts in which scarlet fever was specially fatal were Portland, Bathwick, Warrington, Skipton, Lower Merthyr Tydfil, Llanelly, and Mold.

Under *diphtheria* 1842 deaths were registered, corresponding to an annual rate of 0·25 per 1000 living, the average of the rates in the ten preceding fourth quarters having been 0·20. The rate was higher than in any preceding quarter for more than twenty years. In registration counties the rate varied from under 0·10 in Huntingdonshire, Dorsetshire, Somersetshire, Herefordshire, Shropshire, Staffordshire, Rutlandshire, and the East and North Ridings of Yorkshire, to 0·47 in Surrey, 0·55 in Oxfordshire, and 0·57 in Essex. In the thirty-three great towns the rate was 0·36; but while no death from this disease was recorded in Wolverhampton or Blackburn, and only one each in Oldham and Gateshead, the rate was 0·53 in Cardiff, 0·55 in Brighton, 0·60 in London, and 0·68 in Croydon. In sixty-seven other large town districts the rate was 0·17, while in the remainder of England and Wales it was 0·20. Among districts and sub-districts in which the mortality from diphtheria was excessive were Mortlake, Battle, Hursley, Hitchin, Grays, Prittlewell, Manningtree, Rattlesden, Fleetwood, Houghton-le-Spring, and Chirbury.

To "*fever*," including typhus, enteric fever, and simple or ill-defined forms of continued fever, 1374 deaths were attributed, corresponding to an annual rate of 0·19 per 1000, the average rate in the ten preceding fourth quarters having been 0·28. Among registration counties the lowest rates, in no case exceeding 0·05, were in Oxfordshire, Northamptonshire, Huntingdonshire, Rutlandshire, and Cumberland, while the highest were 0·30 in Monmouthshire, 0·31 in Durham, 0·33

in the East Riding of Yorkshire, and 0·37 in Nottinghamshire. In the thirty-three great towns the rate was 0·20, but while it was below 0·10 in West Ham, Brighton, Birmingham, Oldham, Huddersfield, Sheffield, Gateshead, and Newcastle-upon-Tyne, it was 0·61 in Swansea, 0·63 in Preston, and 0·69 in Sunderland. In sixty-seven other large town districts the rate was 0·21, while in the remainder of England and Wales it was 0·17. Among districts and sub-districts in which "fever" appears to have been specially prevalent were Great Grimsby, Newark, Elland, Walmgate, and Mold.

The deaths from *small-pox* were 165, and more numerous than in any quarter since the June quarter of 1888. Of these 165 deaths, 71 occurred in Lancashire, including 50 in the registration district of Warrington and 10 in that of Oldham, while 58 occurred in the West Riding of Yorkshire, including 18 in Halifax, 11 in Dewsbury, and 7 in the Leeds registration districts. Of the other counties, those with the largest numbers of deaths were Derbyshire and Cheshire, each with 6, and Leicestershire with 5, all in the town of Leicester.

The following Table shows the relative mortality from each of the above-mentioned zymotic diseases in England and Wales, in the thirty-three great towns, in sixty-seven other considerable town districts, and in the remainder of the country :—

ANNUAL DEATH-RATE per 1,000 from ALL CAUSES, and from several ZYMOTIC DISEASES, during the Fourth Quarter of 1892.

CERTIFICATION OF CAUSES OF DEATH.—Of the 128,884 deaths in England and Wales, the causes of 117,001, or 90·8 per cent., were duly certified by registered medical practitioners, and of 8146, or 6·3 per cent., by coroners after inquest; while the causes of the remaining 3737, or 2·9 per cent., were not certified, the mean proportion of uncertified deaths in the ten preceding fourth quarters having been 3·4 per cent. While, however, the proportion did not exceed 1·0 per cent. in Rutlandshire, Middlesex, and Wiltshire, it reached 4·7 per cent. in Derby, 4·8 in Kent, 5·3 in Hereford, 5·4 in North Wales, and 5·7 in Warwickshire. In the thirty-three great towns the proportion was 2·2 per cent., ranging from 0·0 in Croydon, 0·2 in Birkenhead, and 0·6 in Derby, to 5·1 in West Ham, 5·4 in Blackburn, 5·6 in Liverpool, and 6·6 in Birmingham.

VIOLENT DEATHS.—To different forms of violence 4510 deaths were referred, corresponding to an annual rate of 0·61 per 1000, the average rate in the ten preceding fourth quarters having been also 0·61. In registration counties the rates ranged from 0·00 in Rutlandshire, 0·25 in Cornwall, 0·27 in Oxfordshire, and 0·36 in Leicestershire, to 0·72 in the East Riding of Yorkshire, 0·75 in Lancashire, 0·85 in Monmouthshire, and 1·14 in South Wales. In the thirty-three great towns the rate was 0·72 per 1000, varying from 0·26 in Croydon, 0·29 in Halifax, and 0·31 in West Ham, to 0·95 in Manchester, 0·98 in Blackburn, 1·03 in Cardiff, and 1·42 in Liverpool.

INQUESTS.—Inquests were held concerning 8146, or 6·3 per cent., of the total deaths, the mean proportion in the ten preceding fourth quarters having been 5·5. In the thirty-three great towns the proportion of inquest cases to total deaths was 7·5 per cent., the lowest per-centages being 1·7 in Halifax, 3·2 in Preston, and 3·3 in West Ham and in Birmingham, while the highest were 9·5 in Newcastle-on-Tyne, 10·0 in Cardiff, and 11·2 in Derby.

DEATHS IN PUBLIC INSTITUTIONS.—Of the total deaths registered in England and Wales, 15,594, or 12·1 per cent., occurred in workhouses, hospitals, and public lunatic asylums, the proportion in the ten preceding fourth quarters having been 10·8 per cent. In the thirty-three great towns the proportion of deaths in such institutions was 18·8 per cent., ranging from 5·3 in Gateshead, 7·0 in Preston, 7·1 in Swansea, and 7·2 in West Ham, to 17·8 in Liverpool, 18·5 in Manchester, and 27·2 in London.

EDINBURGH, GLASGOW, AND DUBLIN.—The death-rate in Edinburgh was 23·9, in Glasgow 22·8, and in Dublin 24·4, against 18·5 in London.

COLONIAL AND FOREIGN CITIES.—A summary of the Weekly Returns with which the Registrar-General is favoured by various local authorities abroad, shows that the deaths last quarter in twenty-nine Colonial and Foreign cities, with an aggregate population of about eighteen and a half millions, were equal to an annual rate of 21·3 per 1000 living.

In the twenty European cities the mean death-rate was 19·8 per 1000, against 19·4 per 1000 in the thirty-three great English towns. In Paris the rate was 19·5, in Berlin 17·6, and in Vienna 20·4, the rate in London being 18·5. Among the thirty Colonial and Foreign cities the lowest death-rates were 15·9 in Christiania, 17·4 in Stockholm and in Dresden, and 17·6 in Berlin and in Turin; while the highest were 36·7 in Alexandria, 41·6 in Cairo, and 45·3 in Madras. *Small-pox* caused 72 deaths in Prague, 19 in New York, and 14 in Paris. The mortality from *measles* was proportionally highest in Madras, the Hague, and Vienna; from *scarlet fever* in Rotterdam, Stockholm, and Christiania; from *diphtheria* in Paris, Copenhagen, and Stockholm, and in the German, Austrian, and most of the American cities; and from *whooping-cough* in Rotterdam and Copenhagen. The mortality from *fever* showed a marked excess in the Indian cities, in Rome, Cairo, and New Orleans, and that from *diarrhoeal diseases* in Madras, Paris, Stockholm, Cairo, Alexandria, and most of the German, Austrian, and Italian cities.

The Year 1892.

According to the quarterly returns furnished by the local Registrars, 897,270 births and 559,090 deaths were registered in England and Wales during the year 1892. The natural increase of population, by excess of births over deaths, was thus 338,180, against an average increase in the previous five years of 345,196.

The returns issued by the Board of Trade show that 321,515 emigrants embarked during the year from the various ports in the United Kingdom at which emigration officers are stationed. Distributing proportionately 4003 whose nationality was not stated, the emigrants of native origin numbered 213,705, of whom 136,725 were English, 23,909 Scotch, and 53,071 Irish, while those of foreign origin numbered 107,810. Compared with the figures for 1891 the number of English emigrants showed a decrease of 2·6 per cent., the number of Scotch emigrants an increase of 6·2 per cent., and the number of Irish emigrants a decrease of 9·4 per cent.

The birth-rate in England and Wales during the year was 30·5 per 1000 living, a rate lower than that recorded in any previous year excepting 1890, and 1·7 per 1000 below the mean rate in the ten years 1882–91.

The death-rate, which in the preceding four years had been successively 18·1, 18·2, 19·5, and 20·2 per 1000, fell again last year to 19·0, and was 0·3 per 1000 below the mean rate in the ten years 1882-91.

Of the 559,090 deaths registered last year, 132,603 were of infants under one year of age, 261,890 of persons aged between one and 60 years, and 164,597 of persons aged 60 years and upwards. The proportion of deaths under one year of age to registered births was 148 per 1000, the mean proportion in the ten years 1882-91 having been 144. The death-rate among persons aged between one and 60 years was 9·9 per 1000 estimated to be living, and that among persons aged 60 years and upwards was 75·5 per 1000.

The deaths in 1892 included 14,291 from diarrhœa, 13,167 from measles, 12,639 from whooping-cough, 5783 from diphtheria, 5524 from scarlet fever, 4202 from "fever" (including typhus, enteric fever, and ill-defined forms of continued fever), and 426 from small-pox. Thus 56,032 deaths were attributed to these zymotic diseases, corresponding to a rate of 1·90 per 1000 living, against 2·22, 2·14, and 1·90 in the immediately preceding three years.

Inquests were held in 31,892 cases, or 5·7 per cent. of the total deaths; and in 15,101 cases, or 2·7 per cent. of the total, the causes were not certified either by registered medical practitioners or by coroners. The proportion of inquest cases was somewhat higher than in 1891, while the proportion of uncertified cases remained stationary.

To different forms of violence 18,244 deaths were referred, being at the rate of 0·62 per 1000 living, against 0·65 and 0·67 in the preceding two years.

The foregoing statistics for the year 1892 are derived from returns furnished quarterly by the local registrars, and are therefore subject to revision when the causes of death and other details shall have been finally classified and tabulated for publication in the Registrar-General's Fifty-fifth Annual Report, now in course of preparation.

PRELIMINARY TABLES.

TABLE I.—**Marriages, Births, and Deaths** registered in **England and Wales** in the Years **1882-92**, and in each Quarter of those Years.

* Furnished by the Chief Cashier of the Bank of England.

† As published by the Comptroller of Corn Returns to the Board of Trade.

‡ These are the average prices at which the best seaborne Newcastle, Sunderland, and Hartlepool coals are put in barge from the collier in the Thames; the difference between these prices and those charged to the consumer represents the cost of distribution and merchant's profit. The figures are derived from returns with which the Registrar-General has been favoured by the Mineral Statistics Department, Home Office.

§ Sunderland and Hartlepool coal only.

|| For Sunderland and Hartlepool coal during the month of June only.

* The Registration or Union Counties consist of groups of Registration Districts, which are generally co-extensive with the Poor Law Unions. A District which extends into two or more Geographical Counties is included entirely in that Registration County in which the principal town of the district, or the greater part of the population, is located. The boundaries of Registration or Union Counties therefore differ more or less from the boundaries of Geographical Counties.

b The averages of Marriages and Births are given only for the Eleven Divisions and for Registration Counties.

c See page 14, note b.

d See Foot note † page 29.

NOTE.—The Registrars alone must be considered responsible for the accuracy of the figures shown in their Returns, and for the opinions expressed in the foot notes.

REGISTRATION COUNTIES, and REGISTRATION DISTRICTS of ENGLAND; Births and under one year of Age, and of PERSONS aged 60 years and upwards from ALL CAUSES; CROUP, COUGHS, MEASLES, FEVER, DIARRHŒA, CHOLERA, and VIOLENCE, also INQUEST CASES and DEATHS in DIVISIONS, REGISTRATION COUNTIES, REGISTRATION DISTRICTS, and REGISTRATION DISTRICTS of ENGLAND.

a The Registration Districts, 683 in number, are collections of contiguous Parishes or Places, combined for purposes connected with the Registration of Births, Deaths, and Marriages, and are nearly always identical with the Poor Law Unions of the same names; they are here arranged topographically under the Registration Counties.

b These areas, which were partly revised by the Ordnance Survey Department, are the same as those published in the Census Report of 1881. They do not include space occupied by fresh-water or tidal water of rivers and creeks.

* See page 14, note b.

* The Registration Sub-districts (2111 in number) are sub-divisions of the Registration Districts in which the Births and Deaths are registered by Registrars severally appointed for that purpose. The letter W denotes that the Sub-district contains within its limits a Workhouse belonging to the District or Union; H indicates Hospital or Infirmary; and L Lunatic Asylum.

For London, the numbers of Births and Deaths, as well as the details given under "Infants under 1 year of age" and the twelve subsequent headings, in this Table, are derived from the Weekly Returns made by the Registrars, and relate to 13 weeks ending 31st December 1892.

* 142: 1-4.—On the 1st of October 1892, the parishes comprised in the Registration District of Wycombe were re-arranged into four sub-districts set out above. The parish of Stokenchurch (area 5,919 acres) is partly in the sub-district of Marlow (142: 2) and partly in that of Stokenchurch (142: 4). The separate areas of the two parts not having yet been ascertained, the entire area of the parish is included in the Stokenchurch sub-district.

† 142: 1.—Of the 27 deaths from measles, 2 were registered in October, 9 in November, and 16 in December; during the first twelve days of January 15 more deaths were referred to this disease.

‡ 142: 3.—Of the 4 deaths from measles, 3 occurred in Aylesbury Urban Sanitary District.

§ 142: 2.—The 10 deaths from diphtheria occurred within the borough of Wingrave.

III.—SOUTH MIDLAND COUNTIES.—REGISTRATION SUB-DISTRICTS—continued.

* 208 : 2.—The 6 deaths from diphtheria occurred in the parish of Felsham.

† Owing to recent changes of boundary the separate averages for the sub-districts of Lowestoft, Belton, and 'Gorleston' cannot be shown. The number bracketed against Lowestoft and Belton is the average for the three sub-districts named.

* On 1st January 1892 the Registration District of Leicester was extended under the provisions of the Leicester Extensions Act, 1891, cap. c., by the addition of parts of the following sub-districts:—Billesdon (402: 1), Wigston (403: 1), Enderby (403: 2), and Rothley (403: 3). The corrected populations of the several districts and sub-districts affected are given in the above Table, but the areas are shown as they existed prior to the change. The figures in the column for averages also refer to the several sub-districts as they existed prior to the change.

† 402: 2.—The 18 deaths from measles occurred in Hinckley Urban Sanitary District.

‡ 403: 2.—Of the 12 deaths from measles, 9 occurred in the parish of Ibstock and 3 in the parish of Markfield.

§ 407: 1.—The 14 deaths from zymotic diseases occurred within the borough of Loughborough.

VII.—NORTH MIDLAND COUNTIES.—REGISTRATION SUB-DISTRICTS—continued.

METEOROLOGY OF ENGLAND.

REMARKS ON THE WEATHER DURING THE QUARTER ENDING DECEMBER 31ST, 1892.

By JAMES GLAISHER, Esq., F.R.S., &c.

The weather in October was very cold till towards the end, when there were three or four warm days, with frequent rain throughout the month. The temperature of the air was constantly below the average to the 27th; on some days the amount exceeded 10° . The atmospheric pressure was below the average on every day excepting the 11th, 12th, and 17th to 20th days. The fall of rain was above the average. In Yorkshire the fall was especially heavy on the 13th, 14th, 15th, and 16th. There were great floods in Yorkshire, causing considerable loss to farmers, and the flooding of many hundreds of houses in many of the towns in Yorkshire.

The weather in November was mild and damp, with very little sunshine. The temperature of the air was generally above the average, excepting from the 18th to the 25th. The atmospheric pressure was below its average till the 6th, and from the 12th to the 16th, and above on other days. Rain fell frequently in small quantities.

The weather in December was dry, cold, and foggy. The temperature of the air was mild, and above the average from the 15th to the 21st. Till the 14th the temperature was below the average, and particularly so from the 4th to the 10th. On the 22nd frost set in with severity, and continued to the end of the month, the average deficiency of temperature for these 10 days being $9^{\circ} \cdot 1$. The lowest temperature in the month occurred on the 27th or 28th. At Guernsey the lowest temperature was $31^{\circ} \cdot 9$; at stations south of latitude 51° it varied from 20° at Truro to 24° at Eastbourne; between 51° and 52° it varied from 11° at Salisbury and Barnet to 19° at Barnstaple; between 52° and 53° it varied from 10° at Rugby to 23° at Lowestoft; between 53° and 54° it varied from $14^{\circ} \cdot 5$ at Halifax to 25° at Llandudno. At Carlisle Mr. Cartmel registered -1° . At Stonyhurst the lowest was $14^{\circ} \cdot 3$; at Carlisle the minimum on grass was -9° .

The atmospheric pressure was generally below the average from the 3rd to the 13th, and from the 29th to the 31st, and generally above on all other days.

The rainfall was below the average, and very little fell during the latter half of the month.

About London the mean daily temperature of the air was below its average from October 1st to the 27th, being particularly so on the 18th, 19th, 24th, and 26th, when it was as much as $10^{\circ} \cdot 6$, 11° , $11^{\circ} \cdot 3$, and $12^{\circ} \cdot 1$ respectively below, and on several other days it was as much as 8° and 9° below; the mean daily deficiency for the 27 days being 7° ; from October 28th to November 17th it was generally above its average, being particularly so on the 28th and 29th of October, and on the 14th, 15th, and 16th of November, when it was as much $8^{\circ} \cdot 3$, $9^{\circ} \cdot 4$, $9^{\circ} \cdot 4$, $10^{\circ} \cdot 4$, and $8^{\circ} \cdot 0$ respectively above; the mean daily excess for the 21 days ending November 17th being $2^{\circ} \cdot 8$; from November 18th to the 25th it was generally below, the mean daily deficiency being $1^{\circ} \cdot 5$; from November 26th to the 29th it was above, the mean daily excess being $3^{\circ} \cdot 1$; from November 30th to December 14th it was generally below, being particularly so on the 5th and 6th of December, when it was as much as $10^{\circ} \cdot 4$ and $9^{\circ} \cdot 1$ respectively below, the mean daily deficiency for the 15 days ending December 14th being $4^{\circ} \cdot 7$; from December 15th to the 21st it was above, being as much as $10^{\circ} \cdot 3$ above on the 15th, the mean daily excess being $4^{\circ} \cdot 8$; and from December 22nd to the 31st it was below its average, being particularly so from the 24th to the 30th, the mean daily deficiency for these 7 days being $10^{\circ} \cdot 8$, and the mean daily deficiency for the 10 days ending December 31st being $9^{\circ} \cdot 1$.

The mean temperature of the air for October was $45^{\circ} \cdot 4$, being $4^{\circ} \cdot 1$ and $4^{\circ} \cdot 4$ below the average of 121 and 51 years respectively; it was $5^{\circ} \cdot 5$, $3^{\circ} \cdot 9$, and $3^{\circ} \cdot 2$ lower than in 1891, 1890, and 1889 respectively, and there were only 7 instances of as low or lower temperature back to the year 1771, viz. :—

1887 it was $45^{\circ} \cdot 0$	1817 it was $45^{\circ} \cdot 0$	1782 it was $45^{\circ} \cdot 2$
1881 " $45^{\circ} \cdot 3$	1786 " $44^{\circ} \cdot 7$	
1842 " $45^{\circ} \cdot 4$	1784 " $43^{\circ} \cdot 9$	

The mean temperature of the air for November was $44^{\circ} \cdot 9$, being $2^{\circ} \cdot 5$ and $1^{\circ} \cdot 4$ above the average of 121 and 51 years respectively; it was $1^{\circ} \cdot 8$, $1^{\circ} \cdot 7$, and $0^{\circ} \cdot 6$ higher than in 1891, 1890, and 1889 respectively.

The mean temperature of the air for December was $36^{\circ} \cdot 7$, being $2^{\circ} \cdot 3$ and $2^{\circ} \cdot 9$ below the average of 121 and 51 years respectively; it was $4^{\circ} \cdot 4$ lower than in 1891, $6^{\circ} \cdot 9$ higher than in 1890, and $0^{\circ} \cdot 9$ lower than in 1889.

The mean high day temperature of the air for October was $53^{\circ} \cdot 1$, being $4^{\circ} \cdot 7$ below the average of 51 years; it was $5^{\circ} \cdot 7$, $4^{\circ} \cdot 4$, and $3^{\circ} \cdot 3$ lower than in 1891, 1890, and 1889 respectively; and there were only three instances of as low or lower mean high day temperature back to the year 1841, viz. :—

1887 it was $52^{\circ} \cdot 6$	1885 it was $52^{\circ} \cdot 4$	1881 it was $52^{\circ} \cdot 4$
----------------------------------	----------------------------------	----------------------------------

The mean high day temperature of the air for November was $50^{\circ} \cdot 0$, being $1^{\circ} \cdot 2$ above the average of 51 years; it was $1^{\circ} \cdot 8$, $0^{\circ} \cdot 7$, and $0^{\circ} \cdot 3$ higher than in 1891, 1890, and 1889 respectively.

The mean high day temperature of the air for December was $40^{\circ} \cdot 8$, being $3^{\circ} \cdot 6$ below the average of 51 years; it was $5^{\circ} \cdot 7$ lower than in 1891; $7^{\circ} \cdot 5$ higher than in 1890; and $0^{\circ} \cdot 9$ lower

than in 1889; and there were only nine instances of as low or lower mean high day temperature back to the year 1841, viz. :—

1890 it was 33°·3	1874 it was 37°·9	1853 it was 38°·8
1879 " 37°·4	1870 " 38°·0	1846 " 37°·2
1878 " 37°·4	1860 " 40°·6	1844 " 36°·8

The mean low night temperature for October was 39°·1, being 4°·1 below the average of 51 years; it was 4°·9, 2°·7, and 3°·1 lower than in 1891, 1890, and 1889 respectively; and there were only three instances of as low or lower low night temperature back to the year 1841, viz. :—

1888 it was 37°·7	1887 it was 38°·3	1881 it was 39°·0
-------------------	-------------------	-------------------

The mean low night temperature for November was 39°·5, being 1°·9 above the average of 51 years; it was 1°·8, 2°·3, and 0°·7 higher than in 1891, 1890, and 1889 respectively.

The mean low night temperature for December was 32°·0, being 2°·8 below the average of 51 years; it was 3°·4 lower than in 1891, 6°·8 higher than in 1890, and 0°·5 lower than in 1889.

NOTE.—In reading this table it will be borne in mind that the plus sign (+) signifies above the average, and the minus sign (-) signifies below the average.

Average duration of the different directions of the wind referred to eight points of the compass, and duration in days of each direction in each month in the quarter, were as follows:—

Direction of Wind.	OCTOBER.			NOVEMBER.			DECEMBER.		
	1892.	Average.	Departure from Average.	1892.	Average.	Departure from Average.	1892.	Average.	Departure from Average.
	d.	d.	d.	d.	d.	d.	d.	d.	d.
N.W.	3	2½	+ ½	1	2½	- 1½	6	2½	+ 3½
N.	4	3½	+ ½	1	4½	- 3½	1	3	- 2
N.E.	5	3	+ 2	8	4	+ 4	3	2½	+ ½
E.	2	1½	+ ½	4	2½	+ 1½	4	2	+ 2
S.E.	3	2	+ 1	3	2½	+ ½	2	2	0
S.	2	4	- 2	4	5	0	3	3½	- ½
S.W.	8	10	- 2	5	3½	- 3½	8	11	- 3
W.	4	4½	- ½	2	2½	- ½	4	4½	- ½

The sign (+) denotes excesses over averages; the numbers affected by this sign in October are N.E., S.E., N.W., N., and E.; in November are N.E., E., and S.E.; and in December are N.W., E., and N.E.

The sign (-) denotes deficiencies below averages; the numbers affected by this sign in October are S., S.W., and W.; in November are S.W., N.W., N., and W.; and in December are S.W., N., S., and W.

The mean daily range for October was $14^{\circ}0$, being $0^{\circ}6$ smaller than the average; in November it was $10^{\circ}5$, being $0^{\circ}9$ smaller than the average; and in December it was $8^{\circ}8$, being $0^{\circ}6$ smaller than the average.

The mean temperature of the air for October was $10^{\circ}9$ colder than in September; in November it was $0^{\circ}5$ colder than in October; and in December it was $8^{\circ}2$ colder than in November.

(From the preceding 51 years' observations the decrease from September to October is $7^{\circ}3$; from October to November is $6^{\circ}3$; and from November to December $3^{\circ}9$.)

From September to October there is a decrease of $0^{\circ}3$ at stations south of 51° ; between 51° and 53° of 1° ; and at stations north of this parallel of $8^{\circ}8$.

From October to November there was an increase of $0^{\circ}1$ at stations south of 51° ; a decrease of $0^{\circ}3$ between 51° and 52° ; and at stations north of this parallel a decrease of $0^{\circ}9$.

From November to December there was a decrease of $6^{\circ}2$ at stations south of 51° ; between 51° and 53° of $8^{\circ}3$; and at stations north of this parallel of $7^{\circ}6$.

The mean reading of the barometer, at the height of 159 ft. above the sea level, for the month of October was 29.545 ins., being $0^{\circ}169$ in. below the average of 51 years; it was $0^{\circ}063$ in., and $0^{\circ}376$ in. lower than in 1891 and 1890 respectively; and $0^{\circ}024$ in. higher than in 1889; and there were only eight instances of as low or lower reading back to the year 1841, viz. :—

1889 it was 29.521 ins.	1865 it was 29.440 ins.	1846 it was 29.516 ins.
1885 " 29.530 "	1859 " 29.523 "	1841 " 29.436 "
1872 " 29.533 "	1855 " 29.527 "	

The mean reading of the barometer for November was 29.881 ins., being $0^{\circ}142$ in. above the average of 51 years; it was $0^{\circ}211$ in. and $0^{\circ}180$ in. higher than in 1891 and 1890 respectively; and $0^{\circ}162$ in. lower than in 1889; and there were only eight instances of as high or higher reading back to the year 1841, viz. :—

1889 it was 30.043 ins.	1867 it was 30.119 ins.	1853 it was 29.941 ins.
1884 " 29.978 "	1857 " 29.942 "	1847 " 29.905 "
1879 " 30.034 "	1856 " 29.902 "	

The mean reading of the barometer for December was 29.816 ins., being $0^{\circ}023$ in. above the average of 51 years; it was $0^{\circ}012$ in. higher than in 1891, and $0^{\circ}035$ in., and $0^{\circ}194$ in., lower than in 1890 and 1889 respectively.

From September to October there was a decrease of atmospheric pressure of $0^{\circ}27$ in. at stations south of 53° ; and at stations north of this parallel of $0^{\circ}20$ in.

From October to November there was an increase of $0^{\circ}28$ in. at stations south of 51° ; between 51° and 53° of $0^{\circ}32$ in.; and at stations north of this parallel of $0^{\circ}28$ in.

From November to December there was a decrease of $0^{\circ}04$ in. at stations south of 51° ; between 51° and 52° of $0^{\circ}06$ in.; between 52° and 53° of $0^{\circ}09$ in.; and at stations north of this parallel of $0^{\circ}05$ in.

About London the atmospheric pressure was generally below its average till October 26th, the mean daily deficiency being $0^{\circ}22$ in.; from October 17th to the 20th it was above, the mean daily excess being $0^{\circ}23$ in.; from October 21st to November 6th it was generally below, the mean daily deficiency being $0^{\circ}22$ in.; from November 7th to the 11th it was above, the mean daily excess being $0^{\circ}20$ in.; from November 12th to the 16th it was below, the mean daily deficiency being $0^{\circ}13$ in.; from November 17th to December 2nd it was generally above, being particularly so on the 27th and 28th of November when it was as much as $0^{\circ}52$ in. and $0^{\circ}53$ in. respectively above, the mean daily excess for the 16 days ending December 2nd being $0^{\circ}24$ in.; from December 3rd to the 13th it was generally below, being particularly so on the 11th, when it was as much as $0^{\circ}53$ in. below, the mean daily deficiency being $0^{\circ}19$ in.; from December 14th to the 28th it was generally above, the mean daily excess being $0^{\circ}10$ in.; and from December 29th to the 31st it was below its average, the mean daily deficiency being $0^{\circ}21$ in.

Thunderstorms occurred in October on the 1st at Halifax; on the 2nd at Guernsey; on the 3rd at Llandudno; on the 4th at Lowestoft; and on the 12th, 13th, and 14th at Guernsey.

No thunderstorms were reported in either November or December.

Thunder was heard but lightning was not seen in October on the 4th at Llandudno; on the 5th at Liverpool and Carlisle; on the 8th at Royston; and on the 20th at Carlisle.

No thunder was reported to have been heard in either November or December.

Lightning was seen but thunder was not heard in October on the 1st at Torquay, Bath, Oxford, and Hereford; on the 2nd at Torquay and Hereford; on the 3rd at Hereford, Liverpool, Halifax, Stonyhurst, and Carlisle; on the 4th at Hereford; on the 13th, 14th, and 15th at Torquay; and on the 21st at Liverpool.

In November on the 15th at Torquay.

Solar halos were seen in October on the 3rd at Oxford; on the 4th at Torquay and Oxford; on the 8th and 15th at Oxford; on the 24th at Torquay; on the 26th at Torquay, Oxford, and Halifax; on the 30th at Torquay and Oxford; and on the 31st at Torquay.

In November on the 1st at Halifax; on the 5th at Torquay and Oxford; on the 19th at Oxford; on the 20th at Torquay; on the 21st at Oxford; and on the 25th at Halifax.

In December on the 2nd at Torquay, Oxford, and Halifax; on the 5th and 8th at Halifax; on the 10th at Torquay, Oxford, and Halifax; on the 11th at Oxford; on the 24th at Torquay and Oxford; and on the 29th and 30th at Halifax.

Lunar halos were seen in October on the 1st and 3rd at Torquay; on the 6th at Oxford; on 7th and 29th at Halifax; on the 30th at Halifax and Stonyhurst; and on the 31st at Halifax.

In November on the 1st at Cambridge and Carlisle; on the 2nd at Torquay, Liverpool, and Halifax; on the 3rd at Oxford, Liverpool, and Halifax; on the 4th at Oxford, Hereford, and Halifax; on the 5th at Oxford and Halifax; on the 6th at Torquay and Bath; on the 7th at Liverpool; on the 9th at Torquay; on the 27th at Cambridge; on the 28th at Guernsey; and on the 30th at Oxford.

In December on the 1st at Cambridge and Halifax; on the 2nd at Oxford and Halifax; on the 3rd at Torquay and Halifax; on the 4th at Torquay; on the 5th and 6th at Halifax; on the 24th at Oxford; on the 28th at Liverpool, Halifax, and Stonyhurst; and on the 30th at Stonyhurst.

Snow fell in October on the 23rd at Hereford; on the 24th at Halifax, Bradford, and Leeds; and on the 25th at Hereford.

In November on the 29th at Carlisle; and on the 30th at Halifax.

In December on the 1st at Halifax; on the 2nd at Carlisle; on the 3rd at Hereford, Llandudno, and Carlisle; on the 4th at Torquay, Bath, Oxford, Royston, Hereford, Cambridge, Rugby, Wolverhampton, and in the northern counties; on the 5th it was a general fall all over the country; on the 6th at Eastbourne, Bath, Blackheath, Royal Observatory, Barnet, Royston, Hereford, Rugby, and Llandudno; on the 7th at Bath, Royston, Cambridge, Lowestoft, and Carlisle; on the 8th at Eastbourne, Bath, Oxford, Cambridge, Rugby, Somerleyton, Halifax, and Stonyhurst; on the 9th at Whitechurch, Cambridge, and Halifax; on the 10th at Torquay, Bath, Blackheath, Royal Observatory, Royston, Cambridge, Rugby, Halifax, and Carlisle; on the 13th at Royston; on the 23rd at Halifax; on the 25th at Guernsey; on the 30th at Royston; and on the 31st at Blackheath, Royal Observatory, Oxford, Lowestoft, Somerleyton, and Halifax.

Hail fell in October on the 1st at Truro and Rugby; on the 2nd at Truro; on the 5th at Hereford, Llandudno, and Hull; on the 8th at Liverpool; on the 9th at Royston; on the 10th at Liverpool; on the 15th at Truro; on the 17th at Royston and Cambridge; on the 18th at Royston; on the 21st at Truro, Salisbury, Bath, and Liverpool; and on the 22nd at Torquay and Liverpool.

In November on the 29th at Liverpool, Halifax, Stonyhurst, and Carlisle; and on the 30th at Liverpool, Halifax, and Stonyhurst.

In December on the 2nd at Lowestoft; on the 3rd at Bath, Liverpool, Halifax, and Stonyhurst; on the 4th at Guernsey, Truro, Torquay, Liverpool, and Stonyhurst; on the 5th at Guernsey, Truro, Torquay, and Liverpool; on the 6th at Guernsey and Truro; on the 7th at Truro; and on the 11th at Halifax.

Fog prevailed in October on the 1st at Whitechurch and Royston; on the 5th at Rugby; on the 6th at Blackheath, Royal Observatory, and Cambridge; on the 12th at Blackheath and Royal Observatory; on the 15th at Bath, Whitechurch, Blackheath, Royal Observatory, Oxford, Royston, Cambridge and Rugby; on the 19th at Whitechurch, Blackheath, Royal Observatory, Rugby, and Carlisle; on the 26th at Bath, Whitechurch, Blackheath, Royal Observatory, and Rugby; on the 28th at Torquay; on the 30th at Bath, Whitechurch, Oxford, Rugby, and Hull; and on the 31st at Carlisle.

In November on the 1st at Bath, Rugby, Wolverhampton, Liverpool, and Leeds; on the 2nd at Torquay, Whitechurch, Blackheath, Royal Observatory, Oxford, Cambridge, Rugby, Wolverhampton, Bradford, and Leeds; on the 5th at Cambridge, Lowestoft, and Hull; on the 6th at Lowestoft, Somerleyton, Hull, and Leeds; on the 7th at Whitechurch, and in the midland and northern counties; on the 8th at Whitechurch, Blackheath, Royal Observatory, and in the midland counties; on the 9th at Torquay, Bath, Oxford, Cambridge, and Rugby; on the 10th at Salisbury, Whitechurch, Oxford, Royston, Cambridge, Rugby, Stonyhurst, and Carlisle; on the 11th and 12th at Torquay, Osborne, Salisbury, and in the midland and northern counties; on the 13th at Somerleyton and Hull; on the 16th at Bath, Wolverhampton, Liverpool, and Carlisle; on the 17th at Torquay, Bath, Cambridge, Rugby, Wolverhampton, Liverpool, Halifax, and Leeds; on the 18th at Bath, Blackheath, Royal Observatory, and in the midland and northern counties; on the 19th at Whitechurch, Cambridge, Wolverhampton, Halifax, Hull, and Bradford; on the 20th at Salisbury and in the midland and northern counties; on the 21st and 22nd it was general in the midland and northern counties; on the 23rd at Torquay, Bath, and Halifax; on the 24th at Truro, Torquay, Bath, Rugby, Wolverhampton, Liverpool, and Halifax; and on the 25th and 26th at Torquay and Bath.

In December on the 2nd at Rugby, Wolverhampton, and Liverpool; on the 3rd at Torquay, Bath, Whitechurch, Lowestoft, Wolverhampton, and Halifax; on the 4th at Wolverhampton; on the 5th at Rugby and Wolverhampton; on the 6th at Rugby; on the 8th at Rugby, Wolverhampton, Halifax, and Stonyhurst; on the 13th at Bath; on the 14th at Bath and Wolverhampton; on the 15th at Lowestoft and Stonyhurst; on the 16th at Bath, Whitechurch, Royston, Cambridge, Hull, and Stonyhurst; on the 18th and 19th at Bath; on the 20th at Torquay, Whitechurch, Royston, and Halifax; on the 21st at Eastbourne, Royston, Cambridge, Lowestoft, Halifax, Hull, Stonyhurst, and Carlisle; on the 22nd at Bath, Whitechurch, Blackheath, Royal Observatory, Oxford, Royston, Cambridge, Rugby, Halifax, Hull, Bradford, and Stonyhurst; on the 25th and 26th at Oxford and Halifax; on the 27th at Bath, Oxford, Cambridge, Rugby, Lowestoft, Somerleyton, Halifax, and Bradford; on the 28th at Torquay, Osborne, Bath, Whitechurch, Blackheath, Royal Observatory, Oxford, Cambridge, Rugby, Lowestoft, Somerleyton, and Bradford; on the 29th at Bath, Blackheath, Royal Observatory, Oxford, Royston, Wolverhampton, Halifax, and Bradford; on the 30th at Whitechurch, Blackheath, Royal Observatory, Oxford, Royston, Cambridge, Somerleyton, Wolverhampton, Halifax, and Bradford; and on the 31st at Royston and Wolverhampton.

The Observations have been reduced to Mean values by Glaisher's Barometrical and Diurnal Range Tables, and the Hygrometrical results have been deduced from the seventh edition of his Hygrometrical Tables.

NAMES OF STATIONS.	Mean Pressure of dry Air reduced to the level of the Sea.	Highest Reading of the Thermometer.	Lowest Reading of the Thermometer.	Range of Temperature in the Quarter.	Mean of all Highest.	Mean of all Lowest.	Mean Monthly Range of Temperature.	Mean Daily Range of Temperature.	Mean Temperature of the Air.	Mean Temperature of the Dew Point.	Mean Elastic Force of Vapour.	Mean Weight of Vapour in a cubic foot of Air.	Mean additional Weight required for saturation.	Mean degree of Humidity.	Mean Weight of a cubic foot of Air.	Mean Reading of Maximum in Rays of Sun.	Mean Reading of Minimum on Grass.	Mean Estimated Strength.	WIND.				Mean Amount of Ozone.	Mean Amount of Cloud.	RAIN.			
																			Relative Proportion of						Mean Amount of Ozone.	Mean Amount of Cloud.	Number of Days on which it fell.	Amount collected.

The highest temperatures of the air were at Salisbury and Rugby, $62^{\circ}\cdot 0$; at the Royal Observatory, $61^{\circ}\cdot 9$.

The lowest temperatures of the air were at Carlisle, $-10^{\circ}0$; at Rugby, $10^{\circ}0$; and at Salisbury and Barnet, $11^{\circ}0$.

The greatest ranges of temperature were at Carlisle, $61^{\circ} \cdot 2$; at Rugby, $52^{\circ} \cdot 0$; and at Salisbury, $51^{\circ} \cdot 0$.

The least ranges of temperature were at Guernsey, $27^{\circ}\cdot 9$; at Eastbourne, $34^{\circ}\cdot 4$; and at Llandudno, $35^{\circ}\cdot 0$.

The greatest number of days of rain were at Guernsey, 69; at Truro, 60; and at Liverpool 59.

The least number of days of rain were at Oxford, 34; and at Whitechurch and Barnet, 38.

The greatest falls of rain were at Guernsey, 14'41 inches; at Stonyhurst, 13'06 inches; and at Eastbourne, 12'48 inches.

The least falls of rain were at Hereford 5·26 inches; at Nottingham, 5·30 inches; and at Whitechurch, 6·02 inches.

QUARTERLY METEOROLOGICAL TABLE for different PARALLELS of LATITUDE.

PARALLELS OF LATITUDE, &c.		Mean Pressure of dry Air reduced to the level of the Sea.	Mean of all highest Readings of the Thermometer.	Mean of all lowest Readings of the Thermometer.	Mean Range of Temperature.	Mean of all highest.	Mean of all lowest.	Mean Monthly Range of Temperature.	Mean Daily Range of Temperature.	Mean Temperature of the Air.	Mean Temperature of the Dew Point.	Mean Elastic Force of Vapour.	Mean Weight of Vapour in a cubic foot of Air.	Mean additional Weight required for saturation.	Mean degrees of Humidity.	Mean Weight of a cubic foot of Air.	Mean Reading of Maximum in Days of Sun.	Mean Reading of Minimum, on Grass.	Mean Estimated Strength.	WIND. Relative Proportion of				Mean Amount of Oceanic Mean Amount of Cloud.	Mean Number of Days it fell.	Mean Amount of Rain.

INDEX OF REGISTRATION DISTRICTS.

The following Index furnishes a reference to the *Number** of each REGISTRATION DISTRICT. In forming the alphabetical arrangement, the principle adopted has been to place compound names in the order in which they are pronounced.

Aberayron, 604.	Blean, 58.	Chorlton, 464.	Evesham, 381.	Hirekley, 404.
Abergavenny, 582.	Blofield, 228.	Christchurch, 98.	Exeter, 272.	Hitehin, 138.
Aberystwith, 605.	Blything, 216.	Church Stretton, 346.		Holbeach, 413.
Abingdon, 115.	Bodmin, 294.	Cirencester, 331.		Holbeck, 499.
Alcester, 397.	Bolton, 461.	Cleobury Mortimer, 347.	Falmouth, 298.	Holborn, 13.
Alderbury (Salisbury), 254.	Bootle, 576.	Clitheroe, 473.	Fareham, 90.	Hollingbourn, 51.
Alnwick, 563.	Bosmere, 211.	Clun, 345.	Faringdon, 114.	Holsworthy, 288.
Alresford, 105.	Boston, 417.	Clutton, 316.	Farnham, 38.	Holyhead, 631.
Alston, 568.	Bourn, 414.	Cockermouth, 574.	Faversham, 59.	Holywell, 617.
Alton, 106.	Brackley, 156.	Colchester, 196.	Festiniog, 625.	Honiton, 270.
Altrincham, 445.	Bradfield, 118.	Congleton, 448.	Flegg, 220.	Hoo, 45.
Alverstone, 89.	Bradford-on-Avon, 249.	Conway, 629.	Foleshill, 391.	Horncastle, 421.
Amersham, 140.	Bradford (Yorks), 497.	Cookham, 121.	Forde (Montgomery), 615.	Horsham, 79.
Amesbury, 253.	Braintree, 199.	Corwen, 622.	Fordingbridge, 95.	Houghton-le-Spring, 551.
Amphill, 178.	Bramley, 500.	Cosford, 204.	Forehoe, 226.	Howden, 518.
Andover, 110.	Brampton, 570.	Coventry, 392.	Freebridge Lynn, 236.	Hoxne, 210.
Anglesey, 630.	Brecknock, 608.	Cranbrook, 62.	Frome, 312.	Huddersfield, 495.
Ashborne, 433.	Brentford, 126.	Crediton, 282.	Fulham, 2.	Hull, 521.
Ashby-de-la-Zouch, 406.	Bridge, 56.	Crickhowell, 609.	Fyld, 477.	Hungerford, 113.
Ashton-under-Lyne, 468.	Bridgend, 589.	Cricklade, 242.		Hunslet, 498.
Aston, 387.	Bridgnorth, 348.	Croydon, 38.		Huntingdon, 168.
Atcham (Shrewsbury), 351.	Bridgewater, 307.	Cuckfield, 75.		
Atherstone, 389.	Bridlington, 625.		Gainsborough, 428.	
Auckland, 545.	Bridport, 268.	Darlington, 542.	Garstang, 478.	Ipswich, 213.
Axbridge, 515.	Brighton, 77.	Dartford, 42.	Gateshead, 555.	Isle of Wight, 91.
Axminster, 269.	Bristol, 320.	Daventry, 161.	Glanford Brigg, 428.	Islington, 9
Aylesbury, 143.	Brixworth, 162.	Depwade, 230.	Glendale, 566.	
Aylsham, 223.	Bromley, 41.	Derby, 436.	Gloucester, 327.	Keighley, 492.
Aysgarth, 539.	Bromsgrove, 384.	Devizes, 247.	Godstone, 37.	Kendal, 579.
	Bromyard, 341.	Dewsbury, 502.	Goole, 513.	Kensington, 15.
	Buckingham, 146.	Docking, 235.	Gower, 593.	Kettering, 164.
	Bulth, 607.	Dolgelly, 624.	Grantham, 419.	Keynsham, 318.
Bakewell, 440.	Burnley, 472.	Doncaster, 511.	Gravesend, 43.	Kidderminster, 376.
Bala, 623.	Burton-upon-Trent, 367.	Dorchester, 265.	Great Ouseburn, 488.	Kingsbridge, 275.
